Reasonable NCP-DB Exam Price | Vce NCP-DB Free

DOWNLOAD the newest Actual4Labs NCP-DB PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1ZDWCHdwBkjrV9NmUb_Y_tziB9XFcK8NN

Actual4Labs NCP-DB exam training materials can help you save a lot of time and energy, and make you yield twice the result with half effort to pass NCP-DB certification exam. After you purchase our NCP-DB exam dumps, we will also provide one year free renewal service for you. If there's any quality problem in NCP-DB Exam Dumps you buy or you fail NCP-DB certification exam, we promise to give you a full refund unconditionally.

If you buy our NCP-DB exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our NCP-DB practice materials. We can always give the most professinal suggestion on our NCP-DB learning guide to our customers at the first time for our service are working 24/7 online.

Vce NCP-DB Free - NCP-DB Latest Study Questions

Since One of the significant factors to judge whether one is competent or not is his or her NCP-DB certificates. So to get NCP-DB real exam and pass the NCP-DB exam is important. Generally speaking, certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our NCP-DB practice materials can satisfy your demands if you are now in preparation for a certificate. We will be your best friend to help you achieve success!

Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample Questions (Q153-Q158):

NEW QUESTION # 153
An administrator needs to create a Network Profile for NDB HA VMs spread across three Nutanix clusters.
What type of Network Profile is required for NDB API and Repository VMs?

- A. PostgreSQL single instance managed in NDB
- B. PostgreSQL HA instance managed in NDB
- C. PostgreSQL HA instance managed outside NDB
- D. PostgreSQL single instance managed outside NDB

Answer: C

Explanation:

When creating a Network Profile for NDB HA VMs (e.g., NDB API and Repository VMs) spread across three Nutanix clusters, the required type is PostgreSQL HA instance managed outside NDB. NDB HA relies on a PostgreSQL database for its control plane, and in a multi-cluster HA setup, this PostgreSQL instance must be configured for high availability (e.g., using streaming replication) outside NDB's management. The Network Profile must support this external HA instance's networking requirements (e.g., VLANs, IP ranges) to ensure connectivity across clusters.

Other options are incorrect:

* A. PostgreSQL HA instance managed in NDB: NDB manages database instances, not its own HA control plane database.
* B. PostgreSQL single instance managed in NDB: A single instance lacks HA, unsuitable for multi- cluster.
* D. PostgreSQL single instance managed outside NDB: Lacks HA, insufficient for NDB HA VMs.

Thus, the verified answer is C, aligning with NDB HA architecture.

NEW QUESTION # 154

What must be completed within NDB before patching a Linux OS?

- A. Configure the repository.
- B. Update the database.
- C. Update the software profile version.
- D. Configure database high availability.

Answer: A

Explanation:

Before patching a Linux OS on a database server VM provisioned using NDB, you must configure the repository for the OS updates. This can be done by creating a Repository Profile in NDB and specifying the URL, username, and password for the repository. The Repository Profile can be applied to one or more database server VMs during the provisioning process or later. By configuring the repository, you ensure that NDB can access and download the latest OS patches from a trusted source. NEW QUESTION # 155

A developer with RBAC privileges in Era needs to refresh an existing DB Clone.
What steps must the developer take to perform the refresh?

- A. Navigate to Databases > Clones, Select the appropriate clone from the table, click Refresh, select the desired Point In Time or Snapshot and click Refresh
- B. Navigate to Databases > Clones, Select the appropriate clone from the table, choose
- C. Navigate to Time Machines Select the appropriate Database Time Machine from the table end Refresh Clone from the Actions menu.
- D. Navigate to Databases > Sources, Select the appropriate Database from the table and Refresh Clone from the Database Actions menu.

Answer: A

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, to refresh an existing DB Clone, a developer with RBAC privileges in Era needs to navigate to Databases > Clones. From there, they select the appropriate clone from the table, click Refresh, select the desired Point In Time or Snapshot, and then click Refresh12. This process allows the developer to update the cloned database3.

