

New JN0-452 Test Test & JN0-452 Valid Exam Answers

P.S. Free & New JN0-452 dumps are available on Google Drive shared by TestkingPass: <https://drive.google.com/open?id=1KhDrETF3AdB7OfNMxUx8eeZo7Bxvc-su>

You may attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you want and help you a lot. So what certificate exam should you attend and what method should you use to let the certificate play its due role? You should choose the test JN0-452 certification and buy our JN0-452 study materials to solve the problem. Passing the test JN0-452 certification can help you increase your wage and be promoted easily and buying our JN0-452 study materials can help you pass the test smoothly.

Our after-sales services are also considerate. If you get any questions with our JN0-452 guide question, all helps are available upon request. Once you place your order this time, you will enjoy and experience comfortable and convenient services immediately. Besides, we do not break promise that once you fail the JN0-452 Exam, we will make up to you and relieve you of any loss. Providing with related documents, and we will give your money back. We have been always trying to figure out how to provide warranty service if customers have questions with our JN0-452 real materials.

Juniper JN0-452 Valid Exam Answers | JN0-452 Valid Dumps Free

With the pass rate reaching 98.75%, our JN0-452 test materials have gained popularity in the international market. Many candidates have recommended our products to their friends. In addition, JN0-452 exam materials are edited by skilled professionals, and they possess the professional knowledge for the exam, therefore you can use the exam materials at ease. Free demo for JN0-452 Exam Dumps are available, and you can have a try before buying, so that you can have a better understanding of what you are going to buy.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q27-Q32):

NEW QUESTION # 27

What information would be streamed through webhooks? (Choose two.)

- A. alerts
- B. audit logs
- C. SLE metrics of clients
- D. location coordinates of RFID tags

Answer: B,D

Explanation:

Reference: <https://www.mist.com/documentation/webhooks/>

NEW QUESTION # 28

Which two statements correctly describe the Wi-Fi location component of Juniper Mist's location-based services? (Choose two.)

- A. It is enabled by default.
- **B. It requires the Asset Visibility subscription.**
- **C. It is included in the Wireless Assurance subscription.**
- D. It tracks third-party BLE tags.

Answer: B,C

Explanation:

Juniper Mist separates its Location-Based Services (LBS) into distinct functional areas: User Engagement (vBLE-based) and Asset Visibility (tracking assets via Wi-Fi or BLE). Understanding the licensing and default behavior is crucial for a successful deployment. The Wi-Fi location component is designed to track devices that are connected to the Wi-Fi network or are simply probing (unconnected). While basic connectivity data is part of the standard management, the high-fidelity tracking of these devices on a map as "assets" or "clients" for location analytics is tied to specific licensing tiers.

First, Wireless Assurance (B) provides the foundational telemetry and data collection required for basic location visibility. However, to unlock the full "Asset Tracking" capabilities-where the system actively correlates coordinates and provides historical data for specific Wi-Fi devices-the Asset Visibility subscription (D) is required. This subscription is what enables the Mist Cloud to process and store the location data for tags and Wi-Fi clients beyond simple real-time display.

Regarding the other options: Statement A is incorrect because the Wi-Fi location component tracks Wi-Fi devices; tracking BLE tags (third-party or otherwise) falls under the BLE/vBLE location component.

Statement C is incorrect because location services are typically not enabled by default to protect user privacy and optimize performance. An administrator must manually upload a floor plan, scale it, and enable "Wi-Fi Engagement" or "Asset Tracking" within the Site settings or individual Access Point configurations to begin collecting location data. Once enabled and properly licensed, the Mist AI engine uses RSSI data from multiple APs to provide location coordinates for any Wi-Fi-emitting device in the environment.

NEW QUESTION # 29

An administrator is configuring a WxLAN policy to control access for employees. The goal is to allow employees to access all internal resources and the public internet, but explicitly block access to social media websites.

What is the correct way to structure the policy rules to achieve this?

- A. Rule 1: User: 'Employee' -> Resources: 'Internal-Network', 'Public-Internet' -> Action: 'Allow'.
- B. Rule 1: User: 'Employee' -> Resources: 'Social-Media' -> Action: 'Deny'. The default rule is 'Allow All'.
- C. Rule 1: User: 'Employee' -> Resources: 'Social-Media' -> Action: 'Deny'. Rule 2: User: 'All Users' -> Resources: 'All Resources' -> Action: 'Allow'.
- **D. Rule 1: User: 'Employee' -> Resources: 'Social-Media' -> Action: 'Deny'. Rule 2: User: 'Employee' -> Resources: 'All Resources' -> Action: 'Allow'.**

Answer: D

NEW QUESTION # 30

Which two statements are true about 802.1X/EAP? (Choose two.)

- A. Credentials are exchanged with a RADIUS server prior to the 802.11 Association.
- B. Credentials are exchanged with a RADIUS server after the 802.11 Association.
- **C. Credentials are exchanged with a RADIUS server prior to the 4-way Handshake.**
- **D. Credentials are exchanged with a RADIUS server after the 4-way Handshake.**

Answer: C,D

NEW QUESTION # 31

A user is trying to access a local printer but is being blocked. You suspect a WxLAN policy is the cause.

Where in the Mist dashboard would you look to see which policy rule is blocking the traffic for that specific user?

- A. In the Packet Capture tool.
- **B. In the Client Insights page, under the "Security" events.**
