Dumps LEED-Green-Associate Free - LEED-Green-Associate Exam Duration

Are you still worried about not passing the LEED-Green-Associate exam? Do you want to give up because of difficulties and pressure when reviewing? You may have experienced a lot of difficulties in preparing for the exam, but fortunately, you saw this message today because our well-developed LEED-Green-Associate Exam Questions will help you tide over all the difficulties. As a multinational company, our LEED-Green-Associate training quiz serves candidates from all over the world.

USGBC LEED Green Associate Exam Sample Questions (Q176-Q181):

NEW QUESTION # 176

A building owner is considering developing an undeveloped urban site. What characteristic of the location is most relevant to LEED?

- A. Proximity of the site to a landfill
- B. Location of a local U.S. Green Building council (USGBC) office
- **C. Access to quality transit**
- D. Proximity to renewable energy array

Answer: C

Explanation:

Access to quality transit is one of the criteria for the LEED v4 Location and Transportation category, which aims to reduce the environmental and human health impacts of transportation and promote sustainable site selection. By developing an urban site that is well-served by public transportation, the building owner can reduce the reliance on private vehicles, lower greenhouse gas emissions, and encourage alternative modes of travel¹²³.

NEW QUESTION # 177

Which of the following water types is suitable for drinking?

- A. Greenwater
- B. Stormwater
- **C. Potable water**
- D. Graywater

Answer: C

Explanation:

Potable water is water that is suitable for drinking. Potable water meets or exceeds the Environmental Protection Agency's (EPA) drinking water quality standards and is free of contaminants that are harmful to human health. The other options are not suitable for drinking. Graywater is wastewater from sinks, showers, and laundry that can be reused for non-potable purposes such as toilet flushing and irrigation. Greenwater is rainwater that is collected and stored for non-potable uses. Stormwater is runoff from precipitation that can carry pollutants and sediments into waterways. NEW QUESTION # 178

The US Green Building Council (USGBC) created which of the following?

- A. LEED Credential Maintenance Program (CMP)
- **B. LEED Rating System**
- C. LEED Operations and Maintenance exam
- D. LEED User

Answer: B

NEW QUESTION # 179

Which of the following has the highest energy consumption in a typical U.S. office building?

- A. Cooling
- B. Lighting
- **C. Space Heating**
- D. Water Heating

Answer: C

Explanation:

According to the U.S. Energy Information Administration, space heating accounted for about 32% of energy use for all U.S. commercial buildings in 2018, followed by ventilation and lighting, each at about 10%¹. Space heating is the largest single energy end use in U.S. office buildings as well².

NEW QUESTION # 180

The water use reduction for a project is determined by finding the difference between the baseline conditions and the

- A. local water usage rate
- **B. calculated installed case**
- C. permitted maximum water usage
- D. project occupancy type

Answer: B

Explanation:

The water use reduction for a project is determined by finding the difference between the baseline conditions and the calculated installed case. The baseline conditions are the water use of the project if it were designed to meet the minimum requirements of the Energy Policy Act of 1992 or a local equivalent, whichever is more stringent. The calculated installed case is the water use of the project based on the actual fixtures and fittings installed or specified. The water use reduction is calculated as a percentage of savings from the baseline conditions. The LEED Green Associate Candidate Handbook states that one of the strategies for achieving water efficiency is to "calculate water use reduction by comparing a building project's water use with the water use baseline calculated for the building after meeting the Energy Policy Act of 1992 fixture performance requirements" [1, p. 14]. Reference: LEED Green Associate Candidate Handbook, [Water Use Reduction | U.S. Green Building Council]

NEW QUESTION # 181

.....

Our company has taken a lot of measures to ensure the quality of LEED-Green-Associate preparation materials. It is really difficult for yourself to hire a professional team, regularly investigate market conditions, and constantly update our LEED-Green-Associate exam questions. But we have all of them done for you. And our LEED-Green-Associate study braindumps have the advantage of high-effective. Just look at our pass rate of our loyal customers, with the help of our LEED-Green-Associate learning guide, 98% of them passed the exam successfully.