NEW QUESTION # 156

What is the maximum number of days allowed for alert retention?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

In Nutanix Database Service (NDB), alert retention is a configurable setting that determines how long alerts (e.g., system issues, performance warnings, or database events) are stored in the system for review and analysis. Based on NDB's design and administrative policies, the maximum number of days allowed for alert retention is 180 days. This duration allows administrators to maintain a reasonable historical view of system health while preventing excessive data accumulation that could impact performance. This value is typically set as a default maximum in the NDB settings or via Prism Central integration, and administrators can adjust retention periods within this limit based on organizational needs.
* Option A (90) is incorrect as it represents a shorter retention period, which may be a configurable minimum or intermediate value but not the maximum.
* Option B (180) is correct as it matches the documented maximum alert retention period in NDB.
* Option C (270) is incorrect as it exceeds the standard maximum retention period supported by NDB.
* Option D (306) is incorrect as it is not a supported retention limit in NDB's configuration options.
Administrators should verify this setting in the NDB UI under alert management or consult Nutanix support for custom configurations.

NEW QUESTION # 157
What happens to the primary member in a MongoDB Server Cluster during the NDB patching process?

- A. It becomes a read-only member during the patching process.
- B. It is patched first and then becomes a secondary member.
- C. It is patched last and is restored to its original state.
- D. It is skipped during the patching process to ensure no downtime.

Answer: B

Explanation:
According to the NDB documentation, the NDB patching process for MongoDB Server Cluster follows these steps1:
* NDB identifies the primary member of the MongoDB Server Cluster and patches it first.
* NDB triggers a failover to elect a new primary member from the remaining secondary members.
* NDB patches the former primary member, which becomes a secondary member after the failover.
* NDB patches the remaining secondary members one by one.
* NDB verifies the patching status and the cluster health.
This process ensures that the MongoDB Server Cluster always has a primary member available to handle write operations, while minimizing the downtime and the impact on the cluster performance.

NEW QUESTION # 158
......

Users who use our NCP-DB study materials already have an advantage over those who don't prepare for the exam. Our study materials can let users the most closed to the actual test environment simulation training, let the user valuable practice effectively on NCP-DB study materials, thus through the day-to-day practice, for users to develop the confidence to pass the exam. For examination, the power is part of pass the exam but also need the candidate has a strong heart to bear ability, so our NCP-DB Study Materials through continuous simulation testing, let users less fear when the real test, better play out their usual test levels, can even let them photographed, the final pass exam.

Vce NCP-DB Free: https://www.actual4labs.com/Nutanix/NCP-DB-actual-exam-dumps.html

Do you want to pass the Nutanix NCP-DB exam better and faster, You can learn from your Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) practice test mistakes and overcome them before the actual NCP-DB exam, Nutanix Reasonable NCP-DB Exam Price You can enjoy One Year free update: This is not a one-time download only, In a word, compared to other similar companies aiming at NCP-DB test prep, the services and quality of our products are highly regarded by our customers and potential clients.

You'll want to talk about your decision to make them your digital executor Vce NCP-DB Free and let them know where they can find your inventory, While computer forensic software tends to be commercially dominated, which means you would have to pay a hefty licensing fee just to get **Reasonable NCP-DB Exam Price** your feet wet, we wholeheartedly believe in open source because of the documented methodologies and availability of the source code.

Benefits with Actual4Labs Nutanix NCP-DB study material

Do you want to pass the Nutanix NCP-DB Exam better and faster, You can learn from your Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 (NCP-DB) practice test mistakes and overcome them before the actual NCP-DB exam.

You can enjoy One Year free update: This is NCP-DB not a one-time download only, In a word, compared to other similar companies aiming at NCP-DB test prep, the services and quality of our products are highly regarded by our customers and potential clients.

If you unluckily fail to pass your exam, NCP-DB Latest Study Questions don't worry, because we have created a mechanism for economical compensation.
