SAP Certified Associate - SAP SuccessFactors Employee Central Core Sample Questions (Q17-Q22):

NEW QUESTION # 17

You want the Timezone field to be pre-populated when the location record is changed in Job Info. How do you configure this?

- A. Base Object: Location; Assigned to Timezone field as onChange
- B. Base Object: Job Information; Assigned to Timezone field as onChange
- **C. Base Object: Job Information; Assigned to Location field as onChange**
- D. Base Object: Location; Assigned to Timezone field as onSave

Answer: C

Explanation:

To pre-populate the Timezone field when the location record is changed in Job Information, you need to configure the association as follows:

* Base Object: Job Information

* Trigger Event: Assigned to the Location field with the event set to onChange. This configuration ensures that whenever the Location field is updated in Job Information, the system triggers the logic to update and pre-populate the Timezone field based on the associated Location. The onChange event drives this functionality.

NEW QUESTION # 18

Due to confidentiality reasons, when the HR Business Partner (maintained in Job Relationship) is creating a change in salary for an employee, this action will need to be approved by the manager of the HR Business Partner creating the request.

How do you define this in the workflow when filling in the Approver Type, Approver Role, Context, and Relationship to Approver? Refer to the screenshot to answer the question

- A. By selecting in Step 1: Role - Employee HR - Source - Employee
- B. By selecting in Step 1: Role - Self-Source - Initiator
- C. By selecting in Step 1: Role - Employee HR-Source- Initiator
- **D. By selecting in Step 1: Role - Manager - Source - Initiator**

Answer: D

Explanation:

To ensure that the salary change initiated by the HR Business Partner is approved by their manager, you need to configure the workflow with the following details:

* Approver Type: Manager

* Approver Role: Manager

* Context: Initiator (this ensures the approval request is routed to the manager of the person initiating the workflow).

* Relationship to Approver: From the initiator's position, the system derives the relationship to their manager.

Selecting Role: Manager - Source: Initiator in Step 1 aligns with these requirements.

Scenario 2: Approvals for Self-Service

NEW QUESTION # 19

The HR admin has to change the salary of an employee, which will trigger a workflow for the employee's manager. The employee's manager should be able to edit the transaction if the proposed amount is NOT correct.

Where in the workflow do you need to define this?

Refer to the screenshot to answer the question

- A. Context
- **B. Edit Transaction**
- C. No Approver Behavior
- D. Respect Permission

Answer: B

Explanation:

To allow the employee's manager to edit a transaction in a workflow if the proposed salary change is incorrect, you must configure the "Edit Transaction" setting in the workflow.

The "Edit Transaction" option is part of the workflow configuration in Step 1 (as shown in the screenshot).

When enabled, it allows the approver (in this case, the manager) to make adjustments to the transaction before approving it.

Scenario 2: Approvals for Self-Service

NEW QUESTION # 20

Which action will trigger a system validation for an in-progress workflow?

- **A. Terminating an employee**
- B. Adding a new employee
- C. Rehiring an inactive employee
- D. Updating Job Information with the same effective date

Answer: A

Explanation:

Updating Job Information with the same effective date triggers a system validation for an in-progress workflow.

When an in-progress workflow exists, updates to Job Information with the same effective date can cause conflicts, as the system needs to validate if the changes are permissible without interfering with the pending workflow.

This is designed to ensure data consistency and avoid duplicate or conflicting entries.

Other options, such as rehiring, adding a new employee, or terminating an employee, are not related to triggering validations for in-progress workflows.

NEW QUESTION # 21

Which clause meets the WFD_Address rule requirement?

□

- A. Option A
- B. Option C
- C. Option B
- **D. Option D**

Answer: D

Explanation:

The clause in Option D meets the WFD_Address rule requirement because it checks the following conditions comprehensively:
Address is not equal to Null.

City and CountryRegion are equal to Null.

When these conditions are met, it sets the configuration for Address Change accordingly, ensuring data completeness and accuracy for address-related transactions.

Scenario 1: HR Transaction Rules
