Valid F5CAB4 Brindumps, Valid F5CAB4 Exam Bootcamp

If you want to strive for a further improvement in the IT industry, it's right to choose our ITPassLeader. ITPassLeader's F5CAB4 exam certification training materials is worked out by IT industry elite team through their own exploration and continuous practice. It has high accuracy and wide coverage. Owning ITPassLeader's F5CAB4 Exam Certification training materials is equal to have the key to success.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q22-Q27):

NEW QUESTION # 22

Administrative user accounts have been defined on the remote LDAP server and are unable to log in to the BIG-IP device. Which log file should the BIG-IP Administrator check to find the related messages?28

- A. /var/log/secure
- B. /var/log/messages
- C. /var/log/user.log
- D. /var/log/ltm

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Authentication and authorization events are handled by the system's PAM (Pluggable Authentication Modules). For Control Plane security auditing, all login attempts-whether local or remote (LDAP/RADIUS/TACACS+)-and SSH-related security events are recorded in /var/log/secure. This is the primary log for troubleshooting administrative access issues

NEW QUESTION # 23

A BIG-IP Administrator receives an RMA replacement for a failed F5 device. The Administrator tries to restore a UCS taken from the previous device, but the restore fails. The following error appears in the /var/log/ltnr:
insufficient pool members. 01070608:3: License is not operational
(expired, digital signature does not match contents)

What should the BIG-IP Administrator do to avoid this error? (Choose one answer)

- A. Remove the license information from the UCS archive
- **B. Use the appropriate tmsh command with the no-license option**
- C. Revoke the license prior to restoring
- D. Reactivate the license on the new device using the manual activation method

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When restoring a UCS file to replacement hardware (RMA device), the license from the original device is not valid on the new system. If the UCS restore attempts to load the old license, BIG-IP reports license errors such as "License is not operational", which can prevent traffic objects (including pools and virtual servers) from loading correctly.

To avoid this issue, F5 documentation recommends restoring the UCS without the license, using the following command:

```
tmsh load /sys ucs <ucs filename> no-license
```

This approach:

Restores all configuration objects (LTM, networking, certificates, keys, etc.) Excludes the invalid license tied to the old hardware

Allows the administrator to activate a new license separately on the replacement device Why the other options are incorrect:

A . Remove the license information from the UCS archive

Not supported or recommended; UCS files should not be manually modified.

B . Revoke the license prior to restoring

License revocation does not prevent the UCS from attempting to load license data.

D . Reactivate the license on the new device using the manual activation method This must be done after restoring the UCS and does not prevent the restore failure itself.

Therefore, the correct and supported method to avoid this error is C.

NEW QUESTION # 24

A BIG-IP Administrator needs to determine who changed a Virtual Server configuration.

In which log file would the BIG-IP Administrator find this data? (Choose one answer)

- A. /var/log/secure
- B. /var/log/ltn
- **C. /var/log/audit**

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

The audit log (/var/log/audit) records configuration changes made on the BIG-IP system, including:

Who made the change (user account)

What was changed (for example, a virtual server modification)

When the change occurred

How it was performed (GUI, TMSH, or API)

Why the other options are incorrect:

/var/log/secure logs authentication events such as login successes and failures, not configuration changes.

/var/log/ltn logs traffic-management and runtime LTM events, not administrative configuration modifications.

Therefore, the correct log file for tracking who changed a virtual server is /var/log/audit.

NEW QUESTION # 25

The BIG-IP appliance fails to boot. The BIG-IP Administrator needs to run the End User Diagnostics (EUD) utility to collect data to send to F5 Support. Where can the BIG-IP Administrator access this utility?

- A. Management Port
- **B. Console Port**
- C. External VLAN interface
- D. Internal VLAN interface

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The EUD is a 33 hardware-level diagnostic tool that runs outside of the TMOS operating system. Because it is used when the system cannot boot or is in a pre-boot state, it cannot be accessed via the GUI or management network. The administrator must connect physically via the serial Console Port to interact with the boot menu and initiate the hardware tests.

NEW QUESTION # 26

A BIG-IP Administrator needs to fail over the active device. The administrator logs into the Configuration Utility and navigates to Device Management > Traffic Group. However, "Force to Standby" is greyed out. What is causing this issue?

- A. The BIG-IP Administrator is logged in as root
- B. The BIG-IP Administrator is logged in as administrator
- C. The BIG-IP Administrator is NOT logged into command line to tail over
- **D. The BIG-IP Administrator is on the Standby Device**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: In a High Availability pair, the "Force to Standby" action is a Control Plane command used to trigger a manual failover. This option is only logical and available on the device that is currently in the Active state. If the button is greyed out, it indicates that the administrator is already logged into the Standby unit, which has no active traffic groups to relinquish.

NEW QUESTION # 27

.....

The APP version of our F5CAB4 study guide provides you with mock exams, time-limited exams, and online error correction and let you can review on any electronic device. So that you can practice our F5CAB4 exam questions on Phone or IPAD, computer as so on. At the same time, for any version, we do not limit the number of downloads and the number of concurrent users, you can even buy F5CAB4 Learning Materials together with your friends, which undoubtedly saves you a lot of overhead.

Valid F5CAB4 Braindumps: <https://www.itpassleader.com/F5/F5CAB4-dumps-pass-exam.html>

Our experts are responsible to make in-depth research on the exams who contribute to growth of our F5CAB4 practice materials, F5 Minimum F5CAB4 Pass Score Furthermore, rewards are scalable depending on how well the test taker performs, In a year after your payment, we will inform you that when the F5CAB4 learning materials should be updated and send you the latest version free of charge, F5 Minimum F5CAB4 Pass Score If you have any interest and question about products we welcome you to send email or online news to us any time, we will reply you as soon as possible.

Some components can be incorporated into other applications, F5CAB4 It helps to acquire best set of techniques and tools for eliminating errors in the processes, Our experts are responsible to make in-depth research on the exams who contribute to growth of our F5CAB4 practice materials.

Pass Guaranteed 2026 Perfect F5 F5CAB4: Minimum BIG-IP Administration Control Plane Administration Pass Score

Furthermore, rewards are scalable depending on how well the test taker performs, In a year after your payment, we will inform you that when the F5CAB4 learning materials should be updated and send you the latest version free of charge.
