Reliable FCSS_SASE_AD-25 Test Pass4sure - Latest FCSS_SASE_AD-25 Test Fee

FCSS - FortiSASE 25 Administrator FCSS_SASE_AD-25 answers real questions can help candidates have correct directions and prevent useless effort. If you still lack of confidence in preparing your exam, choosing a good Fortinet FCSS_SASE_AD-25

Answers Real Questions will be a wise decision for you, it is also an economical method which is saving time, money and energy.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.
Topic 2	<ul style="list-style-type: none">• Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.
Topic 3	<ul style="list-style-type: none">• SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Topic 4	<ul style="list-style-type: none">• Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

How does FortiSASE hide user information when viewing and analyzing logs?

- A. By encrypting data using Secure Hash Algorithm 256-bit (SHA-256)
- B. By hashing data using Blowfish
- C. By encrypting data using advanced encryption standard (AES)
- **D. By hashing data using salt**

Answer: D

Explanation:

FortiSASE hides user information when viewing and analyzing logs by hashing data using salt. This approach ensures that sensitive user information is obfuscated, enhancing privacy and security.

Hashing Data with Salt:

Hashing data involves converting it into a fixed-size string of characters, which is typically a hash value.

Salting adds random data to the input of the hash function, ensuring that even identical inputs produce different hash values.

This method provides enhanced security by making it more difficult to reverse-engineer the original data from the hash value.

Security and Privacy:

Using salted hashes ensures that user information remains secure and private when stored or analyzed in logs.

This technique is widely used in security systems to protect sensitive data from unauthorized access.

FortiOS 7.2 Administration Guide: Provides information on log management and data protection techniques.

FortiSASE 23.2 Documentation: Details on how FortiSASE implements data hashing and salting to secure user information in logs.

NEW QUESTION # 43

Refer to the exhibit.

The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

- A. Certificate inspection is not being used to scan application traffic.
- B. Deep inspection is not being used to scan traffic.
- C. The inline-CASB application control profile does not have application categories set to Monitor.
- D. The private access policy must be to set to log Security Events.

Answer: A,B

NEW QUESTION # 44

Which two settings are automatically pushed from FortiSASE to FortiClient in a new FortiSASE deployment with default settings? (Choose two.)

- A. zero trust network access (ZTNA) tags
- B. tunnel profile
- C. FortiSASE certificate authority (CA) certificate
- D. real-time protection

Answer: B,C

Explanation:

In a default FortiSASE deployment, the tunnel profile (for secure connectivity) and the FortiSASE CA certificate (for SSL inspection and trusted communication) are automatically pushed to FortiClient endpoints.

NEW QUESTION # 45

Refer to the exhibits.

A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>. Which configuration on FortiSASE is allowing users to perform the download?

- A. Intrusion prevention is disabled.
- B. Deep inspection is not enabled.
- C. Application control is exempting all the browser traffic.
- D. Web filter is allowing the URL.

Answer: B

Explanation:

The SSL inspection mode is set to certificate inspection, which only inspects SSL/TLS headers and does not allow full scanning of encrypted content. Without full (deep) inspection, the antivirus profile cannot scan or block malicious files (like eicar.com-zip) delivered over HTTPS, allowing the download to proceed.

NEW QUESTION # 46

Refer to the exhibit.

The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

- A. Certificate inspection is not being used to scan application traffic.
- B. Deep inspection is not being used to scan traffic.
- C. The inline-CASB application control profile does not have application categories set to Monitor.
- D. The private access policy must be to set to log Security Events.

Answer: A,B

NEW QUESTION # 47
