Easiest and Quick Way to Pass EXIN CDCP Exam

If you want to enjoy the real exam environment, the software version of our CDCP exam questions will help you solve your problem, because the software version of our CDCP test torrent can simulate the real exam environment. The CDCP study materials from our company can help you get your certification easily, and if you use our CDCP Study Materials, it will be very easy for you to save a lot of time, we believe our CDCP learning guide will be the most suitable choice for you,

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q40-Q45):

NEW QUESTION # 40
The three elements of the fire triangle are,and. (Choose three.)

- A. Water
- B. Oxygen
- C. Heat
- D. Earth

- E. Fuel

Answer: B,C,E

Explanation:
The fire triangle is a simple model that illustrates the three elements that a fire needs to ignite and sustain:
oxygen, heat, and fuel. Oxygen is the oxidizing agent that enables the combustion reaction, heat is the energy source that raises the temperature of the fuel to its ignition point, and fuel is the material that reacts with oxygen and releases heat and light. Removing any one of these elements can extinguish a fire. For example, water can reduce the heat and the oxygen, sand or soil can smother the fuel and the oxygen, and fire extinguishers can displace the oxygen or lower the temperature.

NEW QUESTION # 41
What is the main advantage of busbar trunking compared to stand electrical cabling?

- A. Busbar trunking is less expensive.
- B. Busbar trunking can be located both overhead and under the raised floor.
- C. Busbar trunking allows for flexibility.
- D. Busbar trunking has a fixed power rating.

Answer: C

Explanation:
Busbar trunking systems are a method of power distribution using rigid copper or aluminium conductors to distribute the power around a building. Busbar trunking systems have many advantages over cables, such as lower space requirements, higher short-circuit strength, lower fire load, and easier installation. One of the main advantages of busbar trunking is that it allows for flexibility in terms of power transmission and distribution. Busbar trunking systems can be easily relocated, modified, or expanded to accommodate changes in the building layout or load demand. Busbar trunking systems can also be fitted with various components, such as tap-off units, elbows, tees, and end feed units, to provide power to different locations and consumers.
Busbar trunking systems can also be installed both overhead and under the raised floor, depending on the design and preference of the building.

NEW QUESTION # 42
The termination of the ability of a product to perform its required function can be defined as.

- A. Obstacle
- B. Failure
- C. Termination
- D. Hindrance

Answer: B

Explanation:
According to the EPI Data Centre Professional (CDCP®) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors, environmental factors, or external events.
Failure can affect the availability, reliability, and performance of a product, system, or service.

NEW QUESTION # 43
Which one of the following does a Physical Infrastructure consists of in a Data Centre?

- A. Server

- B. Switch
- C. Hub
- D. Rack

Answer: D

Explanation:
A physical infrastructure in a Data Center consists of racks, which are metal frames used to store and organize server and other IT equipment. The racks are usually arranged in rows and columns, and they can be used to hold servers, storage devices, and other pieces of IT equipment. The racks can also be used to organize cables and other components to ensure that the Data Center is kept organized and efficient.

NEW QUESTION # 44
Which one of the following is used in Measuring Business Value?

- A. Upfront Cost
- B. Regeneration Cost
- C. Scalability
- D. Reliability

Answer: C

Explanation:
Measuring business value is the process of assessing the benefits and costs of IT investments and initiatives in relation to the strategic objectives and priorities of the organization. One of the factors that can be used to measure business value is scalability, which is the ability of a system or component to handle increasing workloads or demands without compromising performance, quality, or functionality. Scalability is important for business value because it enables the organization to adapt to changing market conditions, customer expectations, and growth opportunities. Scalability can also reduce operational costs, increase efficiency, and improve customer satisfaction. Therefore, scalability is one of the factors that can be used in measuring business value.
