SAP Certified Associate - Implementation Consultant - SAP Service Cloud Version 2 Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which elements can you use to control the reaction time? Note: There are 2 correct answers to this question.

- A. Working calendar
- B. Operating hours
- C. Autoflow
- D. Case Designer with the step option assignment

Answer: A,B

Explanation:

In SAP Service Cloud V2, reaction times for cases are influenced by Working calendar, which defines non-working days and holidays, and Operating hours, which specify the hours during which service agents are available. These elements ensure that reaction times are calculated based on actual working periods. According to SAP documentation, "Working calendar and operating hours are used to control reaction times by defining the availability for case handling." Case Designer with step option assignment (A) is for routing, not reaction time control. Autoflow (D) automates actions but does not directly manage reaction times.
