If you are clueless about the oncoming exam, our 1z0-071 practice materials are trustworthy materials for your information. More than tens of thousands of exam candidate coincide to choose our 1z0-071 practice materials. Our 1z0-071 practice materials are perfect for they come a long way on their quality. If you commit any errors, which can correct your errors with accuracy rate more than 98 percent. To get more useful information about our 1z0-071 practice materials, please read the following information.

### Oracle Database SQL Sample Questions (Q61-Q66):

NEW QUESTION # 61

View the Exhibit and examine the structure of the CUSTOMERS table.

Using the CUSTOMERS table, you must generate a report that displays a credit limit increase of 15% for all customers. Customers with no credit limit should have "Not Available" displayed. Which SQL statement would produce the required result?

- A. SELECT TO\_CHAR(NVL(cust\_credit\_limit\*.15,'Not Available')) 'NEW CREDIT'FROM customers;
- B. SELECT NVL(cust\_credit\_limit,'Not Available')\*.15 'NEW CREDIT'FROM customers;
- C. SELECT NVL(TO\_CHAR(cust\_credit\_limit\*.15),'Not Available') 'NEW CREDIT'FROM customers;
- D. SELECT NVL(cust\_credit\_limit\*.15,'Not Available') 'NEW CREDIT'FROM customers;

**Answer: C**

#### NEW QUESTION # 62

Examine the description of the CUSTOMERS table:

You need to display last names and credit limits of all customers whose last name starts with A or B in lower or upper case, and whose credit limit is below 1000.

Examine this partial query:

Which two WHERE conditions give the required result?

- A. Option C
- B. Option E
- C. Option D
- D. Option A
- E. Option B

**Answer: B,E**

#### NEW QUESTION # 63

View and Exhibit and examine the structure and data in the INVOICE table. (Choose two.) Which two statements are true regarding data type conversion in query expressions?

- A. CONCAT(inv\_amt, inv\_date) : requires explicit conversion
- B. inv\_date = '15-february-2008' : uses implicit conversion
- C. inv\_amt = '0255982' : requires explicit conversion
- D. inv\_no BETWEEN '101' AND '110' : uses implicit conversion
- E. inv\_date > '01-02-2008' : uses implicit conversion

**Answer: B,D**

#### NEW QUESTION # 64

Examine this statement which executes successfully:

```
CREATE view emp80 AS
```

```
SELECT
```

```
FROM employees
```

```
WHERE department_id = 80
```

```
WITH CHECK OPTION;
```

Which statement will violate the CHECK constraint?

- A. UPDATE emp80  
SET department\_id = 80;  
WHERE department\_id = 90;
- B. SELECT  
FROM emp80  
WHERE department\_id = 90;
- C. DELETE FROM emp80  
WHERE department\_id = 90;
- D. SELECT

```
FROM emp80
WHERE department_id = 80;
```

**Answer: C**

Explanation:

In Oracle SQL, the WITH CHECK OPTION clause in a CREATE VIEW statement ensures that all data manipulation statements performed through the view must conform to the view's defining query.

\* Option A: DELETE FROM emp80 WHERE department\_id = 90;

\* This will violate the CHECK constraint because the WHERE clause condition does not meet the view's restriction (department\_id = 80). This statement attempts to delete rows that the view is not supposed to have access to (since it should only include rows where department\_id is 80).

Options B, C, and D do not violate the CHECK constraint because:

\* Option B: A SELECT statement does not modify data, so it does not violate the CHECK OPTION.

\* Option C: Selecting rows with department\_id = 80 is consistent with the view's definition.

\* Option D: There is a syntax error, but assuming it meant to set department\_id to 80 where it is currently 90, it still would not violate the CHECK constraint because the CHECK OPTION on a view does not prevent updates that do not change the rows to fall outside the view's filter. However, since department\_id is supposed to be 80 as per the view definition, this update operation doesn't make logical sense, as there should be no rows with department\_id = 90 to update.

### NEW QUESTION # 65

View the Exhibit and examine the structure of the ORDERS table.

Which UPDATE statement is valid?

- A. UPDATE orders SET order\_date = TO\_DATE('12-mar-2007','dd-mon-yyyy'), SET order\_total = TO\_NUMBER(NULL) WHERE order\_id = 2455;
- B. UPDATE orders SET order\_date = '12-mar-2007', order\_total IS NULL WHERE order\_id = 2455;
- C. UPDATE orders SET order\_date = '12-mar-2007', AND order\_total = TO\_NUMBER(NULL) WHERE order\_id = 2455;
- D. UPDATE orders SET order\_date = '12-mar-2007', order\_total = NULL WHERE order\_id = 2455;

**Answer: D**

### NEW QUESTION # 66

.....

The system of 1z0-071 test guide will keep track of your learning progress in the whole course. Therefore, you can have 100% confidence in our 1z0-071 exam guide. According to our overall evaluation and research, seldom do we have cases that customers fail the 1z0-071 exam after using our study materials. But to relieve your doubts about failure in the test, we guarantee you a full refund from our company by virtue of the related proof of your report card. Of course you can freely change another 1z0-071 Exam Guide to prepare for the next exam. Generally speaking, our company takes account of every client's difficulties with fitting solutions.
