NEW QUESTION # 75

There are several flows showing on the payroll dashboard that are incomplete. What action should be taken to complete the flow and remove it from showing on the dashboard?

- A. From the Payroll Calculation Work Area, highlight the flow and select the rollback all tasks action.
- B. From the Payroll Calculation Work Area, highlight the flow and select the delete flow action.
- C. From the Payroll Calculation Work Area, highlight the flow and select the skip all tasks action.
- D. From the Payroll Calculation Work Area, highlight the flow and select the complete flow action.

Answer: A

Explanation:

In Oracle Payroll Cloud, incomplete flows on the payroll dashboard indicate that a payroll process (e.g., Calculate Payroll) has not fully completed due to errors or interruptions. To resolve this and remove the flow from the dashboard, the recommended action is to rollback all tasks from the Payroll Calculation Work Area (Option B). Rolling back the tasks reverses the incomplete process, allowing users to address any issues (e.g., data errors) and resubmit the flow. Option A (skip all tasks) does not resolve the underlying issue and leaves the flow incomplete. Option C (complete flow action) is not a valid action for an incomplete flow, as completion requires successful task execution. Option D (delete flow action) is not applicable, as flows cannot be arbitrarily deleted from the dashboard without proper resolution. The rollback action ensures data integrity and is the standard approach per Oracle documentation.
