Our company has become the front-runner of this career and help exam candidates around the world win in valuable time. With years of experience dealing with FCP_FMG_AD-7.6 exam, they have thorough grasp of knowledge which appears clearly in our FCP_FMG_AD-7.6 Exam Questions. All FCP_FMG_AD-7.6 study materials you should know are written in them with three versions to choose from: the PDF, Software and APP online versions.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting
Topic 2	• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 4	• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Topic 5	This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.

New FCP_FMG_AD-7.6 Exam Practice - FCP_FMG_AD-7.6 New Practice Materials

TestkingPDF offers you the best practice tests for the preparation of FCP_FMG_AD-7.6 exams. The practice tests are designed to provide you the type of questions you are going to face in real FCP_FMG_AD-7.6 exams. The “simulated” real FCP_FMG_AD-7.6 exam scenario, created in the practice exam software, is meant to make you familiar with the actual FCP_FMG_AD-7.6 Exam. FCP_FMG_AD-7.6 announce several changes. Through one year, in their FCP_FMG_AD-7.6 exams according to the updated technologies. Make sure to purchase the most recent and updated version of FCP_FMG_AD-7.6 certification practice exam for best preparation of FCP_FMG_AD-7.6 exam.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31

An administrator wants to configure and manage multiple objects in the FortiManager database and give access to other users who work in the same database.

To stay in control of the changes made to firewall policies by other team members, the administrator needs a setup where all modifications go through a central check before they can be installed.

How can the administrator create this setup?

- A. Enable the prompt asking the administrator to accept firewall policies changes before saving.
- B. Enable device lock and the advanced mode feature in the ADOM.
- C. Enable the workspace (for all ADOMs) to control all changes made by any administrator.
- **D. Enable workflow mode and the ADOM lock feature.**

Answer: D

Explanation:

Enabling workflow mode along with the ADOM lock feature ensures that all configuration changes go through a centralized review and approval process before installation, allowing controlled and coordinated management of firewall policies by multiple administrators.

NEW QUESTION # 32

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors.

However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes. What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The FortiGate firmware version is different from the FortiManager ADOM version.
- B. Fortigate has a BGP template assigned on the FortiManager database.
- C. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- **D. The administrator must use the Install Wizard and select Install device settings only to push BGP settings**

Answer: D

Explanation:

If you change BGP in FortiManager and only reinstall the policy package, the change will NOT reach FortiGate because BGP is a device setting. You must install device settings.

NEW QUESTION # 33

Company policy dictates that any time a change is made to a policy package on FortiManager an ADOM revision is created before the change installed, and that revision is held for a minimum of 90 days.

Over the past three months, each installed change has resulted in several unused policies and duplicate objects.

The FortiManager administrator plans to upgrade the FortiGate devices and then upgrade the FortiManager ADOM from version 7.4 to 7.6.

Which action can the administrator take to avoid slow ADOM upgrades?

- A. Limit ADOM revisions before upgrading.
- B. Find unused firmware templates, then delete them before upgrading.
- C. Check and repair the global configuration database before upgrading.
- D. Export firewall policies to Excel, delete them on the ADOM. then reimport them after upgrading the ADOM.

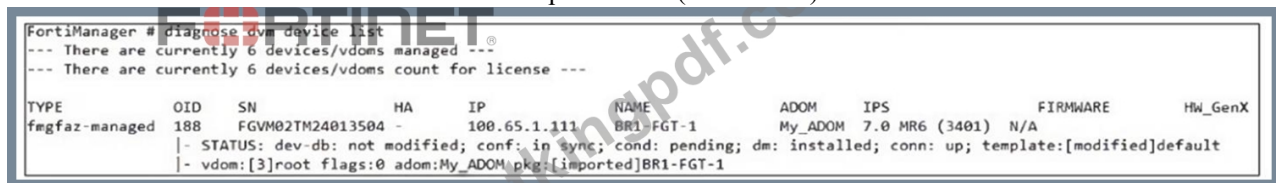

Answer: A

Explanation:

Limiting ADOM revisions reduces the number of stored historical configurations, which helps avoid performance degradation and slow ADOM upgrades caused by a large volume of revisions.

