100% Pass Nutanix - High-quality Valid NCP-US Exam Labs

If you want to through the Nutanix NCP-US certification exam to make a stronger position in today's competitive IT industry, then you need the strong expertise knowledge and the accumulated efforts. And pass the Nutanix NCP-US exam is not easy. Perhaps through Nutanix NCP-US exam you can promote yourself to the IT industry. But it is not necessary to spend a lot of time and effort to learn the expertise. You can choose DumpsQuestion's Nutanix NCP-US Exam Training materials. This is training product that specifically made for IT exam. With it you can pass the difficult Nutanix NCP-US exam effortlessly.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q88-Q93):

NEW QUESTION # 88

Within the Prism Central Entity > Services > Objects menu option, what is the correct task order for creating an object storage?

Answer:

Explanation:

NEW QUESTION # 89

An administrator successfully installed Objects and was able to create a bucket. When using the reference URL to access this Objects store, the administrator is unable to write data in the bucket when using an Active Directory account. Which action should the administrator take to resolve this issue?

- A. Verify Access Keys for the user.
- **B. Verify sharing policies at the bucket level.**
- C. Reset the Active Directory user password.
- D. Replace SSL Certificates at the Objects store level.

Answer: B

NEW QUESTION # 90

An administrator has created a multi-protocol department share on Nutanix Files with the following configuration:

Max size of 800GB

SMB as the primary protocol

NFS configured for read-write access

Quota policy for AD group HR, limiting to 20GB

Second quota policy of 30GB for AD group Finance

A user who is a member of the HR group receives daily email notifications that they have consumed all available space but is still able to write new files. Another user in the Finance group using Linux can write files and receives no email notification.

What should an administrator do to restrict the HR user from writing new data?

- A. Set a user level quota.

- B. Remove the default quota policy.
- C. Reduce the Finance quota limit.
- D. Set hard limit enforcement.

Answer: D

NEW QUESTION # 91

Refer to the exhibit.

An administrator is currently troubleshooting a failed Nutanix Objects deployment using LCM and sees the error message shown in the exhibit.

The Objects cluster deployment is experiencing the following symptoms:

- * The Objects Home UI Page shows the error: unable to pull the docker images
- * The docker pull is failing on the first image

The administrator determined that MSP cluster deployment has completed successfully looking at msp_controller.out.

Which log file should the administrator use to investigate and troubleshoot this issue further?

- A. domain_manager.out
- B. lcm_metrics_uploader.out
- C. cluster_health.out
- D. aoss_service_manager.out

Answer: D

NEW QUESTION # 92

An administrator is building a new application server and has decided to use post-process compression for the file server and inline compression for the database components.

The current environment has these characteristics:

Two Volume Groups named VG1 and VG2.

A Storage Container named SC1 with inline-compression.

A Storage Container named SC2 with post-process compression.

Which action should the administrator take to most efficiently satisfy this requirement?

- A. Within SC1, create one vDisk in VG1 and one vDisk in VG2,
- B. Within SC1, create one vDisk in VG1 and within SC2, create one vDisk in VG2
- C. Within VG1, create one vDisk in SC1 and one vDisk in SC2.
- D. Within VG1, create one vDisk in SC1 and within VG2, create one vDisk in SC2.

Answer: D

Explanation:

Volume Groups (VGs) are collections of vDisks that can be attached to VMs1. vDisks are virtual disks that reside on Storage Containers2. Storage Containers are logical entities that provide storage services with different compression options3.

To use post-process compression for the file server and inline compression for the database components, you need to create two vDisks on different Storage Containers with different compression options. Then you need to attach those vDisks to different VGs.
