Pass Guaranteed Quiz 2023 Salesforce Advanced-Administrator: Salesforce Certified Advanced Administrator Newest 100% Correct Answers

2023 Latest PrepKorGide Advanced Administrator PDF Dumps and Advanced Administrator Exam Engine Free Share: <https://drive.google.com/file/d/1R5yzujpXi-vF4sCGBZuqb5JxI2HWAEZI/view?usp=sharing>

When we are in some kind of learning web site, often find it boring, but some web page design is not reasonable, and too much information all right, it will appear suddenly. Believe it or not, we face the more intense society, and we should prevent our competitiveness and get a Advanced Administrator certification to make our dream come true. Although it is not an easy thing to achieve it, since you choose our Advanced Administrator prepare format, we will send the new updates for one year long, which is new enough for deal with the exam for you and guide you through difficulties in your exam preparation.

PrepKorGide's providing training materials is very close to the nature of the formal examination. Through our short-term special training you can quickly grasp IT professional knowledge, and then take a good preparation for your exam. We promise that we will do our best to help you pass the Salesforce Certified Advanced Administrator Exam.

100% Pass Quiz Reliable Salesforce - Advanced-Administrator - 100% Salesforce Certified Advanced Administrator Correct Answers

Salesforce certification Advanced Administrator exam has become a very popular test in the IT industry not in order to get the salary you have to fight a lot of time and effort to master relevant IT professional knowledge. In such a time to be professional society, come to study. PrepKorGide, New Download Our 2023 Salesforce Advanced Administrator: Salesforce Certified Advanced Administrator Newest 100% Correct Answers

BONUS!!! Download part of TopExamCollection Analytics-Con-301 dumps for free: <https://drive.google.com/open?id=1R5yzujpXi-vF4sCGBZuqb5JxI2HWAEZI>

According to the needs of all people, the experts and professors in our company designed three different versions of the Analytics-Con-301 certification training dumps for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the Analytics-Con-301 Training Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the Analytics-Con-301 latest questions to preparing for your coming exam.

Salesforce Analytics-Con-301 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Data Visualization: This section evaluates the Tableau Consultant's ability to design effective visual analytics solutions. It involves creating dashboards and visual reports that enhance user understanding, employing techniques like dynamic actions and advanced chart types, and ensuring performance optimization for an interactive user experience. |

| | |
|---------|---|
| Topic 2 | <ul style="list-style-type: none"> • Business Analysis: This section of the exam measures skills of Tableau Consultants focusing on evaluating the current state of analytics within an organization. It covers mapping business needs to Tableau capabilities, translating analytical requirements to best practices in Tableau, and recommending appropriate deployment options like Tableau Server or Tableau Cloud. It also includes evaluating existing data structures for supporting business needs and identifying performance risks and opportunities. |
| Topic 3 | <ul style="list-style-type: none"> • Data Management: This part focuses on establishing governance and support for published content. Tableau Consultants are expected to manage data security, publish and maintain data sources and workbooks, and oversee content access. It includes applying governance best practices, using metadata APIs, and supporting administration functions to maintain data integrity and accessibility. |
| Topic 4 | <ul style="list-style-type: none"> • IT Management: This domain measures skills related to managing Tableau environments. It includes planning server upgrades, recommending deployment solutions (on-premise or cloud), and ensuring alignment between technical and business requirements for analytics infrastructure. It also involves troubleshooting and optimizing system performance relevant to Tableau Server and Cloud deployments. |
| Topic 5 | <ul style="list-style-type: none"> • Business Consulting: For Tableau Consultants, this section involves designing and troubleshooting calculations and workbooks to meet advanced analytical use cases. It covers selecting appropriate chart types, applying Tableau's order of operations in calculations, building interactivity into dashboards, and optimizing workbook performance by resolving resource-intensive queries and other design-related issues. |

Analytics-Con-301 Valid Exam Answers - Analytics-Con-301 Exam Prep

This Salesforce braindump study package contains Analytics-Con-301 latest questions and answers from the real Analytics-Con-301 exam. These questions and answers are verified by a team of professionals and the content of this Analytics-Con-301 braindump is taken from the real exam. Since we are 100% sure of the content we provide a Money Back Guarantee offer! We believe that Analytics-Con-301 Braindumps can help you pass your Analytics-Con-301 exam with minimal effort.

Salesforce Certified Tableau Consultant Sample Questions (Q18-Q23):

NEW QUESTION # 18

A client has a database that stores widget inventory by day and it is updated on a nonstandard schedule as shown below.

They want a data visualization that shows widget inventory daily, however their business unit does not have the ability to modify the data warehouse structure.

What should the client do to achieve the desired result?

- A. Update the Widget Inventory Table to be a daily snapshot.
- B. Use Tableau Desktop to visualize null values.
- **C. Use Tableau Prep to add new rows.**
- D. Create a temporary table in the database.

Answer: C

Explanation:

For a client who needs a daily visualization of widget inventory but cannot modify the data warehouse structure, the best approach is to use Tableau Prep to add new rows. Tableau Prep can be used to manipulate the existing dataset by adding missing date entries and appropriately adjusting inventory counts based on available data. This allows the creation of a complete daily snapshot for visualization without needing changes to the underlying database structure.

