Start Exam Preparation with Actual4test 300-435 Practice Questions

If you prepare well in advance, you'll be stress-free on the Automating and Programming Cisco Enterprise Solutions 300-435 exam day and thus perform well. Candidates can know where they stand by attempting the Cisco 300-435 practice test. It can save you lots of time and money. The question on the Cisco 300-435 Practice Test is quite similar to the Cisco 300-435 questions that get asked on the 300-435 exam day.

Cisco Automating and Programming Cisco Enterprise Solutions Sample Questions (Q121-Q126):

NEW QUESTION # 121

Refer to the exhibit. A Python script must be created to deactivate vSmart Policy Cisco SD-WAN vManage Configuration APIs. The documentation states the URL is as shown in the exhibit for this REST call using POST, and that "policyId" is a required request parameter.

Which line of Python code makes this call, assuming the variable "s" is a valid Requests session object and the variable "policy-id" is the policyId?

- A. `s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate/', data = {'policyId':policy_id})`
- B. `s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate?policyId=%s' % policy_id)`

- C. `s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate/%s' % policy_id)`
- D. `s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate&policyId=%s' % policy_id)`

Answer: C

NEW QUESTION # 122

Which two features are foundations of a software-defined network instead of a traditional network? (Choose two.)

- A. requires significant physical hardware resources
- B. requires device by device-level configurations
- C. **build upon a robust software stack**
- D. control plane and data plane are tightly coupled
- E. **automated through expressed intent to a software controller**

Answer: C,E

Explanation:

Explanation

In traditional networks, control plane and data plane are coupled tightly. It also requires device by device configurations and of course, it uses physical hardware resources to function. Whereas, SDN is based on a software stack. In Cisco SDNs are automated through expressed intent to a software controller.

NEW QUESTION # 123

Refer to the exhibit.

□ NTP server 10.1.1.20 must be configured on the target Cisco IOS XE device without using authentication and logging. Which state should be added on a new line at the end of the Ansible task?

- A. state: started
- B. state: installed
- C. state: true
- D. **state: present**

Answer: D

NEW QUESTION # 124

Which curl command is used to update the SNMP community of network ID "1234567" to read-only?

□

- A. Option D
- B. **Option B**
- C. Option C
- D. Option A

Answer: B

Explanation:

The curl command used to update settings typically involves making an HTTP PUT request to modify existing resources on the server. In this case, to update the SNMP community of network ID "1234567" to read-only, one would need to use a curl command that specifies the PUT method, includes headers indicating content type (usually application/json), and provides authentication credentials if necessary. The correct command should also include the appropriate body content specifying the new SNMP community settings. References:

NEW QUESTION # 125

Fill in the blank to complete the URL for an API call to Cisco SD-WAN to display the history of the Bidirectional Forwarding Detection sessions that run on a vEdge router.

□

Answer:

Explanation:

bfd/history?

Explanation:

To construct this URL, one needs to understand REST API call structure and how it relates to Cisco SD-WAN vManage APIs specifically. The base URL starts with 'https://', followed by 'vmanage-ip-address' which should be replaced with the actual IP address or hostname of vManage. '/dataservice/' is a common prefix in all vManage REST API calls indicating that data service is being accessed. Following this,

'/device/bfd/sessions/history' specifies that we are interested in accessing historical data about Bidirectional Forwarding Detection sessions on devices. Finally, '?deviceId=' is a query parameter where one must provide an actual device ID instead of '<deviceId>' placeholder. References: (Automating Cisco Enterprise Solutions Official Cert Guide)

<https://vmanage-ip-address/dataservice/device/bfd/synced/sessions?deviceId=deviceId>

NEW QUESTION # 126

.....

Are you worried about your poor life now and again? Are you desirous to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the 300-435 Exam. It is known to us that preparing for the exam carefully and getting the related certification are very important for all people to achieve their dreams in the near future.
