

800-150認證資料 - 800-150考題

從Google Drive中免費下載最新的Fast2test 800-150 PDF版考試題庫：https://drive.google.com/open?id=16Rbv9JCp_i9M6sK_a-Ae7lnJDR64rybI

購買最新的800-150考古題，您將擁有100%成功通過800-150考試的機會，我們產品的品質是非常好的，而且更新的速度也是最快的。題庫所有的問題和答案都與真實的考試相關，我們的Cisco 800-150軟件版本的題庫可以讓您體驗真實的考試環境，支持多臺電腦安裝使用。800-150題庫學習資料將會是您通過此次考試的最好保證，還在猶豫什麼，請盡早擁有Cisco 800-150考古題吧！

Cisco 800-150 考試大綱：

| 主題 | 簡介 |
|------|--|
| 主題 1 | <ul style="list-style-type: none"> • Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions. |
| 主題 2 | <ul style="list-style-type: none"> • Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities. |

| | |
|------|---|
| 主題 3 | <ul style="list-style-type: none">• Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems. |

使用保證通過的Cisco 800-150認證資料高效率地學習您的Cisco 800-150考試

如果你覺得你購買Fast2test Cisco的800-150考試培訓資料利用它來準備考試是一場冒險，那麼整個生命就是一場冒險，走得最遠的人常常就是願意去做願意去冒險的人。更何況Fast2test Cisco的800-150考試培訓資料是由眾多考生用實踐證明了，它帶給每位考生的成功也是真實有效的，成功有夢想和希望固然重要，但更重要的是去實踐和證明，Fast2test Cisco的800-150考試培訓資料是被證明一定會成功的，選擇了它，你還有什麼理由不成功呢！

最新的 Cisco Certified Field Technician (CCT) 800-150 免費考試真題 (Q86-Q91):

問題 #86

Which two components are accessed by removing the chassis cover on Cisco Catalyst 8000 Series Edge platforms? (Choose two.)

- A. Transceivers
- B. Fan trays
- C. DIMMs
- D. Network Interface Modules
- E. SSDs

答案: C,E

解題說明:

On Cisco Catalyst 8000 Series Edge platforms, removing the chassis cover provides access to internal components such as DIMMs (Dual In-line Memory Modules) and SSDs (Solid-State Drives). These components are located internally and require the removal of the chassis cover for maintenance or replacement.

DIMMs are used for system memory and are essential for the router's operation.

SSDs provide storage for system software and configurations.

Other components like Network Interface Modules (NIMs) and transceivers are typically accessible externally and do not require chassis cover removal.

問題 #87

When should a crossover UTP cable be used instead of a straight-through cable when connecting network devices?

- A. To connect a switch to a router
- B. To connect a PC to a wireless access point
- C. To connect electrically like devices
- D. To connect electrically unlike devices

答案: C

解題說明:

A crossover UTP (Unshielded Twisted Pair) cable is used to connect two similar devices directly. This includes:

Switch to switch
Router to router
PC to PC

The crossover cable reverses the transmit and receive pairs, allowing for proper communication between like devices without the need for an intermediary device.

Conversely, a straight-through cable is used to connect dissimilar devices, such as:

PC to switch

Router to switch

PC to router

This cable maintains the same wiring on both ends, suitable for connecting different types of devices.

Therefore, when connecting electrically like devices, a crossover cable is appropriate.

問題 #88

Which two cloud computing services are vendor-managed in an Infrastructure as a Service (IaaS) delivery model? (Choose two.)

- A. Networking
- B. Storage
- C. Data
- D. Operating System
- E. Applications

答案: A,B

解題說明:

In the Infrastructure as a Service (IaaS) model, the cloud provider is responsible for managing and maintaining the underlying infrastructure components, including:

Networking: The cloud provider handles all aspects of network configuration, hardware, and virtual networking.

Storage: The cloud provider supplies and manages the physical and virtual storage infrastructure required to support the consumer's data needs.

The customer is responsible for managing:

Operating Systems

Applications

Data

This model offers flexibility while shifting infrastructure maintenance responsibilities to the service provider.

問題 #89

What is the primary purpose of changing the configuration register when performing password recovery?

- A. To erase the entire configuration
- B. To unlock all user accounts
- C. To enable advanced debugging features
- D. To ignore the startup configuration

答案: D

解題說明:

During password recovery on Cisco devices, the configuration register is modified to instruct the device to bypass the startup configuration stored in NVRAM. This allows administrators to access the device without being prompted for existing passwords.

The standard procedure involves changing the configuration register value to 0x2142, which tells the device to ignore the startup configuration during the next boot. Once access is gained, the administrator can reset passwords and then restore the original configuration by resetting the configuration register to its default value, typically 0x2102.

問題 #90

What are two indicators that a network interface card must be replaced? (Choose two.)

- A. Connectivity problems
- B. Consistent link down status
- C. Inability to save configurations
- D. Boot failures

- E. Frequent system crashes

答案: A,B

解題說明:

A Network Interface Card (NIC) is essential for device connectivity. Two common symptoms indicating that a NIC may be faulty and require replacement are:

- * Connectivity problems (Option A): Devices may fail to communicate with the network, showing no IP address assignment or inability to ping/connect to other devices.
- * Consistent link down status (Option D): The link LED may stay off or frequently go down, even when connected to a functioning switch port with a known-good cable.

Other options like configuration issues (Option B) or system crashes (Option E) might be due to software or unrelated hardware components, and boot failures (Option C) typically point to motherboard or storage faults.