NEW QUESTION # 34

Refer to the exhibit. Which two statements about the output are true? (Choose two.)

```
FortiManager # diagnose vdom device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE          OID    SN          HA      IP          NAME          ADOM      IPS          FIRMWARE      Hw_GenX
fmgfaz-managed 188    FGVM02TM24013504 -    100.65.1.111 BR1-FGT-1    My_ADOM   7.0 MR6 (3401) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: pending; dm: installed; conn: up; template:[modified]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]BR1-FGT-1
```

- A. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- B. The system template default will override device-level database configurations.
- C. The latest revision history for the managed FortiGate does not match the device-level database.
- D. Configuration changes have been installed on FortiGate, updating policy and device-level database.

Answer: A,C

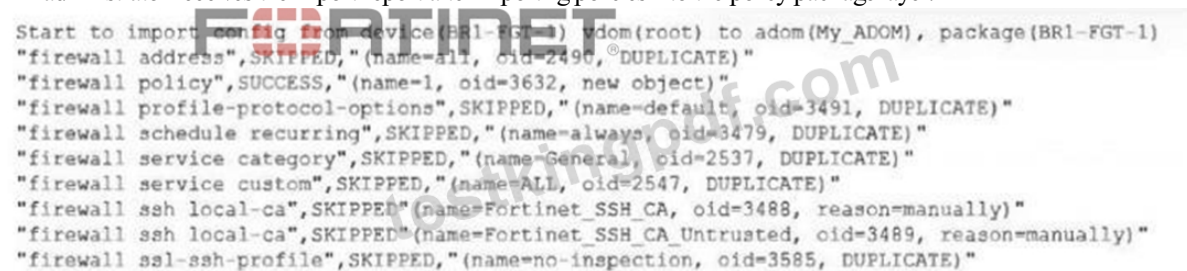

Explanation:

- conf: in sync - This is the sync status which shows that the latest revision history is in sync with Fortigate's configuration.

There is a new modification on FortiManager device level DB (dev-db: modified) which wasn't installed to FortiGate (cond: pending).

NEW QUESTION # 35

An administrator receives the import report after importing policies into the policy package layer.

```
Start to import config from device(BR1-FGT-1) vdom(root) to adom(My_ADOM), package(BR1-FGT-1)
"firewall address",SKIPPED,"(name=all, oid=2490, DUPLICATE)"
"firewall policy",SUCCESS,"(name=1, oid=3632, new object)"
"firewall profile-protocol-options",SKIPPED,"(name=default, oid=3491, DUPLICATE)"
"firewall schedule recurring",SKIPPED,"(name=always, oid=3479, DUPLICATE)"
"firewall service category",SKIPPED,"(name=General, oid=2537, DUPLICATE)"
"firewall service custom",SKIPPED,"(name=ALL, oid=2547, DUPLICATE)"
"firewall ssh local-ca",SKIPPED,"(name=Fortinet_SSH_CA, oid=3488, reason=manually)"
"firewall ssh local-ca",SKIPPED,"(name=Fortinet_SSH_CA_Untrusted, oid=3489, reason=manually)"
"firewall ssl-ssh-profile",SKIPPED,"(name=no-inspection, oid=3585, DUPLICATE)"
```

Based on the import report, how did FortiManager handle the profile-protocol-options object named default?

- A. FortiManager created a new service category in its database.
- B. FortiManager updated the duplicate value in the FortiGate database.
- C. FortiManager did not update its database with the value.
- D. FortiManager deleted the duplicate value from its database.

Answer: C

Explanation:

The import report clearly shows: " firewall profile-protocol-options ", SKIPPED, "(name=default, oid=3491, DUPLICATE)". In FortiManager import reporting, SKIPPED means the object was not imported or updated, and DUPLICATE means an object with that identity already exists in the ADOM database. So FortiManager did not update its database with the imported value for the object default, which makes C correct.

The lab guide reinforces this behavior in the conflict-handling workflow. It explains that during import, FortiManager checks for duplicate names and conflicts, and for conflicting objects the administrator may need to choose whether to keep the value from FortiGate or FortiManager. For the default Firewall Profile-Protocol-Options object, the guide specifically discusses keeping the existing FortiManager value to avoid unnecessary changes.

NEW QUESTION # 36

.....

At present, artificial intelligence is developing so fast. So machines inevitably grow smarter and more agile. In the result, many simple jobs are substituted by machines. In order to keep your job, choose our FCP_FMG_AD-7.6 exam questions and let yourself become an irreplaceable figure. In fact, our FCP_FMG_AD-7.6 Study Materials can give you professional guidance no matter on your daily job or on your career. And with the FCP_FMG_AD-7.6 certification, you will find you can be better with our help.
