After you really improve your strength, you will find that your strength can bring you many benefits. Users of our AZ-500 practice prep can prove this to you. You have to believe that your strength matches the opportunities you have gained. And the opportunities you get are the basic prerequisite for your promotion and salary increase. After you use our AZ-500 Exam Materials, you will more agree with this. With the help of our AZ-500 study guide, nothing is impossible to you.

Microsoft AZ-500 certification exam is an excellent choice for professionals looking to advance their careers in cloud security. Microsoft Azure Security Technologies certification is highly respected in the industry, and it demonstrates that the holder has the skills and knowledge required to secure Azure environments effectively. It also provides a solid foundation for other Azure certifications, such as the Azure Solutions Architect Expert certification.

Exam Aspects

The first thing that you need to know about the Microsoft AZ-500 Exam is that it costs \$165. The test is going to be 150 minutes long, and during this time, the applicants will have to attempt more than 40 multiple-choice questions. Although this seems like a long

time, you will still need to manage it wisely if you wish to answer all the questions. Without the right test-taking skills, you may have a difficult time passing the exam.

Your questions on AZ-500 Exam Dumps will be answered accurately and quickly. We are still working hard to satisfy your demands.

What are the requirements for the Microsoft AZ-500 Exam?

The potential candidates for this certification exam are Azure Security Engineers. These specialists serve as the members of a bigger team that works on Cloud-based security and management or hybrid environments. Although the test has no official prerequisites, it is recommended that the students have a good understanding of the exam topics. The applicants should also have the skills in automation and scripting as well as an extensive understanding of networking and virtualization. It's also important that the individuals get familiar with Cloud capabilities as well as Azure services and products and other products and services offered by Microsoft.

Microsoft Azure Security Technologies Sample Questions (Q290-Q295):

NEW QUESTION # 290

You are troubleshooting a security issue for an Azure Storage account.

You enable the diagnostic logs for the storage account.

What should you use to retrieve the diagnostics logs?

- A. Azure Security Center
- B. SQL query editor in Azure
- C. File Explorer in Windows
- **D. Azure Storage Explorer**

Answer: D

Explanation:

If you want to download the metrics for long-term storage or to analyze them locally, you must use a tool or write some code to read the tables. You must download the minute metrics for analysis. The tables do not appear if you list all the tables in your storage account, but you can access them directly by name. Many storage-browsing tools are aware of these tables and enable you to view them directly (see Azure Storage Client Tools for a list of available tools).

Microsoft provides several graphical user interface (GUI) tools for working with the data in your Azure Storage account. All of the tools outlined in the following table are free.

Reference:

<https://docs.microsoft.com/en-us/azure/storage/common/storage-analytics-metrics?toc=%2fazure%2fstorage%2fblobs%2ftoc.json>

<https://docs.microsoft.com/en-us/azure/storage/common/storage-explorers>

NEW QUESTION # 291

Your company has an Azure subscription named Subscription1 that contains the users shown in the following table.

The company is sold to a new owner.

The company needs to transfer ownership of Subscription1.

Which user can transfer the ownership and which tool should the user use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/billing/billing-subscription-transfer#transfer-billing-ownership-of-an-azure-subscription>

NEW QUESTION # 292

You have an Azure subscription that contains the resources shown in the following table.

☐ You perform the following tasks:

Create a managed identity named Managed1.

Create a Microsoft 365 group named Group1.

You need to identify which service principals were created and which identities can be assigned the Reader role for RG1. What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 293

You need to ensure that you can meet the security operations requirements. What should you do first?

- A. Modify the Security Center workspace configuration.
- B. Integrate Security Center and Microsoft Cloud App Security.
- C. Turn on Auto Provisioning in Security Center.
- **D. Upgrade the pricing tier of Security Center to Standard.**

Answer: D

Explanation:

Section: [none]

Explanation:

The Standard tier extends the capabilities of the Free tier to workloads running in private and other public clouds, providing unified security management and threat protection across your hybrid cloud workloads. The Standard tier also adds advanced threat detection capabilities, which uses built-in behavioral analytics and machine learning to identify attacks and zero-days exploits, access and application controls to reduce exposure to network attacks and malware, and more.

Scenario: Security Operations Requirements

Litware must be able to customize the operating system security configurations in Azure Security Center.

NEW QUESTION # 294

You implement the planned changes for ASG1 and ASG2.

In which NSGs can you use ASG1, and the network interfaces of which virtual machines can you assign to ASG2?

Answer:

Explanation:

☐ Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated
