

Trustable Oracle - 1Z0-931-25 - Download Oracle Autonomous Database Cloud 2025 Professional Pdf

P.S. Free & New 1Z0-931-25 dumps are available on Google Drive shared by TestkingPDF: <https://drive.google.com/open?id=1P5hCvZFQDF1Kx-HsdT1nwS6lQhJZwMxr>

TestkingPDF is obliged to give you three months of free update checks to ensure the validity and accuracy of the Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) exam dumps. We also offer you a 100% money-back guarantee, in the very rare case of failure or unsatisfactory results. This puts your mind at ease when you are Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) exam preparing with us.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Autonomous Database Dedicated: This section of the exam measures the skills of IT Architects and explores the workflows and functionality of Autonomous Database Dedicated and Autonomous Database Cloud@Customer. It includes provisioning dedicated resources, setting up OCI policies, monitoring infrastructure, scheduling maintenance tasks such as patching, and managing encryption keys for enhanced security. IT Architects will learn how to integrate dedicated database environments within their cloud strategy.
Topic 2	<ul style="list-style-type: none"> Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.
Topic 3	<ul style="list-style-type: none"> Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.
Topic 4	<ul style="list-style-type: none"> Managing and Maintaining Autonomous Database: This section of the exam measures the skills of Database Administrators and focuses on the ongoing management and maintenance of Autonomous Database instances. It includes using REST APIs and OCI CLI for automation, configuring access control lists and private endpoints, monitoring performance, setting up notifications, utilizing features like auto-indexing and data safe, handling connectivity through wallets and service handles, and configuring disaster recovery using Data Guard to ensure business continuity.

Topic 5	<ul style="list-style-type: none"> Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.

1Z0-931-25 Valid Test Answers | 1Z0-931-25 Valid Exam Format

We hope you can feel that we sincerely hope to help you. We hope that after choosing our 1Z0-931-25 study materials, you will be able to concentrate on learning our 1Z0-931-25 learning guide without worry. It is our greatest honor that you can feel satisfied. Of course, we will value every user. We will never neglect any user. Our 1Z0-931-25 Exam Braindumps will provide perfect service for everyone.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q34-Q39):

NEW QUESTION # 34

Data Guard is enabled for your Autonomous Database and the Lifecycle State field for the primary database indicates that it is Stopped. Which statement is true?

- A. Switchover is automatically initiated.
- B. Standby database is also stopped.
- C. Failover is automatically initiated.
- D. Standby database is terminated.

Answer: B

Explanation:

With Autonomous Data Guard enabled, the primary and standby databases are tightly coupled:

Correct Answer (C): "Standby database is also stopped" is true. When the primary database is stopped (e.g., via OCI Console), the standby database is also stopped to maintain consistency and alignment between the two. This ensures the standby remains a viable replica when the primary restarts.

Incorrect Options:

A: Switchover (role reversal) requires manual initiation and an active primary; it doesn't occur automatically on stop.

B: The standby is not terminated; it remains configured but stopped.

D: Failover (standby promotion) is not automatic on a planned stop; it's triggered only by primary failure.

This behavior preserves Data Guard functionality.

NEW QUESTION # 35

Which command should you issue to enable application continuity on Oracle Autonomous Database on Shared Infrastructure?

- A. ALTER SYSTEM SET APPLICATION_CONTINUITY=TRUE
- B. ALTER SESSION SET APPLICATION_CONTINUITY=TRUE
- C. ALTER DATABASE SET APPLICATION_CONTINUITY=TRUE
- D. EXEC DBMS_CLOUD_ADMIN.ENABLE_APP_CONT('<service_name>');

Answer: D

Explanation:

Application Continuity ensures seamless failover for applications:

Correct Answer (B): EXEC DBMS_CLOUD_ADMIN.ENABLE_APP_CONT('<service_name>'); is the correct command for Autonomous Database on Shared Infrastructure. It enables Application Continuity for a specific service (e.g., tpurgent), leveraging the DBMS_CLOUD_ADMIN package designed for cloud-specific administration.

Incorrect Options:

A: ALTER SESSION only affects the current session, not persistent database-wide settings.

C, D: ALTER DATABASE and ALTER SYSTEM are not supported in Autonomous Database's managed environment; Oracle restricts such commands.

This ensures application resilience in a managed setup.

NEW QUESTION # 36

Which two statements are correct about Autonomous Data Warehouse on Shared Exadata Infrastructure?

