### OG0-093 dumps torrent: TOGAF 9 Combined Part 1 and Part 2 & OG0-093 valid test

After successful competition of the The Open Group OG0-093 certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the TOGAF 9 Combined Part 1 and Part 2 (OG0-093) certification exam is the proven way to achieve these tasks quickly.

## The Open Group TOGAF 9 Combined Part 1 and Part 2 Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Scenario: Global Traders Inc.

Please read this scenario prior to answering the question

Global Traders is a large, global commodities trading company which has been growing rapidly through a series of acquisitions. Each new business is performing well in its markets. However, the lack of integration between headquarters and the business units has increasingly caused problems in the handling of customer and financial information. The inability to share information across businesses has resulted in lost opportunities to "leverage the synergies" that had been intended when the businesses were acquired. At present, each business unit maintains its own applications. Despite an earlier initiative to install a common application to manage customer, products, supplier, and inventory information, each business unit has different ways of defining each of these core elements and has customized the common application to the point where the ability to exchange information is difficult, costly, and error-prone.

As a result, Global Traders has begun implementing a single Enterprise Resource Planning (ERP) system to consolidate information from several applications that exist across the lines of business.

The Corporate Board is concerned that the new ERP system must be able to manage and safeguard customer information in a manner that meets or exceeds the legal requirements of the countries in which the company operates. This will be an increasingly important capability as the company expands its online services offered to clients and trading partners.

The CIO has formed an Enterprise Architecture department, and one of the primary goals in its charter is to coordinate efforts between the ERP implementation team and the business unit personnel who will be involved in the migration process. The CIO has also formed a cross-functional Architecture Review Board to oversee and govern the architecture. Global Traders has selected TOGAF 9 as the basis for its Enterprise Architecture program. The CIO has endorsed this choice with the full support of top management.

Refer to the Global Traders Inc. Scenario

You are serving as the Chief Architect.

You have been asked to recommend the approach to take in the Preliminary Phase to ensure that the Corporate Board's concern is addressed.

Based on TOGAF 9, which of the following is the best answer?

- A. You evaluate the implications of the Board's concern in terms of regulatory requirements and their impact on business goals and objectives. Based on this understanding, you then issue a Request for Architecture Work to commence an architecture development project to develop a solution that will address the Board's concern. You allocate a security architect to oversee the implementation of the solution in the ERP system that is being developed.
- B. You start by clarifying the intent that the Board has for raising this concern. This enables you to understand the implications of the concern in terms of regulatory requirements and the potential impact on current business goals and objectives. You propose that a security architect or security architecture team be allocated to develop a comprehensive security architecture.
- C. You evaluate the implications of the Board's concern by examining the potential impacts on business goals and objectives. Based on your understanding, you then update the current Global Traders security policy to include an emphasis on the Board's concern. In addition, you allocate a security architect to ensure that security considerations are included in the architecture planning for all domains.
- D. You evaluate the implications of the Board's concern in terms of regulatory and security policy requirements. You then update the Global Traders security policy to reflect the concern, ensuring that this policy is communicated across the organization. You allocate a security architecture team to ensure that security considerations are included in ongoing architecture planning. You then assess the security implications and agreements within the Global Traders businesses and their suppliers.

**Answer: C**

### NEW QUESTION # 40

Complete the sentence. TOGAF covers the development of four architecture domains, Application, Business, Data and \_\_\_\_\_.

- A. Capability
- B. Transition
- C. Segment
- D. Technology
- E. Vision

**Answer: D**

**NEW QUESTION # 41**

In TOGAF, what is the difference between an artifact and a deliverable?

- A. Deliverables are reusable, whereas artifacts are unique to a given architecture project
- B. Artifacts and deliverables are synonymous; there is no difference between them
- C. Deliverables are prepared by the Project Manager, whereas artifacts are defined by the Architect
- D. An artifact contains one or more deliverables
- E. Deliverables are specified as contractual outputs from a project, whereas artifacts are not

**Answer: E**

Explanation:

Section: Part 2

Explanation/Reference:
