

# Free PDF Nutanix - Accurate NCP-CI-AWS Test King

## How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

## Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

- VENDOR: (Nutanix)
- EXAM CODE: (NCP-CI-AWS)
- EXAM NAME: (Nutanix Certified Professional - Cloud Integration - AWS v6.7)
- Number OF Questions: (75)
- Certification Name: (Nutanix Certified Professional)
- Exam Language: (ENGLISH)
- Promo Code For Nutanix NCP-CI-AWS Exam Questions: "SAVE25"

Will you feel nervous in the exam? If you do, just try us NCP-CI-AWS study materials, we will release your nerves as well build up your confidence for the exam. NCP-CI-AWS Soft test engine can stimulate the real exam environment, so that you can know the procedure of the real exam, and your nervous will be relieved. In addition, NCP-CI-AWS Study Materials are high quality, and they can help you pass the exam. They also contain both questions and answers, you can have a quickly check after practicing.

## Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>

Topic 4	<ul style="list-style-type: none"><li>• Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul>

## Where To Find Real Nutanix NCP-CI-AWS Exam Questions

Nutanix NCP-CI-AWS certification exam is one of the most valuable certification exams. IT industry is under rapid development in the new century, the demands for IT talents are increased year by year. Therefore, a lots of people want to become the darling of the workplace by IT certification. How to get you through the Nutanix NCP-CI-AWS certification? The questions and the answers iPassleader Nutanix provides are your best choice. It is difficult to pass the test and the proper shortcut is necessary. Nutanix Business Solutions iPassleader NCP-CI-AWS Dumps rewritten by high rated top IT experts to the ultimate level of technical accuracy. The version is the most latest and it has a high quality products.

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q87-Q92):

### NEW QUESTION # 87

An administrator is deploying a new cluster on AWS and would like to ensure the data is encrypted. Due to cost constraints, the deployment will leverage the native local key manager (LKM).

What is the minimal number of nodes needed to support the Nutanix native LKM?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

To support Nutanix 's native Local Key Manager (LKM) for data encryption in a cost-effective manner, a minimum of three nodes is required. This ensures that there is enough redundancy and reliability for the encryption services to function properly, complying with best practices for distributed key management.

Nutanix Cloud Clusters on AWS Administration

### NEW QUESTION # 88

An administrator is considering an NC2 cluster deployment within AWS. Specifically, the administrator is concerned about North-South traffic (exiting or entering the Nutanix VPC), such as internet-bound network traffic between the user VPC and the AWS VPC. How is this traffic routed in an NC2 on AWS deployment?

- A. Nutanix Default Gateway
- B. AWS Default Gateway
- C. Distributed gateway model
- D. Single Node for all VPCs

**Answer: C**

Explanation:

In an NC2 on AWS deployment using Flow Virtual Networking (FVN), North-South traffic (traffic moving into or out of the Nutanix VPC) is handled via a distributed gateway model. Unlike traditional setups that might rely on a single bottleneck node, the distributed gateway model allows each Nutanix node in the cluster to participate in routing traffic to the AWS VPC router. This architecture provides high availability and scales performance linearly as nodes are added to the cluster. By distributing the gateway function, Nutanix ensures that no single point of failure exists for internet-bound or cross-VPC traffic, optimizing the path between Nutanix User VMs and native AWS services or the public internet.

### NEW QUESTION # 89

An administrator is experiencing problems with several operations, including VM IP address assignment validations, VM power-on and VM power-off operations.

Whenever a related operation is performed, an alert is generated in the NC2 console indicating that the Cloud API endpoints are unavailable.

The issue was further investigated and it was determined that NC2 is unable to make API calls to the underlying cloud infrastructure due to network connectivity misconfigurations.

Which two connectivity misconfigurations could be causing this issue? (Choose two.)

- A. IAM roles and policies are incorrectly configured.
- B. AWS VPC endpoints are used for connectivity to AWS services.
- C. Subnets are connected to the Internet via NAT gateways.
- D. Route tables for cloud subnets contain incorrect route entries.

**Answer: A,D**

Explanation:

Route tables for cloud subnets contain incorrect route entries:

If the route tables associated with the cloud subnets contain incorrect route entries, the NC2 cluster might not be able to reach the necessary AWS services or endpoints. Correct route entries are crucial for ensuring proper communication between the NC2 cluster and the underlying AWS infrastructure.

IAM roles and policies are incorrectly configured:

Incorrectly configured IAM roles and policies can prevent NC2 from making API calls to AWS services. These roles and policies must be properly set up to allow the necessary permissions for NC2 to interact with AWS resources and perform required operations.

Reference:

Refer to the AWS documentation on route table configuration and IAM roles and policies, and Nutanix documentation on NC2 cloud connectivity and permissions.

### NEW QUESTION # 90

An administrator is deploying a new NC2 cluster on AWS and needs to ensure full connectivity is established between the company's on-premises datacenter and the AWS cloud.

Which two AWS offering will satisfy this requirement? (Choose two.)

- A. Dedicated interconnect
- B. Direct Connect
- C. AWS VPN
- D. ExpressRoute

**Answer: B,C**

Explanation:

To establish full connectivity between the company's on-premises datacenter and the AWS cloud, the following AWS offerings will satisfy this requirement:

\* AWS VPN: This service allows you to create a secure connection between your on-premises network or other remote network and your AWS VPC using an IPsec VPN tunnel. It is suitable for low to moderate bandwidth requirements and provides secure, encrypted connections.

\* Direct Connect: AWS Direct Connect is a dedicated network connection from your premises to AWS. It provides a private, high-bandwidth, low-latency connection which is ideal for high-throughput applications and workloads that need consistent network performance.

AWS Direct Connect Documentation

### NEW QUESTION # 91

An administrator needs to backup Prism Central configuration data to an Amazon S3 bucket.

Which pcdr-cli command parameters is needed to satisfy this task?

- A. recover
- B. deployment-info
- C. list-protection-targets
- D. protect

**Answer: D**

Explanation:

To backup Prism Central configuration data to an Amazon S3 bucket, the pcdr-cli command with the protect parameter is used. This parameter is specifically designed for creating protection policies and backing up Prism Central data.
