

Hot ACD201 Exam Collection Pdf Pass Certify | Reliable

New ACD201 Exam Bootcamp: Appian Senior Developer

Our ACD201 exam preparation materials are the hard-won fruit of our experts with their unswerving efforts in designing products and choosing test questions. Pass rate is what we care for preparing for an examination, which is the final goal of our ACD201 certification guide. According to the feedback of our users, we have the pass rate of 99%, which is equal to 100% in some sense. The high quality of our products also embodies in its short-time learning. You are only supposed to practice ACD201 Guide Torrent for about 20 to 30 hours before you are fully equipped to take part in the examination.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.
Topic 2	<ul style="list-style-type: none">Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.
Topic 3	<ul style="list-style-type: none">Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Topic 4	<ul style="list-style-type: none">Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.

New ACD201 Exam Bootcamp, ACD201 Latest Exam Forum

You don't need to worry about wasting your precious time but failing to get the ACD201 certification. Many people have used our study materials and the pass rate of the exam is 99%. This means as long as you learn with our study materials, you will pass the ACD201 exam without doubt. If any incident happens and you don't pass the ACD201 Exam, we will give you a full refund. Our sincerity stems from the good quality of our products. We will give you one year's free update of the exam study materials. Now just make up your mind and get your ACD201 exam torrent!

Appian Senior Developer Sample Questions (Q45-Q50):

NEW QUESTION # 45

Users are experiencing slow load times when retrieving customer records with many transactions.

After using performance monitoring tools, you discover that the following interface definition is responsible for the majority of page load time:

□ Additionally, both queries (rule!APP_GetTransactionsWithFilters and rule!

APP_GetTransactionTypeWithFilters) take approximately 25 milliseconds each to execute when you test them using the expression editor.

Which action would result in the greatest reduction in the load time for this interface component?

- **A. Prefetch transaction types and use the displayvalue() function to display the Transaction Type for each transaction.**
- B. Avoid fetching the total count when getting transactions.
- C. Use a synced record for Transactions to improve the query response time for the query performed on line 6.

Answer: A

Explanation:

Prefetching all transaction types once (instead of running a separate query for each row in the grid) and then using the displayvalue() function to display the corresponding transaction type name for each transaction will significantly reduce the number of queries executed. This eliminates the N+1 query problem and will greatly improve the interface load time.

NEW QUESTION # 46

An insurance application has a dashboard in which all the cases with "Accident" case type and "Health Insurance" insurance type are displayed to the user, using the following query:

□ You need to update the query entity to display all the cases that are "Accident" case type and "Health Insurance" insurance type, or created in the last ten days.

What is the right configuration for the logical expression?

- **A. ☐**
- B. ☐
- C. ☐

Answer: A

Explanation:

A filter for createdDate >= today() - 10 (records created in the last 10 days).

A nested AND logical expression that requires both caseType = "Accident" and insuranceType = "Health Insurance".

NEW QUESTION # 47

A process was recently pushed to the Prod environment. However, users are reporting that a task on this process is experiencing slow response times when they try to input data.

What is the most likely reason for this issue?

- **A. There are too many SAIL components on the task.**
- B. The process uses too many hidden variables.
- C. The task is assigned to too many users.
- D. Exception timers on tasks are set to values that are too low.

Answer: A

Explanation:

Having too many SAIL components on the task can cause slow response times for users, as the interface may take longer to render and process inputs, impacting performance.

NEW QUESTION # 48

The synced record Task has a self-referential relationship defined in the column parentTaskId. There is a many-to-one record relationship between the id and parentTaskId called parentTask.

For a given task ID, you need to return the task name and the parent task name.

What should you do?

- A. Create a sync-time custom record field on the Task record called parentName. Specify this field to return in the query field selection.
- **B. Use a!queryRecordType() with a filter on the task id, with fields specified to return recordType!Task.name and recordType!Task.parentTask.name.**
- C. Use a!queryRecordType() filtered on the task id once to return the task name and parent task ID. Query the record again to return the parent task name.

Answer: B

Explanation:

Using a!queryRecordType() with a filter on the task ID and specifying both recordType!Task.name and recordType!Task.parentTask.name in the fields will efficiently return both the task name and its parent task name in a single query.

NEW QUESTION # 49

You need to configure a process model that runs every day at 10:00 AM. The process should start only at the specified time even when a newer version of the process model is published.

A Boolean type constant needs to be configured in the process model. The intended flow of the process should be executed only when the constant is True.

Which three steps should you perform? (Choose three.)

- **A. Add an expression-based condition in the start node timer event to check for the specific time.**
- B. Add an expression-based condition in the start node timer event to check for the constant to be True.
- **C. Add a XOR Gateway just after the start node to check for the constant to be True.**
- **D. Add a timer event in the start node.**
- E. Add a timer event just after the start node to check for the specific time.

Answer: A,C,D

Explanation:

Add a timer event in the start node to schedule the process to start at 10:00 AM every day.

Add a XOR Gateway after the start node to check the Boolean constant and control the flow based on its value.

Add an expression-based condition in the start node timer event to ensure the process starts only at the specified time.

NEW QUESTION # 50

.....

If only you provide the scanning copy of the ACD201 failure marks we will refund you immediately. If you have any doubts about the refund or there are any problems happening in the process of refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions timely. We provide the best service and ACD201 Test Torrent to you to make you pass the exam fluently but if you fail in we will refund you in full and we won't let your money and time be wasted. Our questions and answers are based on the real exam and conform to the popular trend in the industry.