- A. Parallelism is not enabled by default.
- **B. Compression is enabled by default. Autonomous Data Warehouse uses Hybrid Columnar Compression for all tables by default.**
- **C. Oracle Database Result Cache is enabled by default for all SQL statements.**
- D. You have direct access to the database node.

Answer: B,C

Explanation:

Let's evaluate each statement about Autonomous Data Warehouse (ADW) on Shared Exadata Infrastructure:

A . Oracle Database Result Cache is enabled by default for all SQL statements: True. ADW enables the Result Cache by default to improve query performance by storing frequently accessed results in memory.

B . You have direct access to the database node: False. ADW is a fully managed service; users do not have direct access to underlying nodes, which Oracle manages for patching, scaling, and security.

C . Parallelism is not enabled by default: False. Parallelism is enabled by default in ADW to optimize large analytical queries across multiple CPUs.

D . Compression is enabled by default. Autonomous Data Warehouse uses Hybrid Columnar Compression for all tables by default: True. Hybrid Columnar Compression (HCC) is applied automatically to reduce storage and enhance query performance.

Thus, A and D are correct, reflecting ADW's default performance optimizations.

NEW QUESTION # 37

Which two statements are true about Data Insights?

- **A. You can search for Data Insights against a base table or business model.**
- B. Data Insights is an additional priced option.
- **C. You can retrieve previously executed Data Insights searches.**
- D. Data Insights is available with on-premises deployments of Oracle Database.

Answer: A,C

Explanation:

Full Detailed In-Depth Explanation:

A: True. Data Insights works with tables and business models in ADW.

B: False. Exclusive to Autonomous Database, not on-premises.

C: True. Search history is retrievable.

D: False. Included in ADW, not separately priced.

NEW QUESTION # 38

Which statement is FALSE about loading data into the Autonomous Database using the Data Load card in Database Actions?

- A. Data can be uploaded from several cloud storage sources including S3, Azure, Google Cloud, and Oracle Object Storage
- **B. You must first manually create your database credentials using DBMS_CLOUD.CREATE_CREDENTIAL before accessing your Oracle Object Storage Bucket**
- C. Data formats supported include: text, CSV, JSON, Avro, and Parquet
- D. Data can be loaded from a local data source
- E. Data can be loaded from a remote database using Database Links (DBLinks)

Answer: B

Explanation:

The Data Load card in Database Actions (within ADB's web interface) simplifies data loading. The false statement is:

You must first manually create your database credentials using DBMS_CLOUD.CREATE_CREDENTIAL before accessing your Oracle Object Storage Bucket (D): This is incorrect. The Data Load card automates credential management for Oracle Object Storage by leveraging the ADB instance's IAM permissions. When you select an OCI Object Storage bucket in the UI, it uses the instance's resource principal or user OCI credentials (e.g., from your signed-in OCI session), eliminating the need to manually run DBMS_CLOUD.CREATE_CREDENTIAL. For example, uploading sales.csv from a bucket via the Data Load card requires only bucket selection and file mapping-no PL/SQL credential setup. This automation enhances usability, contrasting with manual methods where CREATE_CREDENTIAL is needed (e.g., in SQL scripts).

The true statements are:

Data formats supported include: text, CSV, JSON, Avro, and Parquet (A): The Data Load card supports these formats, parsing them into tables using DBMS_CLOUD under the hood. E.g., a JSON file { "id": 1, "name": "John" } loads as rows.

Data can be loaded from a local data source (B): You can upload files directly from your local machine (e.g., a CSV on your desktop) via the browser interface, staging them temporarily for loading.

Data can be uploaded from several cloud storage sources including S3, Azure, Google Cloud, and Oracle Object Storage (C): The card supports these external cloud sources, requiring credentials (e.g., AWS keys), alongside native OCI Object Storage integration.

Data can be loaded from a remote database using Database Links (E): DBLinks allow pulling data from another Oracle database (e.g., INSERT INTO local_table SELECT * FROM remote_table@link), supported in the Data Load card.

The automation of credentials in D is a key differentiator for the UI-based Data Load feature.

NEW QUESTION # 39

.....

Our 1Z0-931-25 guide questions boost many advantages and varied functions. You can have a free download and tryout of our 1Z0-931-25 exam questions before the purchase and our purchase procedures are easy and fast. You can receive our 1Z0-931-25 exam questions in a few minutes and we provide 3 versions for you to choose. You need little time to learn the 1Z0-931-25 Exam Torrent and prepare the exam. Our passing rate and the hit rate is very high. After you pass the 1Z0-931-25 exam you will gain a lot of benefits such as enter in the big company and double your wage.
