答案： A

問題 #146

Which statement is true about scrum?

- A. It is an ideal method for static design requirements
- B. It is a team-based framework
- C. It is a Lean system engineering technique
- D. It is a set of technical software practices

答案： B

問題 #147

What is an anti-pattern for a Release Train Engineer facilitating a scrum of scrums meet-ing?

- A. Run the meeting in front of the program board
- B. Review individual team performance
- C. Facilitate the meeting using a focused and visible agenda and timebox
- D. Address the most important questions for Program Increment (PI) execution

答案： B

解題說明：

An anti-pattern for a Release Train Engineer (RTE) facilitating a scrum of scrums meeting is focusing on individual team performance. The purpose of the scrum of scrums is to enhance collaboration and alignment across teams, not to assess or review the performance of individual teams.

* Purpose of Scrum of Scrums: The scrum of scrums is a coordination meeting that helps teams discuss interdependencies and progress towards achieving the Program Increment (PI) objectives. It is not a status meeting or a performance review session¹.

* Role of the RTE: As a servant leader, the RTE's role is to facilitate these meetings to ensure that teams are on track to meet the PI objectives, not to evaluate team performance. The RTE should focus on removing impediments and fostering an environment where teams can collaborate effectively¹.

* Focus on Collaboration: The RTE should encourage teams to share information about their progress, impediments, and dependencies, rather than focusing on individual team metrics or performance. This approach promotes a collaborative and problem-solving culture¹.

* Anti-Patterns to Avoid: Reviewing individual team performance can lead to a lack of trust and openness, as teams may feel they are being judged or compared. This can hinder the collaborative spirit necessary for the success of the ART¹.

* Encouraging System Thinking: The RTE should promote system thinking, where the focus is on the overall success of the ART rather than the performance of individual teams. This helps in identifying systemic issues and working towards collective improvement¹.

In conclusion, the RTE should avoid the anti-pattern of reviewing individual team performance during the scrum of scrums meeting. Instead, the RTE should facilitate a collaborative environment that focuses on the progress and impediments related to PI execution.
