Microsoft Information Protection Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

You have a Microsoft 365 subscription that contains a Microsoft SharePoint site named Site1. For Site1, users are assigned the roles shown in the following table.

Name	Role
User1	Owner
User2	Member

You publish retention labels to Site1 as shown in the following table.

Name	Retention period	During the retention period
Retention1	5 years	Mark items as a record
Retention2	5 years	Mark items as a regulatory record

You publish retention labels to Site1 as shown in the following table.

You have the files shown in the following table.

Name	Applied retention label
File1	Retention1
File2	Retention2

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can delete File2.	<input type="radio"/>	<input type="radio"/>
User2 can rename File1.	<input type="radio"/>	<input type="radio"/>
User1 can apply Retention2 to File1.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 can delete File2.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can rename File1.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can apply Retention2 to File1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 41

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

Name	Type
Group1	Microsoft 365
Group2	Security

The subscription contains the resources shown in the following table.

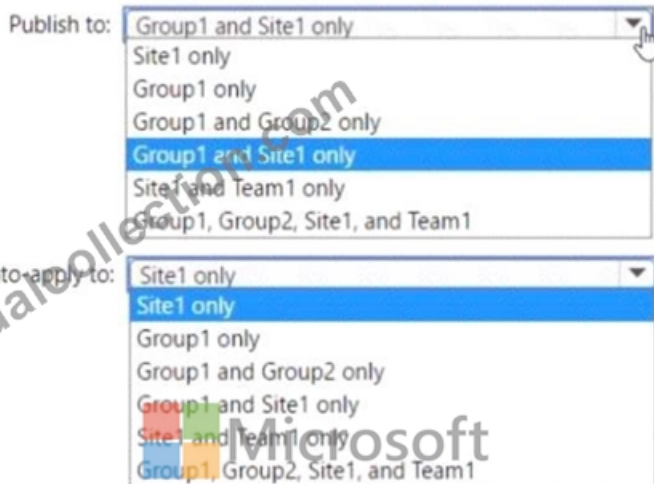

Name	Type
Site1	Microsoft SharePoint Online site
Team1	Microsoft Teams team

You create a sensitivity label named Label 1.

You need to publish Label 1 and have the label apply automatically.

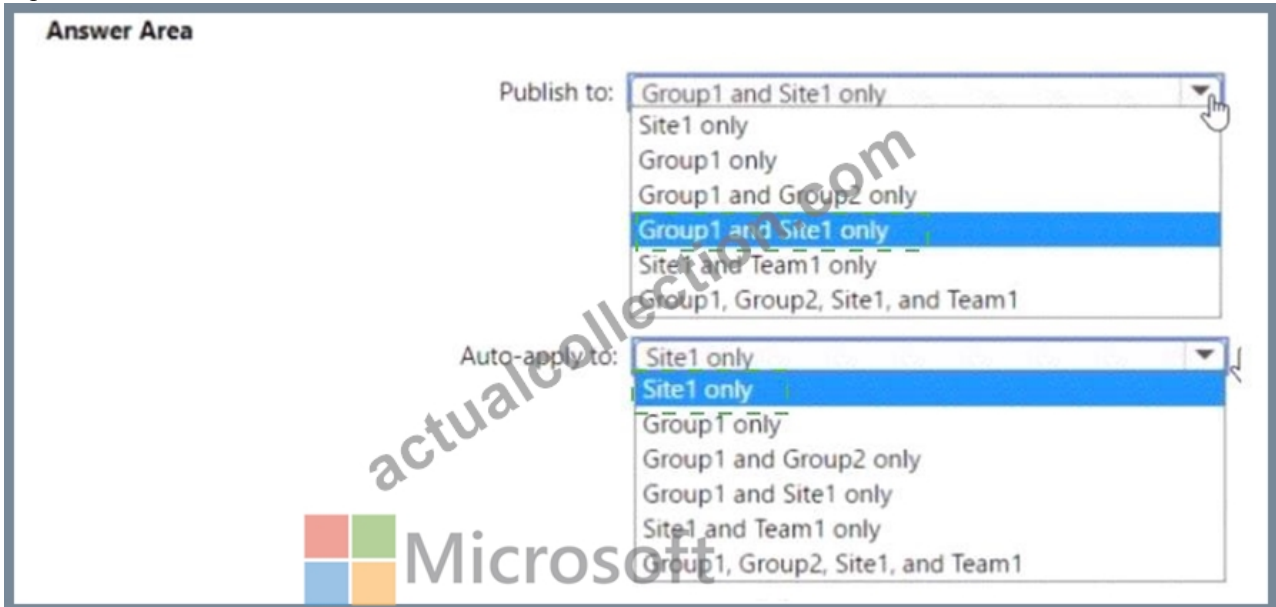

To what can you publish Label 1, and to what can Label 1 be auto-applied? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 42

You have a Microsoft 365 E5 subscription that contains a user named User1.

You need to ensure that User1 can perform the following tasks:

- * View the Privacy risk management Data profile page and subject rights request reports.
- * Add approvers for subject rights requests.

The solution must follow the principle of least privilege.

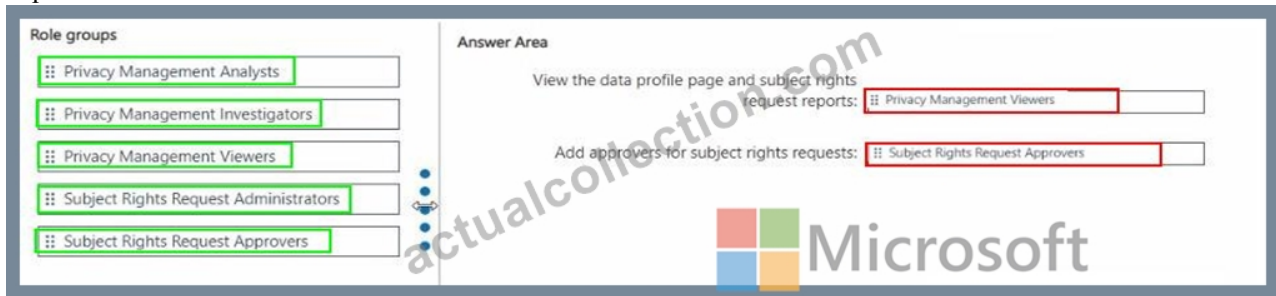

To which role group should you add User1 for each task? To answer, drag the appropriate role groups to the correct tasks. Each role group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 43

You are implementing a data classification solution.

The research department at your company requires that documents containing programming code be labeled as Confidential. The department provides samples of the code from its document library. The solution must minimize administrative effort. What should you do?

- A. Create a sensitive info type that uses a regular expression.
- **B. Use the source code classifier.**
- C. Create a custom classifier.
- D. Create a sensitive info type that uses Exact Data Match (EDM).

Answer: B

NEW QUESTION # 44

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a file policy in Microsoft Cloud App Security.

You need to configure the policy to apply to all files. Alerts must be sent to every file owner who is affected by the policy. The policy must scan for credit card numbers, and alerts must be sent to the Microsoft Teams site of the affected department.

Solution: You use the Data Classification service inspection method and send alerts to Microsoft Power Automate.

Does this meet the goal?

- **A. No**
- B. Yes

Answer: A

Explanation:
