DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q88-Q93):

NEW QUESTION # 88
Which of the following statement is incorrect?

- A. Privacy policy may be derived from outcomes of privacy impact assessment

- B. None of the Above
- C. Misuse of personal information available in public domain may be construed as a privacy violation
- D. A privacy policy once framed cannot be changed before the specified review period

Answer: D

Explanation:
Privacy policies are living documents that reflect how organizations manage personal information. While regular review cycles (e.g., annually) are recommended, nothing restricts updates outside of that cycle when significant changes in processing activities, legal obligations, or identified risks occur.
Therefore, Statement C is incorrect - a privacy policy can and should be updated before the scheduled review if warranted.

NEW QUESTION # 89
FILL BLANK
PIS
The company has a well-defined and effectively implemented security policy. As in case of access control, the security controls vary in different client relationships based on the client requirements but certain basic or hygiene security practices / controls are implemented organization wide. The consultants have advised the information security function to realign the company's security policy, risk assessment, data classification, etc to include privacy aspects. But the consultants are struggling to make information security function understand what exact changes need to be made and the security function itself is unable to figure it out.
(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than
500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.
The company is witnessing phenomenal growth in the BPM services over last few years including FinanceandAccounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).
To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.
The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.
Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.
Can you please guide the information security function to realign company's security initiatives to include privacy protection, keeping in mind that the client security requirements would vary across relationships?
(250 to 500 words)

Answer:

Explanation:
See the answer in explanation below.
Explanation:
The information security function of XYZ needs to realign the company's security initiatives to include privacy protection and make sure that it meets its client's requirements. The Information Security team must understand the legal and regulatory requirements for data privacy for each region in which XYZ operates, as well as industry standards such as ISO 27001/2 or NIST 800-53. This will help ensure that the organization is complying with applicable laws and regulations, while also helping build trust with clients by demonstrating that they take privacy seriously.
The Information Security team should also identify the most important risks associated with data privacy in order to determine what additional measures need to be taken in order to protect sensitive data from misuse or loss. The team should then assess the

appropriate risk management and privacy controls to ensure that the data is being managed in a secure manner. This could include encryption of sensitive data, access control measures such as role-based permissions, and regular reviews of user access rights to ensure proper security protocols are being followed.

In addition, XYZ should create an internal privacy policy which outlines its commitment to protecting the privacy of customers and employees. The policy should be reviewed periodically to ensure it meets changing regulatory requirements and industry standards. The policy must also be communicated to all staff members so they know what their responsibilities are with regards to protecting personal data.

Finally, XYZ should have a robust incident response plan in place for when breaches or unauthorized access occur. This should cover procedures for detecting, investigating, and responding to potential data breaches. It should also include measures to prevent future incidents and ensure that customer data is protected going forward.

By taking these measures, XYZ will be able to meet its client's security requirements while also demonstrating its commitment to protecting the privacy of their customers. This can help build trust with existing clients as well as new ones, making it easier for them to do business with the company. In addition, a comprehensive privacy protection program can help protect XYZ from costly legal or regulatory penalties in case of a data breach. Therefore, it is crucial for XYZ to invest in robust privacy protection initiatives in order to realize the full potential of the market.

NEW QUESTION # 90

Which among the following would not be characteristic of a good privacy notice?

- A. Comprehensive - explaining all the possible scenarios and processing details making the notice lengthy
- B. Easy to understand
- C. Clear and concise
- D. Multi-lingual

Answer: A

Explanation:
A good privacy notice, as guided by the DSCI Privacy Framework and other global frameworks, should be:
* Easy to understand
* Clear and concise
* Accessible in multiple languages where appropriate
While being comprehensive is essential, overwhelming users with exhaustive and overly detailed information is discouraged. Overly lengthy notices may obscure important information and reduce usability. The objective is to balance completeness with clarity and brevity.
Thus, Option C, by suggesting excessive length, does not align with the characteristics of a good privacy notice.

NEW QUESTION # 91

Which of the following is not an objective of POR?

- A. Create an inventory of business processes, enterprise and operational functions, client relationships that deal with personal information
- B. Establish a privacy function to address the activities, functions and operations that are required to manage the privacy initiatives
- C. Evaluate the role of corporate function in legal compliance management, its relations with IT, and security functions. Evaluate the role of legal function in compliance matters
- D. Identify all the activities, functions and operations that can be attributed to the privacy initiatives of an organization

Answer: C

NEW QUESTION # 92

What are the different types of non-conformities possible for assessor to assign in an assessment? Tick all that apply.

- A. Low Risk
- B. High Risk
- C. Major
- D. Minor
- E. None of the above

Answer: C,D

NEW QUESTION # 93

......

DSCI certification DCPLA exam is a test of IT professional knowledge. Actual4Labs is a website which can help you quickly pass DSCI certification DCPLA exams. In order to pass DSCI certification DCPLA exam, many people who attend DSCI certification DCPLA exam have spent a lot of time and effort, or spend a lot of money to participate in the cram school.
