

NSE7_SSE_AD-25 Exam Guide Materials | NSE7_SSE_AD-25 New Braindumps Sheet

STANDARD SEVEN MOCK EXAM

NON SOLVED AND SOLVED

P.S. Free 2026 Fortinet NSE7_SSE_AD-25 dumps are available on Google Drive shared by TorrentValid:
<https://drive.google.com/open?id=1BXZEY71qvZvnhaGzTabiuJqPC-tuNP3Y>

Good news comes that our company has successfully launched the new version of the NSE7_SSE_AD-25 Guide tests. Perhaps you are deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our NSE7_SSE_AD-25 actual test. That is to say, if you decide to choose our study materials, you will pass your exam at your first attempt. Not only that, we also provide all candidates with free demo to check our product, it is believed that our free demo will completely conquer you after trying.

If your job is very busy and there is not much time to specialize, and you are very eager to get a NSE7_SSE_AD-25 certificate to prove yourself, it is very important to choose a very high NSE7_SSE_AD-25 learning materials like ours that passes the rate. I know that the 99% pass rate of our NSE7_SSE_AD-25 Exam simulating must have attracted you. Do not hesitate anymore. You will never regret buying our NSE7_SSE_AD-25 study engine!

Online Fortinet NSE7_SSE_AD-25 Practice Test Engine & Evaluate Yourself

As a brand in the field, our NSE7_SSE_AD-25 exam questions are famous for their different and effective advantages. Our professional experts have developed our NSE7_SSE_AD-25 study materials to the best. So if you buy them, you will find that our NSE7_SSE_AD-25 learning braindumps are simply unmatched in their utility and perfection. Our huge clientele is immensely satisfied with our product and the excellent passing rate of our NSE7_SSE_AD-25 simulating exam is the best evidence on it.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which two are required to enable central management on FortiSASE? (Choose two.)

- A. FortiSASE connector configured on FortiManager.
- B. The FortiManager IP address in the FortiSASE central management configuration.
- C. FortiManager and FortiSASE registered under the same FortiCloud account.
- D. FortiSASE central management entitlement applied to FortiManager.

Answer: A,C

Explanation:

To enable central management, FortiManager must have a FortiSASE connector configured, and both FortiSASE and FortiManager must be registered under the same FortiCloud account to establish trust and synchronization.

NEW QUESTION # 32

Refer to the exhibits.

WiMO-Pro and Win7-Pro are endpoints from the same remote location. WiMO-Pro can access the internet through FortiSASE, while Win7-Pro can no longer access the internet. Given the exhibits, which reason explains the outage on Win7-Pro?

- A. The Win7-Pro FortiClient version does not match the FortiSASE endpoint requirement.
- B. Win7-Pro cannot reach the FortiSASE SSL VPN gateway.
- C. The Win7-Pro device posture has changed.
- D. Win-7 Pro has exceeded the total vulnerability detected threshold.

Answer: D

Explanation:

Based on the provided exhibits, the reason why the Win7-Pro endpoint can no longer access the internet through FortiSASE is due to exceeding the total vulnerability detected threshold. This threshold is used to determine if a device is compliant with the security requirements to access the network.

* Endpoint Compliance:

* FortiSASE monitors endpoint compliance by assessing various security parameters, including the number of vulnerabilities detected on the device.

* The compliance status is indicated by the ZTNA tags and the vulnerabilities detected.

* Vulnerability Threshold:

* The exhibit shows that Win7-Pro has 176 vulnerabilities detected, whereas Win10-Pro has 140 vulnerabilities.

* If the endpoint exceeds a predefined vulnerability threshold, it may be restricted from accessing the network to ensure overall network security.

* Impact on Network Access:

* Since Win7-Pro has exceeded the vulnerability threshold, it is marked as non-compliant and subsequently loses internet access through FortiSASE.

* The FortiSASE endpoint profile enforces this compliance check to prevent potentially vulnerable devices from accessing the internet.

References:

FortiOS 7.6 Administration Guide: Provides information on endpoint compliance and vulnerability management.

FortiSASE 23.2 Documentation: Explains how vulnerability thresholds are used to determine endpoint compliance and access control.

NEW QUESTION # 33

Refer to the exhibit. A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.

In this scenario, which two setups will achieve these requirements? (Choose two.)

- A. Configure private access policies on FortiSASE with ZTNA.
- B. Configure ZTNA tags on FortiGate.
- C. Configure ZTNA servers and ZTNA policies on FortiGate.
- D. Configure FortiGate as a zero trust network access (ZTNA) access proxy.

Answer: C,D

Explanation:

To enforce device posture checks and ensure that TCP traffic flows through FortiGate, the FortiGate must act as a ZTNA access

proxy and host the ZTNA servers and policies. This setup allows posture validation via FortiSASE while routing traffic securely to protected servers through FortiGate.

NEW QUESTION # 34

Which information can an administrator monitor using reports generated on FortiSASE?

- A. sanctioned and unsanctioned Software-as-a-Service (SaaS) applications usage
- B. SD-WAN performance
- C. FortiSASE administrator and system events
- D. FortiClient vulnerability assessment

Answer: A

Explanation:

FortiSASE reporting provides visibility into the usage of sanctioned and unsanctioned SaaS applications, enabling administrators to monitor cloud application activity and enforce security policies.

NEW QUESTION # 35

Which two additional components does FortiSASE use for application control to act as an inline-CASB?
(Choose two.)

- A. DNS filter
- B. intrusion prevention system (IPS)
- C. Web filter with inline-CASB
- D. SSL deep inspection

Answer: C,D

Explanation:

FortiSASE uses the following components for application control to act as an inline-CASB (Cloud Access Security Broker):

* SSL Deep Inspection:

* SSL deep inspection is essential for decrypting and inspecting HTTPS traffic to identify and control applications and data transfers within encrypted traffic.

* This allows FortiSASE to enforce security policies on SSL/TLS encrypted traffic, providing visibility and control over cloud applications.

* Web Filter with Inline-CASB:

* The web filter component integrates with inline-CASB to monitor and control access to cloud applications based on predefined security policies.

* This combination provides granular control over cloud application usage, ensuring compliance with security policies and preventing unauthorized data transfers.

References:

FortiOS 7.6 Administration Guide: Details on SSL deep inspection and web filtering configurations.

FortiSASE 23.2 Documentation: Explains how FortiSASE acts as an inline-CASB using SSL deep inspection and web filtering.

NEW QUESTION # 36

.....

Life will always face a lot of choices. When we choose to work, we will also be selected by the job in reverse. And today, in an era of fierce competition, how can we occupy a place in a market where talent is saturated? The answer is a certificate. What the certificate main? All kinds of the test Fortinet certification, prove you through all kinds of qualification certificate, it is not hard to find, more and more people are willing to invest time and effort on the NSE7_SSE_AD-25 Study Materials, because get the test NSE7_SSE_AD-25 certification is not an easy thing, so, a lot of people are looking for an efficient learning method. And here, fortunately, you have found the NSE7_SSE_AD-25 study materials, a learning platform that can bring you unexpected experiences.
