Authorized Snowflake DEA-C01 Pdf, VCE DEA-C01 Dumps

Do you want to pass DEA-C01 certification exam easily? Then it is necessary to have SurePassExams DEA-C01 exam certification training materials. SurePassExams DEA-C01 test training materials are summarized by IT experts with constant practice, which is the combination of DEA-C01 Exam Dumps and answers, and can't be matched by any DEA-C01 test training materials from others. SurePassExams will take you to a more beautiful future.

Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57

A Data Engineer is implementing a near real-time ingestion pipeline to load data into Snowflake using the Snowflake Kafka connector. There will be three Kafka topics created.

.....snowflake objects are created automatically when the Kafka connector starts? (Select THREE)

- A. External stages
- B. Materialized views
- C. Tables
- D. internal stages
- E. Pipes
- F. Tasks

Answer: C,D,E

Explanation:

Explanation

The Snowflake objects that are created automatically when the Kafka connector starts are tables, pipes, and internal stages. The Kafka connector will create one table, one pipe, and one internal stage for each Kafka topic that is configured in the connector properties. The table will store the data from the Kafka topic, the pipe will load the data from the stage to the table using COPY statements, and the internal stage will store the files that are produced by the Kafka connector using PUT commands. The other options are not Snowflake objects that are created automatically when the Kafka connector starts. Option B, tasks, are objects that can execute SQL statements on a schedule without requiring a warehouse. Option E, external stages, are objects that can reference locations outside of Snowflake, such as cloud storage services. Option F, materialized views, are objects that can store the precomputed results of a query and refresh them periodically.

NEW QUESTION # 58

Stuart, a Lead Data Engineer in MACRO Data Company created streams on set of External tables. He has been asked to extend the data retention period of the stream for 90 days, which parameter he can utilize to enable this extension?

- A. DATA_EXTENSION_TIME_IN_DAYS
- B. DATA_RETENTION_TIME_IN_DAYS
- C. MAX_DATA_EXTENSION_TIME_IN_DAYS
- D. None of the above

Answer: D

Explanation:

Explanation

External tables do not have data retention period applicable.

Good to Understand other Options available.

DATA_RETENTION_TIME_IN_DAYS

Type: Object (for databases, schemas, and tables) - Can be set for Account - Database - Schema - Table Description: Number of days for which Snowflake retains historical data for performing Time Travel actions (SELECT, CLONE, UNDROP) on the object. A value of 0 effectively disables Time Travel for the specified database, schema, or table.

Values:

0 or 1 (for Standard Edition)

0 to 90 (for Enterprise Edition or higher)

Default:

1

MAX_DATA_EXTENSION_TIME_IN_DAYS

Type: Object (for databases, schemas, and tables) - Can be set for Account - Database - Schema - Table Description: Maximum number of days for which Snowflake can extend the data retention period for tables to prevent streams on the tables from becoming stale. By default, if the DATA_RETENTION_TIME_IN_DAYS setting for a source table is less than 14 days, and a stream has not been consumed, Snowflake temporarily extends this period to the stream's offset, up to a maximum of 14 days, regardless of the Snowflake Edition for your account. The MAX_DATA_EXTENSION_TIME_IN_DAYS parameter enables you to limit this automatic extension period to control storage costs for data retention or for compliance reasons.

This parameter can be set at the account, database, schema, and table levels. Note that setting the parameter at the account or schema level only affects tables for which the parameter has not already been explicitly set at a lower level (e.g. at the table level by the table owner). A value of 0 effectively disables the automatic extension for the specified database, schema, or table.

Values:

0 to 90 (i.e. 90 days) - a value of 0 disables the automatic extension of the data retention period. To increase the maximum value for tables in your account, Client needs to contact Snowflake Support.

Default: 14

NEW QUESTION # 59

A company needs to partition the Amazon S3 storage that the company uses for a data lake. The partitioning will use a path of the S3 object keys in the following format:

s3://bucket/prefix/year=2023/month=01/day=01.

A data engineer must ensure that the AWS Glue Data Catalog synchronizes with the S3 storage when the company adds new partitions to the bucket.

Which solution will meet these requirements with the LEAST latency?

- A. Schedule an AWS Glue crawler to run every morning.
- B. Run the MSCK REPAIR TABLE command from the AWS Glue console.
- C. Manually run the AWS Glue CreatePartition API twice each day.
- **D. Use code that writes data to Amazon S3 to invoke the Boto3 AWS Glue create_partition API call.**

Answer: D

Explanation:

Use code that writes data to Amazon S3 to invoke the Boto3 AWS Glue create_partition API call.

This approach ensures that the Data Catalog is updated as soon as new data is written to S3, providing the least latency in reflecting new partitions.

NEW QUESTION # 60

Which query will show a list of the 20 most recent executions of a specified task kttask, that have been scheduled within the last hour that have ended or are stillrunning's.

- A.
- B.
- C.
- **D.**

Answer: D

NEW QUESTION # 61

SYSTEM\$CLUSTERING_INFORMATION functions returns clustering information, including average clustering depth, for a table based on one or more columns in the table. The function returns a JSON object containing average_overlaps name/value pairs.

Does High average_overlaps indicates well organized Clustering?

- **A. NO**
- B. YES

Answer: A

Explanation:

Explanation

Higher the avg_overlap indicates poorly organized clustering.

NEW QUESTION # 62

.....

This is a mutually beneficial learning platform, that's why our DEA-C01 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test DEA-C01 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success. Respect the user's choice, will not impose the user must purchase the DEA-C01 Study Materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying exams.
