Here's the Quick Way to Crack Palo Alto Networks SSE-Engineer Certification Exam

During these years, our PDF version of our Palo Alto Networks SSE-Engineer study engine stays true to its original purpose to pursue a higher pass rate that has never been attained in the past. And you will be content about our considerate service on our Palo Alto Networks SSE-Engineer training guide. If you have any question, you can just contact us!

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q10-Q15):

NEW QUESTION # 10

How can a network security team be granted full administrative access to a tenant's configuration while restricting access to other tenants by using role-based access control (RBAC) for Panorama Managed Prisma Access in a multitenant environment?

- A. Create a custom role with Device Group and Template privileges and assign it to the security team's user accounts.
- B. Create an Access Domain and restrict access to only the Device Groups and Templates for the Target Tenant.
- C. Create a custom role enabling all privileges within the specific tenant's scope and assign it to the security team's user

accounts.

- D. Set the administrative accounts for the security team to the "Superuser" role.

Answer: B

Explanation:

In a Panorama Managed Prisma Access multitenant environment, Access Domains provide granular role-based access control (RBAC). By defining an Access Domain, the network security team can be granted full administrative privileges for a specific tenant's configuration while ensuring they cannot access or modify other tenants. This method enforces proper segmentation and ensures compliance with multitenant security policies.

NEW QUESTION # 11

Which advanced AI-powered functionality does Strata Copilot provide to enhance the capabilities of Prisma Access security teams?

- A. Automated remediation of misconfigured security policies
- B. **Customized guidance for resolving issues through recommended next steps**
- C. Initial configuration of Prisma Access using a natural language interface
- D. Real-time traffic analysis for automated threat prevention

Answer: B

Explanation:

Strata Copilot enhances the capabilities of Prisma Access security teams by providing AI-powered insights and recommendations to help resolve security issues efficiently. It analyzes security events, misconfigurations, and alerts and offers contextual guidance with recommended next steps for troubleshooting and improving security posture. This assists teams in quickly identifying and addressing security challenges without requiring deep manual investigation.

NEW QUESTION # 12

When a review of devices discovered by IoT Security reveals network routers appearing multiple times with different IP addresses, which configuration will address the issue by showing only unique devices?

- A. Add the duplicate entries to the ignore list in IoT Security.
- B. Delete all duplicate devices, keeping only those discovered using their management IP addresses.
- C. **Merge individual devices into a single device with multiple interfaces.**
- D. Create a custom role to merge devices with the same hostname and operating system.

Answer: C

Explanation:

When network routers appear multiple times with different IP addresses in IoT Security, it is likely because they have multiple interfaces with separate IPs. Merging these entries into a single device with multiple interfaces ensures that the system correctly identifies each router as a unique entity while maintaining visibility across all its interfaces. This approach prevents unnecessary duplicates, improves asset management, and enhances security monitoring.

NEW QUESTION # 13

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

- * The solution must meet these requirements:
- * The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.
- * The branch locations must have internet filtering and data center connectivity.
- * The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.
- * The security team must have access to manage the mobile user and access to branch locations.
- * The network team must have access to manage only the partner access.

Which two components can be provisioned to enable data center connectivity over the internet? (Choose two.)

- A. SD-WAN Connector
- B. **Service connections**

- C. Colo-Connect
- D. ZTNA Connector

Answer: B,C

Explanation:

Service connections enable secure connectivity between Prisma Access and on-premises data centers, allowing mobile users and branch locations to access internal applications. They facilitate seamless integration of internal networks with Prisma Access while maintaining security policies. Colo-Connect provides a dedicated and optimized pathway for traffic between Prisma Access and data centers, ensuring stable performance and reduced latency over the internet. Both components together support secure and efficient data center connectivity while aligning with the customer's access control and filtering requirements.

NEW QUESTION # 14

Which feature can help address a customer concern about the length of time it takes to update their SaaS- allowed IP addresses while onboarding to Prisma Access?

- A. DNS-based load balancing
- B. Dynamic IP pooling
- C. Dedicated IP addresses
- D. Traffic steering

Answer: D

Explanation:

When onboarding to Prisma Access, using Dedicated IP addresses helps address concerns about the time required to update SaaS- allowed IP lists. With dedicated egress IPs, the customer receives fixed, predictable IP addresses that do not change dynamically. This eliminates the need to frequently update SaaS providers' allowlists, ensuring seamless access to cloud applications without interruptions due to IP address changes.

NEW QUESTION # 15

.....

Many customers may doubt the quality of our SSE-Engineer learning quiz since they haven't tried them. But our SSE-Engineer training engine is reliable. What you have learnt on our SSE-Engineer exam materials are going through special selection. The core knowledge of the real exam is significant. With our guidance, you will be confident to take part in the SSE-Engineer Exam. Our SSE-Engineer study materials will be your good assistant. Put your ideas into practice.
