**100% Pass-Rate H12-821\_V1.0 Exam Overview & Leading Offer in Qualification Exams & First-Grade Huawei HCIP-Datacom-Core Technology V1.0**

With these adjustable HCIP-Datacom-Core Technology V1.0 (H12-821\_V1.0) mock exams, you can focus on weaker concepts that need improvement. This approach identifies your mistakes so you can remove them to master the H12-821\_V1.0 exam questions of Real4test give you a comprehensive understanding of H12-821\_V1.0 Real Exam format. Self-evaluation by taking practice exams makes your Huawei H12-821\_V1.0 exam preparation flawless and strengthens enough to crack the test in one go.

## Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q93-Q98):

### NEW QUESTION # 93

Administrators can use the import-route command to introduce OSPF under different process IDs to each other.

- A. TRUE
- B. FALSE

**Answer: A**

### NEW QUESTION # 94

On an RSTP network, port roles are optimized to overcome the disadvantages of STP. Which of the following port roles are supported in RSTP?

- A. Backup port
- B. Alternate port
- C. Root port
- D. Designated port

**Answer: A,B,C,D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

\* STP Port Roles:

\* Root Port (RP) # Connects directly to the Root Bridge.

\* Designated Port (DP) # Forwards traffic for a given segment.

\* RSTP introduces two additional roles to improve redundancy:

\* Backup Port # A redundant Designated Port (on the same switch).

\* Alternate Port # A backup Root Port (path to the Root Bridge).

\* All four roles exist in RSTP, making the correct answer A, B, C, D.

# Reference: Huawei HCIA-Datacom Study Guide, RSTP Port Roles and Rapid Convergence.

### NEW QUESTION # 95

The following is part of the output information of the router RTD.

```
<RID>display igmp-snooping IGMP Snooping Information for VLAN 3 IGMP Snooping is Enabled IGMP IP Version is Set to default 2 IGMP Query Interval is Set to default 60 IGMP Max Response Interval is Set to default 10 IGMP Robustness is Set to default 2 IGMP Lase Weniber Query Interval is Set to default 1 IGMP Router Port Aging Interval is Set to 180s or holdtime in hello
```

Which of the following description of the output information is wrong?

- A. The display igmp-snooping command is used to view the IGMP Snooping configuration information on the VLAN
- B. IGMP Snooping of VLAN3 is enabled
- C. The version of the IGMP message that can be processed in VLAN3 is the default value
- D. The maximum response time of IGMP in VLAN3 is the default value, which is 60 seconds

**Answer: D**

### NEW QUESTION # 96

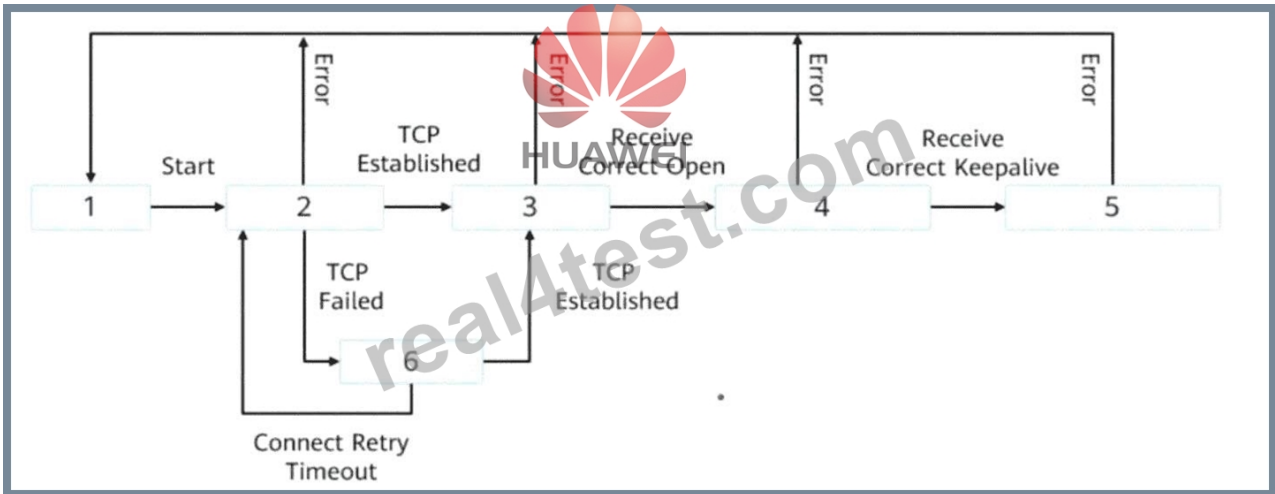

When two routers exchange database information through DD messages, a master-slave relationship is first formed. The one with the larger DR Priority becomes the master router, and its master-slave bit is determined to be MS.

- A. TRUE
- B. FALSE

Answer: B

NEW QUESTION # 97

The following figure shows the BGP state switching mechanism. Drag the following BGP states to the corresponding sequence numbers.

OpenConfirm		1
Idle		2
OpenSent		3
Connect		4
Established		5
Active		6

Answer:

Explanation:

OpenConfirm	Idle	1
Idle	Connect	2
OpenSent	OpenSent	3
Connect	OpenConfirm	4
Established	Established	5
Active	Active	6

Explanation:

- 1 - Idle
- 2 - Connect
- 3 - OpenSent
- 4 - OpenConfirm
- 5 - Established

6 - Active

The BGP finite state machine defines how a BGP speaker transitions through various states when establishing and maintaining a BGP session. Below is the role of each state:

Idle (1)- BGP is waiting to start a connection. Initial state of the BGP process.

Connect (2)- BGP initiates a TCP connection to the peer.

OpenSent (3)- TCP connection is established; BGP sends an OPEN message and waits for one from the peer.

OpenConfirm (4)- BGP has received a valid OPEN message and is now expecting a KEEPALIVE.

Established (5)- BGP session is fully established; UPDATE messages can now be exchanged.

Active (6)- If the TCP connection fails in Connect state, BGP transitions to Active and will retry connection.

Reference from Huawei HCIP-Datacom-Core Technology Study Guide:

"BGP goes through the following states in order: Idle # Connect # Active # OpenSent # OpenConfirm # Established. The transition depends on the success or failure of TCP connection setup and BGP message exchanges." (Chapter: BGP Principles - Section: BGP State Machine)

## NEW QUESTION # 98

.....

We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our H12-821\_V1.0 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our H12-821\_V1.0 latest material. And we keep ameliorate our H12-821\_V1.0 latest material according to requirements of H12-821\_V1.0 Exam. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of H12-821\_V1.0 real questions. The customer-service staff will be with you all the time to smooth your acquaintance of our H12-821\_V1.0 latest material.
