EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q192-Q197):

NEW QUESTION # 192
An administrator is asked to protect a virtual machine using a protection policy.
Which statement is correct?

- A. The policy protects the underlying vVols and replication is not supported.
- B. The policy protects the underlying file systems and replication is not supported.
- C. The policy protects the underlying file systems and replication is supported.
- D. The policy protects the underlying vVols and replication is supported.

Answer: A

NEW QUESTION # 193
What is the maximum number of snapshot and replication rules that a protection policy supports?

- A. Up to four rules, protection types cannot be mixed in the same policy.
- B. Up to four replication rules, and no more than one snapshot rule.
- C. Up to four snapshot rules, and no more than one replication rule.

Answer: C

Explanation:
A protection policy in PowerStore can include multiple snapshot rules to define different snapshot schedules and retention periods. However, it supports only one replication rule to define how data is replicated to a remote system. This ensures clarity and consistency in how data protection is applied to a storage resource.
