Splunk Core Certified Power User Exam Sample Questions (Q62-Q67):

NEW QUESTION # 62
Which of the following statements describe the search string below?
| datamodel Application_State All_Application_State search

- A. Events will be returned from the data model named Application_State.
- B. No events will be returned because the pipe should occur after the datamodel command
- C. Events will be returned from dataset named Application_state.
- D. Events will be returned from the data model named All_Application_state.

Answer: C

NEW QUESTION # 63
Which of the following searches would create a graph similar to the one below?

- A. index_internal seourcetype=Savesplunker | fields sourcetype, status | transaction status maxspan-id | timechart count by status
- B. index_internal seourcetype=Savesplunker | fields sourcetype, status | transaction status maxspan-id | chart count states by -time
- C. index_internal seourcetype=Savesplunker | fields sourcetype, status | transaction status maxspan-id | start count states
- D. None of these searches would generate a similart graph.

Answer: A

Explanation:
The following search would create a graph similar to the one below:
index_internal sourcetype=Savesplunker | fields sourcetype, status | transaction status maxspan=1d | timechart count by status The search does the following:
* It uses index_internal to specify the internal index that contains Splunk logs and metrics.
* It uses sourcetype=Savesplunker to filter events by the sourcetype that indicates the Splunk Enterprise Security app.
* It uses fields sourcetype, status to keep only the sourcetype and status fields in the events.
* It uses transaction status maxspan=1d to group events into transactions based on the status field with a maximum time span of one day between the first and last events in a transaction.

* It uses timechart count by status to create a time-based chart that shows the count of transactions for each status value over time.
The graph shows the following:
* It is a line graph with two lines, one yellow and one blue.
* The x-axis is labeled with dates from Wed, Apr 4, 2018 to Tue, Apr 10, 2018.
* The y-axis is labeled with numbers from 0 to 15.
* The yellow line represents "shipped" and the blue line represents "success".
* The yellow line has a steady increase from 0 to 15, while the blue line has a sharp increase from 0 to 5, then a decrease to 0, and then a sharp increase to 10.
* The graph is titled "Type".
Therefore, option C is the correct answer.

NEW QUESTION # 64
The limit attribute will_____.

- A. override default of 10
- B. only work with top command
- C. override default of 15
- D. override default of 20

Answer: A

NEW QUESTION # 65
The gauge command:

- A. creates a radial gauge visualization
- B. allows you to set colored ranges for a single-value visualization
- C. creates a single-value visualization

Answer: B

NEW QUESTION # 66
Which of the following statements describes macros?

- A. A macro is a reusable search string that must have a fixed time range.
- B. A macro Is a reusable search string that must contain only a portion of the search.
- C. A macro Is a reusable search string that may have a flexible time range.
- D. A macro is a reusable search string that must contain the full search.

Answer: C

Explanation:
Reference: https://docs.splunk.com/Documentation/Splunk/8.0.3/Knowledge/Definesearchmacros A macro is a reusable search string that can contain any part of a search, such as search terms, commands, arguments, etc. A macro can have a flexible time range that can be specified when the macro is executed. A macro can also have arguments that can be passed to the macro when it is executed. A macro can be created by using the Settings menu or by editing the macros.conf file. A macro does not have to contain the full search, but only the part that needs to be reused. A macro does not have to have a fixed time range, but can use a relative or absolute time range modifier. A macro does not have to contain only a portion of the search, but can contain multiple parts of the search.
