You will have easy access to all kinds of free trials of the MB-330 study materials. You can apply for many types of MB-330 study materials at the same time. Once our system receives your application, it will soon send you what you need. Please ensure you have submitted the right email address. The free demo has three versions. We only send you the PDF version of the MB-330 Study Materials.

Microsoft MB-330: Exam Overview

There are many things that you need to know about the Microsoft MB-330 exam, and one of the most important is its duration. This test is 120 minutes long and consists of about 40 to 60 questions that are majorly based on the multiple-choice and multiple-response formats. This means that the candidates only have about 2 minutes for each question, so they need to work quickly. The test is available in the English language and costs \$165.

The retake policy for the Microsoft MB-330 exam is quite straightforward. If you are unable to pass this test on the first try, you will have to wait for at least 24 before you can take it again. However, if you are still unable to clear the exam, you will have to wait at least 14 days before you can have another go. If you can't complete your test for the third time, you should wait 14 days before you can have the fourth and fifth attempts. It is important to keep in mind that Microsoft only allows 5 attempts in a year, so if you are

unable to pass the exam on the 5th try, you will not have any more retakes.

If you plan to cancel the exam appointment, it is important to do so at least 24 hours before the test. This is because if you fail to cancel or reschedule the exam, you will be forfeiting your fee.

Microsoft MB-330 certification exam is designed to test the skills and knowledge of individuals who are seeking to become a certified Microsoft Dynamics 365 Supply Chain Management Functional Consultant. Microsoft Dynamics 365 Supply Chain Management Functional Consultant certification exam is intended for individuals who are responsible for configuring and implementing solutions that optimize the supply chain processes in an organization. MB-330 Exam measures the candidate's ability to design and implement solutions that streamline supply chain processes, optimize inventory management, and improve supply chain visibility.

Microsoft Dynamics 365 Supply Chain Management is a powerful application that helps organizations streamline their operations and gain a better understanding of their supply chain. Microsoft Dynamics 365 Supply Chain Management Functional Consultant certification exam is ideal for professionals who are looking to enhance their knowledge and skills in Microsoft Dynamics 365 Supply Chain Management. With the MB-330 certification, candidates can demonstrate their understanding of the application and gain recognition as a certified Functional Consultant in Supply Chain Management. Microsoft Dynamics 365 Supply Chain Management Functional Consultant certification not only validates one's skills but also increases their chances of getting a better job opportunity and a higher salary package.

As the authoritative provider of MB-330 Test Guide, we always pursue high passing rates compared with our peers to gain more attention from potential customers.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q383-Q388):

NEW QUESTION # 383

A company orders parts from a vendor. The vendor frequently ships more units than the company orders.

An approving manager must receive notification when the quantity of units received is more than 10 percent above the number of units ordered.

You have an existing notification workflow.

You need to ensure that the notification is generated.

How should you configure the system? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Configure overdelivery/underdelivery percent.	<input type="checkbox"/> On the Purchase order form, purchase order lines fast tab, configure the overdelivery field. <input type="checkbox"/> On the Purchase order form, purchase order lines fast tab, configure the underdelivery field. <input type="checkbox"/> On the Sales order form, sales order line fast tab, configure the overdelivery field.
Notify user about required approval.	<input type="checkbox"/> Register the product and post the receipt list. <input type="checkbox"/> Register the product on a purchase order line and post a receipt. <input type="checkbox"/> Register the product on a transfer order.

Answer:

Explanation:

Requirement	Action
Configure overdelivery/underdelivery percent.	<input checked="" type="checkbox"/> On the Purchase order form, purchase order lines fast tab, configure the overdelivery field. <input checked="" type="checkbox"/> On the Purchase order form, purchase order lines fast tab, configure the underdelivery field. <input checked="" type="checkbox"/> On the Sales order form, sales order line fast tab, configure the overdelivery field.
Notify user about required approval.	<input checked="" type="checkbox"/> Register the product on a purchase order line and post a receipt. <input type="checkbox"/> Register the product and post the receipt list. <input type="checkbox"/> Register the product on a transfer order.

NEW QUESTION # 384

A company uses Dynamics 365 Supply Chain Management to manage procurement operations.

The company plans to source some product lines from offshore vendors. The company wants to use the landed cost module feature for the shipment tracking and item costing.

You need to configure the procurement requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a configuration table with two columns: 'Requirement' and 'Option'. The 'Requirement' column lists three tasks: 'Update item's final inventory cost.', 'Update shipped item's ownership.', and 'Update shipment's tracking.'. The 'Option' column contains three dropdown menus. The first dropdown is set to 'Post shipper's invoice' with 'Post shipper's invoice' selected. The second dropdown is set to 'Post purchase invoice' with 'Post purchase invoice' selected. The third dropdown is set to 'Use voyage tracking' with 'Use voyage tracking' selected.

