Talend-Core-Developer PDF - Talend-Core-Developer證照指南

不要再猶豫了，如果想體驗一下Talend-Core-Developer考古題的內容，那麼快點擊PDFExamDumps的網站獲取吧。你可以免費下載考古題的一部分。在購買Talend-Core-Developer考古題之前，你可以去PDFExamDumps的網站瞭解更多的資訊，更好地瞭解這個網站。另外，關於考試失敗全額退款的政策，你也可以事先瞭解一下。PDFExamDumps绝对是一个全面保障你的利益，设身处地为你考虑的网站。

最新的 Talend Data Integration Talend-Core-Developer 免費考試真題 (Q55-Q60):

問題 #55

You are using a tRESTClient component to call a REST service. Which advanced option should you use to convert the response from the server to the document type?

- A. Convert Response To XML Document
- B. Convert Response To HTML Document
- C. Convert Response To DOM Document
- D. Convert Response To JSON Document

答案：C

解題說明：

Comprehensive and Detailed Explanation:

In Talend Studio, the tRESTClient component includes an advanced setting called "Convert Response To DOM Document". When this option is selected, the response from the REST service is converted into a DOM (Document Object Model) document. This allows for structured processing of the response data within Talend workflows.

問題 #56

You need to call a different Job within a Job you are developing.
Which mechanism allows you to pass the parameters to the job you want to call?

- A. Java Function parameters
- **B. Context parameters**
- C. CommandLine options
- D. File

答案: B

解題說明:

To call a different job within a job you are developing, you can use the tRunJob component. This component allows you to execute another job as a subjob within a parent job. To pass the parameters to the job you want to call, you can use the context parameters. Context parameters are variables that can store values that can be changed at runtime or between different contexts. You can define context parameters in the Contexts tab of your job and assign them values for each context. You can also pass context parameters from the parent job to the child job by using the Context Param tab of the tRunJob component. This way, you can parameterize the properties or expressions of the child job with the values from the parent job.

You do not need to use a file, command line options, or Java function parameters to pass parameters to a different job. These methods are not supported by Talend Studio and may cause errors or unexpected results. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [tRunJob properties - 7.3], [Contexts - 7.3]

問題 #57

A colleague has exported a Data Integration Job to run outside Talend Studio.
How do you run the Job?

- A. Install the Job and start the resulting service.
- B. Extract the contents of the archive and run the batch file and shell script.
- C. Extract the files from the archive and run the JAR file.
- **D. Extract the content of the archive and run the batch file or the shell script.**

答案: D

解題說明:

To run a job that has been exported by a colleague to run outside Talend Studio, you need to extract the content of the archive and run the batch file or the shell script. The archive file contains all the files and libraries required to run the job independently from Talend Studio on any platform that supports Java. The archive file also contains two executable files: a batch file (.bat) for Windows platforms and a shell script (.sh) for Linux platforms. You need to run the appropriate file for your platform by double-clicking on it or using a command line tool. This will launch the job and display its output in a console window.

You do not need to extract the contents of the archive and run both the batch file and shell script, install the job and start the resulting service, or extract the files from the archive and run the JAR file. These methods are not correct or available in Talend Studio and may cause errors or unexpected results. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Build Job - 7.3]

問題 #58

Which action should you perform to calculate the overall Trust Score for multiple customer datasets?

- A. Mark the datasets in the dataset list, and the score updates in the detailed view.
- B. Review the rating of selected datasets in the group tab.
- C. Use the search bar to filter the customer datasets and manually calculate the score.
- **D. Use the search bar to filter the customer datasets, and the score will automatically update.**

答案: D

解題說明:

Comprehensive and Detailed Explanation:

To calculate the overall Trust Score for multiple customer datasets:

* Use the search bar to filter the customer datasets, and the score will automatically update (Option B):

- * Filtering datasets using the search functionality aggregates the Trust Scores of the selected datasets, providing an overall score for the group.
- Why not other options?
- * Option A: Reviewing individual ratings does not provide an aggregated Trust Score.
- * Option C: Marking datasets does not trigger an automatic update of the aggregated score.
- * Option D: Manual calculation is unnecessary as the system provides automatic aggregation upon filtering.

問題 #59

How can you create REST API metadata in Talend Studio? Choose 2 answers.

- **A. Import it from Talend API Designer.**
- **B. Create it manually in Talend Studio.**
- C. Import it from a JSON file.
- D. Import it from Talend API Tester.

答案: **A,B**

解題說明:

Comprehensive and Detailed Explanation:

In Talend Studio, REST API metadata can be created using the following methods:

- * Create it manually in Talend Studio (Option A):
- * Users can define REST API metadata within Talend Studio by manually specifying API structure, endpoints, HTTP methods, and parameters.
- * This method provides full control over the API metadata but requires manual configuration.
- * Import it from Talend API Designer (Option B):
- * If an API has been designed using Talend API Designer, it can be imported into Talend Studio.
- * This enables reusing the API design directly without manual recreation.

Why not other options?

* Option C (Import from JSON file): Talend Studio does not support direct import of REST API metadata from generic JSON files.

* Option D (Import from Talend API Tester): Talend API Tester is used for testing APIs but does not provide an option to import API definitions into Talend Studio.

問題 #60

.....

通過Talend-Core-Developer 考試不是很簡單的。通過Talend-Core-Developer考試需要高度專業的知識，如果你還欠缺這方面的知識，PDFExamDumps可以為你提供知識的來源。PDFExamDumps的專家團隊以他們的豐富的專業知識和經驗幫助你增長知識，並且給你提供Talend-Core-Developer認證考試的相關練習題和答案。PDFExamDumps會盡全力幫助你一次性通過Talend-Core-Developer認證考試，並且還可以鞏固你的IT專業知識。選擇了PDFExamDumps不僅可以保證你100%通過Talend-Core-Developer認證考試，並且還會為你提供一年的免費的練習題和答案的更新服務。如果你考試不小心失敗了，我們保證立刻地100%全額退款給您。
