Exam DEP-2025 Revision Plan, DEP-2025 Detailed Study Plan

Our DEP-2025 study materials are designed by a reliable and reputable company and our company has rich experience in doing research about the study materials. We can make sure that all employees in our company have wide experience and advanced technologies in designing the DEP-2025 Study Materials. So a growing number of the people have used our study materials in the past years, and it has been a generally acknowledged fact that the quality of the DEP-2025 study materials from our company is best in the study materials market.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 2	<ul style="list-style-type: none"> • Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 3	<ul style="list-style-type: none"> • Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 4	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 5	<ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 6	<ul style="list-style-type: none"> • Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 7	<ul style="list-style-type: none"> • Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 8	<ul style="list-style-type: none"> • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.

Apple Deployment and Management Exam Sample Questions (Q182-Q187):

NEW QUESTION # 182

Which feature can MDM manage to prevent re-use of a lost or stolen Mac?

- **A. Activation Lock**
- B. Device Lock
- C. Managed Find My
- D. Managed Lost Mode

Answer: A

Explanation:

Activation Lock prevents reuse. The macOS Security Overview states, "Activation Lock, manageable via MDM, prevents a lost or stolen Mac from being reactivated without the owner's credentials." Option C is iOS- specific.

References:

macOS Security Overview, "Activation Lock" section.

Apple Platform Deployment Guide, "Security Features" section.

NEW QUESTION # 183

Which type of Apple ID is required for User Enrollment?

- **A. Managed Apple ID**
- B. Apple ID
- C. Personal Apple ID

- D. Shared Apple ID

Answer: A

Explanation:

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data cryptographically. Created via Apple Business Manager (ABM) or Apple School Manager (ASM), Managed Apple IDs enable organizational policies while preserving user privacy. Personal Apple IDs (options A and C, the same) are not used for User Enrollment, as they lack organizational control. There's no "Shared Apple ID" (option D); Shared iPad uses Managed Apple IDs differently. The Apple Platform Deployment Guide mandates Managed Apple IDs for User Enrollment.

NEW QUESTION # 184

Which organization data is separated from user data when an iPhone enrolls in MDM with User Enrollment?

- **A. Notes**
- B. Safari profiles
- C. Contacts
- D. Safari bookmarks

Answer: A

Explanation:

User Enrollment separates managed data. The iOS Deployment Reference states, "With User Enrollment, managed data such as Notes associated with a Managed Apple ID is separated from personal data." Options A, B, and D aren't inherently separated unless tied to managed apps.

Reference:

iOS Deployment Reference, "User Enrollment" section.

Apple Platform Deployment Guide, "Data Separation" section.

NEW QUESTION # 185

A user enrolled their personal iPhone in the organization's MDM solution. Which management capability does the organization's MDM solution have on the user's iPhone?

- A. Access device location
- B. Disable Activation Lock
- **C. Require a passcode**
- D. Remotely wipe the entire device

Answer: C

Explanation:

Apple differentiates between User Enrollment (for BYOD) and Device Enrollment (for organization-owned devices). For personal devices enrolled through User Enrollment, MDM has limited capabilities to protect privacy. Apple Learning emphasizes that MDM cannot track personal location data, cannot wipe the entire device, and cannot disable user features like Activation Lock. However, MDM retains control over organizational data and can enforce a device passcode requirement. This ensures that managed apps and accounts are protected by encryption at rest. If the user removes the passcode, the device will become non-compliant, and organizational data may be removed. This limited but critical control balances enterprise security with personal user privacy.

References: Apple Platform Deployment - "Management capabilities of User Enrollment."

NEW QUESTION # 186

In which ownership model can IT administrators restrict the installed apps and personal data on a device meant to be shared with multiple users?

- A. Personally enabled, organization-owned
- B. BYOD, User Enrollment
- **C. Nonpersonalized, organization-owned**
- D. BYOD, personally enabled

Answer: C

Explanation:

The nonpersonalized, organization-owned model is designed for shared or single-purpose devices, such as Shared iPads in education or kiosks in businesses. In this model, IT administrators centrally configure and manage the devices, restricting installed apps and personal data to ensure consistency and security across multiple users. BYOD, User Enrollment (option A) and BYOD, personally enabled (option B) involve personal devices with user control, not shared use. Personally enabled, organization-owned (option D) allows personalization, unsuitable for shared scenarios. The Apple Platform Deployment Guide details this model for shared device management.

NEW QUESTION # 187

.....

You will get high passing score in the Apple DEP-2025 Real Exam with our valid test questions and answers. TorrentExam can provide you with the most reliable DEP-2025 exam dumps and study guide to ensure you get certification smoothly.
