Take the right decision regarding your quick Red Hat Certified Specialist in OpenShift Administration exam (EX280) exam questions preparation and download the real, valid, and updated RedHat EX280 exam dumps and start this journey.

RedHat Red Hat Certified Specialist in OpenShift Administration exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Configure project permissions

Configure your OpenShift cluster to meet the following requirements: The following projects exist:

apollo manhattan gemini bluebook titan

The user account armstrong is an administrator for project apollo and project gemini The user account wozniak can view project titan but not administer or delete it

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc new-project apollo
```

```
$ oc new-project manhattan
```

```
$ oc new-project gemini
```

```
$ oc new-project bluebook
```

```
$ oc new-project titan
```

```
$ oc adm policy add-role-to-user admin armstrong -n apollo
```

```
$ oc adm policy add-role-to-user admin armstrong -n gemini
```

```
$ oc adm policy add-role-to-user view wozniak -n titan
```

NEW QUESTION # 12

Configure quotas

Configure your OpenShift cluster to use quotas in the manhattan project with the following requirements:

The name of the ResourceQuota resource is: ex280-quota

The amount of memory consumed across all containers may not exceed 1Gi

The total amount of CPU usage consumed across all containers may not exceed

2 full cores

The maximum number of replication controllers does not exceed 3 The maximum number of pods does not exceed 3 The maximum number of services does not exceed 6

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project manhattan
```

```
$ oc create quota ex280-quota -- hard=memory=1Gi,cpu=2,pods=3,services=6,replicationcontrollers=3
```

```
$ oc get resourcequota
```

NEW QUESTION # 13

Use Secret in Monday Project

Task information Details:

Use the secret created earlier as environment variables in deployment monday .

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Switch to the correct project if needed:

```
oc project monday
```

* Inject environment variables from the secret:

```
oc set env deployment/monday --from=secret/magic
```

* Verify:

```
oc set env deployment/monday --list
```

oc describe deployment monday

Notes:

* The uploaded lab references secret/file-secret, but Task 8 clearly intends the secret to be named magic .

* In a real exam, match the actual secret name present in the cluster.

This task tests secret consumption by workloads through environment variable injection.

NEW QUESTION # 14

Create a PV and PVC

Task information Details:

Create a PersistentVolume named landing-pv with 1Gi , ReadOnlyMany , NFS backend, and Retain reclaim policy.

Create a PersistentVolumeClaim named landing-pvc requesting 1Gi , ReadOnlyMany , and storage class nfs2 .

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Solution:

* Create landing-pv.yaml:

```
apiVersion: v1
```

```
kind: PersistentVolume
```

```
metadata:
```

```
name: landing-pv
```

```
spec:
```

```
capacity:
```

```
storage: 1Gi
```

```
accessModes:
```

```
- ReadOnlyMany
```

```
nfs:
```

```
path: /open001
```

```
server: 192.168.2.2
```

```
persistentVolumeReclaimPolicy: Retain
```

* Apply it:

```
oc apply -f landing-pv.yaml
```

* Create landing-pvc.yaml:

```
apiVersion: v1
```

```
kind: PersistentVolumeClaim
```

```
metadata:
```

```
name: landing-pvc
```

```
spec:
```

```
accessModes:
```

```
- ReadOnlyMany
```

```
resources:
```

```
requests:
```

```
storage: 1Gi
```

```
storageClassName: nfs2
```

* Apply it:

```
oc apply -f landing-pvc.yaml
```

* Verify:

```
oc get pv
```

```
oc get pvc
```

```
oc describe pv landing-pv
```

```
oc describe pvc landing-pvc
```

This task validates persistent storage provisioning and claim binding concepts.

NEW QUESTION # 15

Create Resource Quota for Project Rocky