Requirement	Option
Update item's final inventory cost.	Post shipper's invoice Post shipper's invoice Post purchase invoice Update purchase order charges
Update shipped item's ownership.	Post purchase invoice Post shipper's invoice Post purchase invoice Update purchase order charges
Update shipment's tracking.	Use voyage tracking Use voyage tracking Add voyage activities Update journey template

Answer:

Explanation:

This is a duplicate of the screenshot above, showing the same configuration table with 'Post shipper's invoice', 'Post purchase invoice', and 'Use voyage tracking' selected for their respective requirements.

Explanation:

Answer Area

This screenshot shows the configuration table with the 'Option' column dropdowns set to 'Post shipper's invoice', 'Post purchase invoice', and 'Use voyage tracking', but no options are selected within the dropdowns.

Requirement	Option
Update item's final inventory cost.	Post shipper's invoice
Update shipped item's ownership.	Post purchase invoice
Update shipment's tracking.	Use voyage tracking

NEW QUESTION # 385

You are a functional consultant for a company named Contoso Entertainment System USA (USMF).

USMF recently experienced issues with a transport company. Many packages were returned because the boxes were opened during delivery.

Users in the sales department are creating sales order returns for the returned open boxes.

You need to configure the system to ensure that the sales department users can select a predefined description of Open Box for each sales order return.

To complete this task, sign in to Dynamics 365 portal.

Answer:

Explanation:

See explanation below.

Explanation

You need to configure a Return Reason Code.

* Click Sales and marketing > Setup > Sales orders > Returns > Return reason codes.

* Press CTRL + N to create a new return reason code line.

* In the Return reason code field, enter text to identify this code (enter Open Box).

* In the Description field, enter text to describe the return reason code.

* Use the Return reason code group drop-down list to add the code to a return reason code group.

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/service-management/set-up-return-reason-code>

NEW QUESTION # 386

A company is implementing Dynamics 365 Supply Chain Management.

The company wants to configure the quality orders and nonconformances for the following tasks:

* Recording timesheets associated with repair costs

* Documenting outcomes of test results

* Creating a certificate of analysis

You need to configure the features for these tasks.

What should you configure? To answer, drag the appropriate features to the correct tasks. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area	Feature
Quality order	Task	
Nonconformance	Recording timesheets associated with repair costs	
	Documenting outcomes of test results	
	Creating a certificate of analysis	

Answer:

Explanation:

Features	Answer Area	Feature
Quality order	Task	
Nonconformance	Recording timesheets associated with repair costs	Nonconformance
	Documenting outcomes of test results	Quality order
	Creating a certificate of analysis	Quality order

Explanation

Graphical user interface, text, application Description automatically generated

Task	Feature
Recording timesheets associated with repair costs	Nonconformance
Documenting outcomes of test results	Quality order
Creating a certificate of analysis	Quality order

NEW QUESTION # 387

A donut company is implementing Dynamics 365 Supply Chain Management.

The company wants to set up and maintain formula items for donut production. If the formula quantity changes, all ingredients must automatically adjust with no manual edits.

You must configure the formula features.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a configuration interface with two sections. The first section is titled "Configuration" and contains the text "Configure item component consumption." To its right is a dropdown menu with the following options: Backflush, Fixed, Constant, and Variable. The second section is titled "Feature" and contains the text "Enable the formula feature." To its right is another dropdown menu with the following options: Scalable, Signature, Step, and Version. A watermark "prep4away.com" is visible across the image.

Answer:

Explanation:

This is an annotated version of the screenshot above. It shows the same configuration interface, but with dashed green boxes highlighting the selected options. In the first dropdown menu, the "Variable" option is highlighted. In the second dropdown menu, the "Scalable" option is highlighted. A watermark "prep4away.com" is visible across the image.

Explanation

Box 1: Variable

Box 2: Scalable

Use the Scalable feature

The Scalable feature is available only if all the item components in the formula are set to Variable consumption. The feature isn't available if item components are set to Fixed consumption or Step consumption. When the Scalable feature is used, if you change an ingredient in a formula, the quantity of the other ingredients that you select is adjusted. The size of the formula is also adjusted. Likewise, if you change the formula size, the quantity of all scalable ingredients is changed. This feature is intended specifically for formula creation and maintenance. It doesn't indicate whether the quantity of an ingredient will be scaled up or down on a batch order.
