## What Will be the Result of Preparing with SAP C-S4EWM-2023 Practice Questions?

TestKingIT is a reliable and professional leader in developing and delivering authorized IT exam training for all the IT candidates.

We promise to give the most valid C-S4EWM-2023 exam dumps to all of our clients and make the SAP C-S4EWM-2023 exam training material highly beneficial for you. Before you buy our C-S4EWM-2023 exam torrent, you can free download the C-S4EWM-2023 Exam Demo to have a try. If you buy it, you will receive an email attached with C-S4EWM-2023 exam dumps instantly, then, you can start your study and prepare for C-S4EWM-2023 exam test. You will get a high score with the help of our SAP C-S4EWM-2023 practice training.

## **SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q76-Q81):**

### **NEW QUESTION # 76**

What do you control with an activity area? Note: There are 2 correct answers to this question.

- A. The size or volume of a warehouse order
- B. The doors that can be connected to a staging area
- C. The stock search sequence during warehouse task creation for picking
- D. The area in which a resource will work in the warehouse

**Answer: A,C**

### **NEW QUESTION # 77**

Your customer has two warehouse numbers that share the same physical yard. How do you set up the yard to enable yard management.

- A. Define a storage type for a yard in both warehouse numbers, and connect the two storage types with a common checkpoint.
- B. Define a storage type for a yard in one of the warehouse numbers, and connect the yard with doors to the other warehouse number.
- C. Define a storage type for a yard in each warehouse number, and connect the two storage types with doors to each other.
- D. Define a storage type for a yard in each warehouse number without any other settings.

**Answer: B**

Explanation:

To set up yard management for two warehouse numbers sharing the same physical yard:

\* B. Define a storage type for a yard in one of the warehouse numbers, and connect the yard with doors to the other warehouse number:

\* This setup ensures that yard management functionality is centrally configured while allowing goods movement between the warehouses through connected doors.

Incorrect Options:

\* A: Common checkpoints do not establish yard management connectivity.

\* C: Defining storage types without connections does not enable yard management.

\* D: Connecting storage types with doors to each other is not a standard configuration for yard management.

References:

\* SAP EWM Documentation: Yard Management Configuration

\* SAP Help Portal: Managing Shared Yards

### **NEW QUESTION # 78**

Which parameters can you use to create a filter at item level? Note: There are 3 correct answers to this question.

- A. Number of items
- B. Maximum weight
- C. Number of handling units
- D. Minimum volume
- E. Processing time

**Answer: B,C,E**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Item-level filters in SAP EWM are used to restrict warehouse tasks or orders based on specific criteria. Option A ("Maximum weight") is correct as it limits tasks by item weight, configured in warehouse order creation rules (WOCR) under SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Order > Define Filters. Option C ("Processing time") is correct because it filters based on estimated task duration. Option D ("Number of handling units") is correct as it restricts tasks by HU count. Option B ("Number of items") is not a standard filter parameter, and option E ("Minimum volume") is less commonly used compared to weight. These filters optimize task assignment and execution.

#### NEW QUESTION # 79

In process-oriented storage control, what can you use rule-based determination for?

- A. To determine the processing time
- B. To determine the HU type group
- **C. To determine the destination storage bin**
- D. To determine the warehouse process type

**Answer: C**

Explanation:

Rule-Based Determination in Process-Oriented Storage Control

\* Destination Storage Bin (B): Rules help determine the final storage bin for items during storage processes, ensuring proper stock placement.

Excluded Options

\* A (Processing Time): Processing time is not determined by storage control rules.

\* C (Warehouse Process Type): Process types are determined through other configurations, not rules in storage control.

\* D (HU Type Group): HU type group determination is independent of storage control rules.

SAP S/4HANA Cloud Private Edition Reference

\* Refer to Process-Oriented Storage Control Setup for rule-based configurations.

#### NEW QUESTION # 80

What is the purpose of the custodian in the warehouse setup?

- **A. The custodian processes stock without transfer of title**
- B. The custodian is used for the determination of the putaway strategy
- C. The custodian has the legal possession of the stock
- D. The custodian replaces the previously used Supply Chain Unit

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The custodian in SAP EWM manages stock ownership without title transfer, often in consignment scenarios. Option C ("The custodian processes stock without transfer of title") is correct, as defined in the stock attributes and configured in SPRO: SCM Extended Warehouse Management > Master Data > Define Custodian. Options A (putaway strategy), B (Supply Chain Unit), and D (legal possession) are incorrect as they misalign with the custodian's role, which is operational rather than strategic or legal.

#### NEW QUESTION # 81

.....

The SAP C-S4EWM-2023 exam questions in the web-based practice test are real and accurate. This SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C-S4EWM-2023) practice exam is compatible with Mac, Linux, iOS, Android, and Windows.
