Trustable Veeam VMCE_v12 Valid Dumps Sheet and the Best Accurate Certification VMCE_v12 Torrent

According to various predispositions of exam candidates, we made three versions of our VMCE_v12 study materials for your reference: the PDF, Software and APP online. And the content of them is the same though the displays are different. Untenable materials may waste your time and energy during preparation process. But our VMCE_v12 Practice Braindumps are the leader in

the market for ten years. As long as you try our VMCE_v12 exam questions, we believe you will fall in love with it.

Veeam Certified Engineer v12 Sample Questions (Q115-Q120):

NEW QUESTION # 115
A customer's NAS has multiple hardware failures, and the NAS is no longer accessible. All of the users are impacted as they need to access the NAS for day-to-day work.
Which restore method could minimize the service impact to the users?

- A. Restore of the entire file share
- B. Rollback to a point in time
- C. Restore of files and folders
- D. Instant file share recovery

Answer: D

Explanation:
Instant file share recovery is the most effective method to minimize service impact in this scenario. This feature allows users to instantly access the NAS data directly from the backup files without having to wait for the entire file share to be restored. This approach is beneficial when quick access to data is crucial.References:

NEW QUESTION # 116
An administrator needs to dynamically add VMware VMs that have a custom application installed to a backup job, and also require an RPO of eight hours. How can this job be created?

- A. Modify a custom CSV file to be scanned before the start of each job.
- B. In Enterprise Manager, create a dynamic group of VMs that contain both tags.
- C. Use the REST API to scan the VM inventory for machines that match the criteria.
- D. Create a backup job based on vSphere tags.

Answer: D

NEW QUESTION # 117
A Veeam administrator is creating a protection group that needs to back up all servers for the accounting department using Veeam Agent for Microsoft Windows. New accounting servers must be automatically added to the protection group. How is this accomplished?

- A. Create an Active Directory based protection group targeted at an Active Directory security group.
- B. Create a protection group that reads a .csv file listing the accounting servers.
- C. Create a protection group and set it to automatically scan every three hours for new servers.
- D. Install a configuration file on each of the accounting servers that adds it to the protection group.

Answer: A

NEW QUESTION # 118
The compliance team is requesting a Veeam engineer complete the following tasks on the backup environment:
1. All image-level backups are to be tested and validated
2. Recovery verification with a well-known malware scan
3. Send an email to the Veeam engineer with test results
What is the recovery verification function to meet this requirement?

- A. SureReplica
- B. Quick Migration
- C. On-Demand Sandbox
- D. SureBackup

Answer: D

Explanation:
SureBackup is the Veeam technology that allows you to verify the recoverability of backups. It can automatically verify the integrity of the backup, test it for malware (with the aid of third-party antivirus software), and send email notifications upon the completion of the job. This is accomplished by running the backups in an isolated environment called a Virtual Lab, without making any changes to the actual production environment. By using SureBackup, Veeam engineers can ensure that image-level backups are recoverable, can be verified against malware, and can report the results via email, thus meeting the compliance team's requests.

NEW QUESTION # 119
Which of the following can help reduce the amount of traffic that is sent over the network during the second run of a replication job?

- A. Re-IP rules
- B. Replica seeding
- C. Replica mapping
- D. WAN acceleration for replicas

Answer: B
