

# Pass Guaranteed Quiz HP - HPE7-A01 - High Pass-Rate Valid Aruba Certified Campus Access Professional Exam Exam Cram

BONUS!!! Download part of Prep4pass HPE7-A01 dumps for free: [https://drive.google.com/open?id=1-NE\\_GCo8pkIsGVddvm6QTAHEXVYAZ8ZN](https://drive.google.com/open?id=1-NE_GCo8pkIsGVddvm6QTAHEXVYAZ8ZN)

Our product boasts many merits and functions. You can download and try out our HPE7-A01 test question freely before the purchase. You can use our product immediately after you buy our product. We provide 3 versions for you to choose and you only need 20-30 hours to learn our HPE7-A01 training materials and prepare the exam. The passing rate and the hit rate are both high. The purchase procedures are safe and we protect our client's privacy. We provide 24-hours online customer service and free update within one year. If you fail in the exam, we will refund you immediately. All in all, there are many advantages of our HPE7-A01 Training Materials.

Take advantage of the Prep4pass's HP training materials to prepare for the exam, let me feel that the exam have never so easy to pass. This is someone who passed the examination said to us. With Prep4pass HP HPE7-A01 Exam Certification training, you can sort out your messy thoughts, and no longer twitchy for the exam. Prep4pass have some questions and answers provided free of charge as a trial. If I just said, you may be not believe that. But as long as you use the trial version, you will believe what I say. You will know the effect of this exam materials.

## HPE7-A01 Visual Cert Test - Real HPE7-A01 Exam Dumps

Our HP HPE7-A01 practice materials are suitable for exam candidates of different degrees, which are compatible whichever level of knowledge you are in this area. These HP HPE7-A01 Training Materials win honor for our company, and we treat HP HPE7-A01 test engine as our utmost privilege to help you achieve your goal.

## HP Aruba Certified Campus Access Professional Exam Sample Questions (Q162-Q167):

### NEW QUESTION # 162

A customer is using a legacy application that communicates at layer-2. The customer would like to keep this application working across the campus which is connected via layer-3. The legacy devices are connected to Aruba CX 6300 switches throughout the campus.

Which technology minimizes flooding so the legacy application can work efficiently?

- A. Generic Routing Encapsulation (GRE)
- B. Static VXLAN
- C. Ethernet over IP (EoIP)
- **D. EVPN-VXLAN**

**Answer: D**

Explanation:

EVPN-VXLAN is a technology that allows layer-2 communication across layer-3 networks by using Ethernet VPN (EVPN) as a control plane and Virtual Extensible LAN (VXLAN) as a data plane<sup>3</sup>. EVPN-VXLAN can be used to support legacy applications that communicate at layer-2 across different campuses or data centers that are connected via layer-3. EVPN-VXLAN minimizes flooding by using BGP to distribute MAC addresses and IP addresses of hosts across different VXLAN segments<sup>3</sup>. EVPN-VXLAN also provides benefits such as loop prevention, load balancing, mobility, and scalability<sup>3</sup>.

### NEW QUESTION # 163

Your customer has four (4) Aruba 7200 Series Gateways and two (2) 7000 Series Gateways. The customer wants to form a cluster with these Gateways.

What design consideration would prevent you from using all of those Gateways?

- **A. A heterogeneous cluster is not supported in AOS 10.x.**
- B. Multiple versions between Gateways in the same cluster profile are not allowed AOS 10.x.
- C. A combination of 7200 series and 7000 series gateways supports up to 4 nodes
- D. The AP load should be lowest value of worst-case scenario load.

**Answer: A**

Explanation:

The reason is that AOS 10.x does not support clustering gateways with different versions in the same cluster profile. A cluster profile defines the configuration settings for a group of gateways that are managed by Aruba Central.

According to the Aruba documentation<sup>2</sup>, "You can combine 7200 Series and 7000 Series gateways in the same cluster with a maximum size of four devices with reduced AP client capacity on 7000 Series gateways."

### NEW QUESTION # 164

A company deployed Dynamic Segmentation with their CX switches and Gateways. After performing a security audit on their network, they discovered that the tunnels built between the CX switch and the Aruba Gateway are not encrypted. The company is concerned that bad actors could try to insert spoofed messages on the Gateway to disrupt communications or obtain information about the network. Which action must the administrator perform to address this situation?

- A. Enable Enhanced PAPI security
- **B. Enable Enhanced security**
- C. Enable Secure Mode Enhanced
- D. Enable GRE security

**Answer: B**

Explanation:

To address the situation of unencrypted tunnels between the CX switch and the Aruba Gateway, the administrator must enable Enhanced security on both devices. Enhanced security is a feature that provides encryption and authentication for GRE tunnels between CX switches and Aruba Gateways using IPsec.

Enhanced security can be enabled globally or per tunnel on both devices using CLI commands or Web UI options. The other options are incorrect because they either do not provide encryption or authentication for GRE tunnels or do not exist as features.

### NEW QUESTION # 165

What are the requirements to ensure that WMM is working effectively? (Select two)

- **A. The Client must be Wi-Fi CERTIFIED for WMM and configured for WMM marking.**
- B. All APs need to be from the AP-5xx series and AP-6xx series which are Wi-Fi CERTIFIED 6.
- C. The AP needs to be connected via a tagged VLAN to the wired port
- D. The Aruba AOS10 APs installed have to be converted to controlled mode
- **E. The APs and the controller are Wi-Fi CERTIFIED for WMM which is enabled**

**Answer: A,E**

Explanation:

These are the correct requirements to ensure that WMM (Wi-Fi Multimedia) is working effectively. WMM is a standard that provides quality of service (QoS) for wireless networks by prioritizing traffic into four categories: voice, video, best effort, and background. To use WMM, both the APs and the controller must be Wi-Fi CERTIFIED for WMM, which means they have passed interoperability tests and comply with the standard. WMM must also be enabled on the APs and the controller, which is usually the default setting. The client device must also be Wi-Fi CERTIFIED for WMM and configured for WMM marking, which means it can tag its traffic with the appropriate priority level based on the application type. The other options are incorrect because they are either not related to WMM or not required for WMM to work. References:

#### NEW QUESTION # 166

Which statements are true regarding a VXLAN implementation on Aruba Switches? (Select two.)

- A. VTEPs encapsulate and decapsulate VXLAN traffic
- B. VNIs encapsulate and decapsulate VXLAN traffic
- C. All Aruba CX switches support VXLAN.
- D. They are only available for datacenter switches (CX 8k, 9k, 10k)
- E. MTU size must be increased beyond the default

Answer: A,E

#### NEW QUESTION # 167

.....

Do you want to pass the HP HPE7-A01 exam on the first attempt but do not know where to start the preparation? Then Prep4pass has a solution to all your problems. Prep4pass is among the greatest resources for preparing for HP HPE7-A01 Certification test. With real HPE7-A01 PDF Questions of Prep4pass you can simply prepare for your HPE7-A01 exam from home, the office, or your place of work.
