PECB ISO-IEC-27001-Lead-Implementerテスト参考書 & ISO-IEC-27001-Lead-Implementer学習資料

あなたに最大の利便性を与えるために、Tech4Examは様々なバージョンの教材を用意しておきます。PDF版のISO-IEC-27001-Lead-Implementer問題集は読みやすく、忠実に試験の問題を再現することができます。テストエンジンとして、ソフトウェア版のISO-IEC-27001-Lead-Implementer問題集はあなたの試験の準備についての進捗状況をテストするために利用することができます。もし試験の準備を十分にしたかどうかを確認したいなら、ソフトウェア版のISO-IEC-27001-Lead-Implementer問題集を利用して自分のレベルをテストしてください。従って、すぐに自分の弱点や欠点を識別することができ、正しく次のISO-IEC-27001-Lead-Implementer学習内容を手配することもできます。

PECB Certified ISO/IEC 27001 Lead Implementer Exam 認定 ISO-IEC-27001-Lead-Implementer 試験問題 (Q163-Q168):

質問 # 163

Scenario 2: Beauty is a cosmetics company that has recently switched to an e-commerce model, leaving the traditional retail. The top management has decided to build their own custom platform in-house and outsource the payment process to an external provider

operating online payments systems that support online money transfers.

Due to this transformation of the business model, a number of security controls were implemented based on the identified threats and vulnerabilities associated to critical assets. To protect customers' information. Beauty's employees had to sign a confidentiality agreement. In addition, the company reviewed all user access rights so that only authorized personnel can have access to sensitive files and drafted a new segregation of duties chart.

However, the transition was difficult for the IT team, who had to deal with a security incident not long after transitioning to the e-commerce model. After investigating the incident, the team concluded that due to the out-of-date anti-malware software, an attacker gamed access to their files and exposed customers' information, including their names and home addresses.

The IT team decided to stop using the old anti-malware software and install a new one which would automatically remove malicious code in case of similar incidents. The new software was installed in every workstation within the company. After installing the new software, the team updated it with the latest malware definitions and enabled the automatic update feature to keep it up to date at all times. Additionally, they established an authentication process that requires a user identification and password when accessing sensitive information.

In addition, Beauty conducted a number of information security awareness sessions for the IT team and other employees that have access to confidential information in order to raise awareness on the importance of system and network security.

Based on the scenario above, answer the following question:

After investigating the incident, Beauty decided to install a new anti-malware software. What type of security control has been implemented in this case?

- A. Corrective
- B. Detective
- C. Preventive

正解: C

質問 # 164

Who should verify the effectiveness of the corrective actions taken by the auditee after an internal audit?

- A. The information security manager
- B. An Independent auditor should be contracted to perform this evaluation
- C. The internal auditor

正解: C

質問 # 165

Scenario 1: HealthGenic is a pediatric clinic that monitors the health and growth of individuals from infancy to early adulthood using a web-based medical software. The software is also used to schedule appointments, create customized medical reports, store patients' data and medical history, and communicate with all the [