NEW QUESTION # 19

A client is using the Tableau Content Migration Tool to move content from an old Tableau Server to a new Tableau Server. Which content will need to be moved using a different tool or process?

- A. Published data sources that use extracts

- B. Published data sources that use live connections
- **C. Tableau Prep flows**
- D. Workbooks

Answer: C

Explanation:

When migrating content between Tableau servers, certain types of content may require special consideration or different tools for migration:

Tableau Prep Flows: These are specific to Tableau Prep and are not included in the standard content migration capabilities of the Tableau Content Migration Tool. Tableau Prep flows often require separate processes for migration due to their distinct setup and integration with data sources and workflows.

Published Data Sources and Workbooks: These can typically be migrated directly using the Tableau Content Migration Tool, which supports moving published data sources (both live connections and extracts) and workbooks without requiring additional tools.

References:

Tableau Help and Support: Offers comprehensive tutorials and guidelines on using different tools for migrating various types of content, including the specific requirements for migrating Tableau Prep flows which are not covered by the standard content migration tool.

NEW QUESTION # 20

A consultant is designing a dashboard that will be consumed on desktops, tablets, and phones. The consultant needs to implement a dashboard design that provides the best user experience across all the platforms.

Which approach should the consultant take to achieve these results?

- A. Build one dashboard and fix the size of the dashboard.
- B. Build one dashboard and set the size to Automatic.
- C. Build one dashboard for each type of device and fix the size of the layouts.
- **D. Build one dashboard that has desktop, tablet, and phone layouts, and fix the size of the layouts.**

Answer: D

Explanation:

For a consultant designing a dashboard to be consumed across multiple device types, the best approach is:

* Multi-device Layout: Tableau provides the capability to design device-specific layouts within a single dashboard. This feature allows the dashboard to adapt its layout to best fit the screen size and orientation of desktops, tablets, and phones.

* Fixed Size Layouts: By fixing the size of each layout, the consultant can ensure that the dashboard appears consistent and maintains the intended design elements and user experience across devices.

Fixed sizes prevent components from resizing in ways that could disrupt the dashboard's readability or functionality.

* Implementation: In Tableau, you can create these layouts by selecting 'Device Preview' and adding custom layouts for each device type. Here, you define the dimensions and the positioning of sheets and controls tailored to each device's typical viewing mode.

References

This approach leverages Tableau's device designer capabilities, which are specifically designed to optimize dashboards for multiple viewing environments, ensuring a seamless user experience regardless of the device used. This functionality is well documented in Tableau's official guides on creating and managing device-specific dashboards.

NEW QUESTION # 21

A client wants to provide sales users with the ability to perform the following tasks:

- * Access published visualizations and published data sources outside the company network.
- * Edit existing visualizations.
- * Create new visualizations based on published data sources.
- * Minimize licensing costs.

Which site role should the client assign to the sales users?

- A. Creator
- B. Viewer
- **C. Explorer (can publish)**
- D. Site Administrator

Answer: C

Explanation:

The Explorer (can publish) site role in Tableau is designed for users who need to access, edit, and create visualizations based on published data sources, even when they are outside the company network. This role allows users to perform web editing and save their work, making it suitable for sales users who need these capabilities. It is also a cost-effective option as it does not require the full capabilities and associated costs of the Creator license.

References: The information about the Explorer (can publish) role and its capabilities can be found in the official Tableau documentation on site roles and permissions¹². This role is appropriate for users who need to interact with published content and create new visualizations without the need for full site administration or advanced content creation tools that come with the Creator role³.

NEW QUESTION # 22

A client is working in Tableau Prep and has a field named OrderId that is compiled by country, year, and an order number as shown in the following table.

What should the consultant use to transform the table in the most efficient manner?

- A. The Aliases option
- B. A calculated field that uses the TRIM function
- C. The Split option
- D. A calculated field that uses the LEFT function

Answer: C

Explanation:

To transform the OrderId field in Tableau Prep, the Split option is the most efficient and straightforward method. Here's how you can apply it:

In Tableau Prep, drag your dataset into the flow.

Click on the OrderId field in the workspace to select it.

Look for the option in the toolbar that says "Split" and select it.

Choose "Automatic Split" if the delimiters (such as hyphens) are consistent; Tableau Prep should automatically detect the hyphen as the delimiter and split the OrderId into multiple new fields.

The dataset should now show new columns: one for the country code (CA, FR, US), one for the year (2017), and one for the order number (152156, 152157, etc.).

The Split option works effectively here because it automatically identifies and uses the hyphen as the delimiter to divide the original OrderId into the desired components without manual specification of conditions or writing any formulas.

References

This procedure is based on the standard functionalities provided in Tableau Prep for splitting a field into multiple columns based on a delimiter, as described in the Tableau Prep user guide.

NEW QUESTION # 23

.....

Our Analytics-Con-301 real quiz boosts 3 versions: the PDF, the Software and the APP online which will satisfy our customers by their varied functions to make you learn comprehensively and efficiently. The learning of our Analytics-Con-301 study materials costs you little time and energy and we update them frequently. We can claim that you will be ready to write your exam after studying with our Analytics-Con-301 Exam Guide for 20 to 30 hours. To understand our Analytics-Con-301 learning questions in detail, just come and try!
