You need no internet connection for it to function. The Internet is only required at the time of product license validation.

PECB ISO-45001-Lead-Auditor Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Fundamental audit concepts and principles: This section of the exam measures the skills of Internal Auditors and covers the basic concepts and principles related to auditing an OHSMS. It focuses on understanding audit types, methodologies, and the role of audits in compliance and improvement. One skill to be measured is conducting effective audits to assess OHSMS performance.
Topic 2	<ul style="list-style-type: none">Fundamental principles and concepts of an occupational health and safety management system: This section of the exam measures the skills of Health and Safety Managers and covers the essential principles and concepts underlying an occupational health and safety management system (OHSMS). It focuses on understanding the framework for managing health and safety risks to prevent workplace injuries and illnesses. One skill to be measured is identifying key components of an effective OHSMS.
Topic 3	<ul style="list-style-type: none">ISO 45001 requirements for an OH&S MS – Clauses 4 to 10: This section of the exam measures the skills of Auditors related to specific requirements outlined in ISO 45001 about occupational health and safety management systems. It emphasizes understanding clauses that address context, leadership, planning, support, operation, performance evaluation, and improvement. A skill to be measured is applying ISO 45001 requirements to organizational practices.
Topic 4	<ul style="list-style-type: none">Conducting an ISO 45001 audit: This section of the exam measures the skills of Lead Auditors and covers the execution of an ISO 45001 audit. It focuses on gathering evidence, interviewing personnel, and assessing compliance with OHSMS requirements during the audit process.
Topic 5	<ul style="list-style-type: none">Managing an ISO 45001 audit program: This section of the exam measures the skills of Audit Managers and covers the management of an ongoing ISO 45001 audit program. It focuses on scheduling audits, maintaining auditor competency, and ensuring continuous improvement within the auditing process. One skill to be measured is implementing strategies for effective audit program management.

Topic 6	<ul style="list-style-type: none"> Domain 4: Preparing for an ISO 45001 audit: This section of the exam measures the skills of Audit Consultants and covers the preparation process for conducting an ISO 45001 audit. It emphasizes planning, resource allocation, and establishing audit objectives to ensure a thorough evaluation.

New ISO-45001-Lead-Auditor Dumps Ppt | Valid ISO-45001-Lead-Auditor Test Vce

We are famous for our company made these ISO-45001-Lead-Auditor exam questions with accountability. We understand you can have more chances getting higher salary or acceptance instead of preparing for the ISO-45001-Lead-Auditor exam. Our ISO-45001-Lead-Auditor practice materials are made by our responsible company which means you can gain many other benefits as well. We offer free demos of our ISO-45001-Lead-Auditor learning guide for your reference, and send you the new updates if our experts make them freely.

PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

In the initial communication by the audit team leader for a certification audit, the OHSMS Manager asks that the audit includes detailed coverage of the OHSMS legislation of the local authority, which has been specified in a recent customer contract. Which two of the following responses should the audit team leader make?

- A. Suggest that the OHSMS Manager cancels the audit contract and reapplies to include the additional criteria.
- B. Advise the OHSMS Manager that the new criteria can be included without any problem.
- C. Add a legal expert to the audit team in order to accept the request.
- D. Inform the OHSMS Manager that an audit against the regulatory criteria may be possible but will require a new audit team.
- E. Ask the individual(s) managing the programme whether the audit criteria can be revised to include the new request.
- F. Advise the OHSMS Manager that the audit criteria has been set as ISO 45001 and the audit programme for certification will need to proceed as planned.

Answer: E,F

NEW QUESTION # 31

You are conducting a Stage 2 audit of a steel fabrication works that uses powerful presses to shape steel sheets into various car panels. You note from the accident book that more staff hours have been lost through accidents associated with the presses than those associated with any other equipment.

You question the OH&S manager who tells you, "These big presses are just inherently more dangerous than other equipment. If there is an accident, it's going to be more serious as a result of the forces at work." Which three of the following audit trails would it now be appropriate to pursue?

- A. Ask top management to explain how the reoccurring accidents would affect the setting of future OH&S objectives.
- B. Determine whether the organisation had considered changing the panels to plastic mouldings which would be less likely to cause accidents.
- C. Check that the workers who had been injured had received appropriate compensation, so they did not suffer financially from their accidents or working hours lost while recovering.
- D. Ensure that the organisation had recorded the reoccurring accidents as an external issue in its determination of context of the organisation. Ensure all interested parties had been informed.
- E. Determine whether hazard identification had taken place in respect of the pressing process. If it did, what OH&S risks were identified and what actions were instigated to mitigate these risks?
- F. Check whether the organisation has big enough finances to invest in fully automated pressing machines which would not need manual workers.
- G. Determine whether there were any maintenance issues that resulted in the machines being unsafe to use, such as broken or missing guards or faulty emergency stop buttons.

Answer: D,E,G

NEW QUESTION # 32

During a second-party audit at a sawmill, you find that the OHSMS Manager conducted the hazard identification process. In the risk assessment report, hazards were listed as physical hazards, chemical hazards, biological hazards and psychosocial hazards, with the hazards categories as low medium and high to be addressed. The OHSMS Manager did not have an action plan for low and medium risks, saying that they ignored those. He stated that they brought in a health and safety consultant to advise on treatment for the high risks.

When interviewing the OHSMS Manager, the auditor presents a nonconformity relating to potential hazards in the factory. If the dust extraction system broke down, the OHSMS Manager said that. If that happened, the agreed planned action is that workers would put masks on.

Select one of the options for how the auditor should respond to this statement.

- **A. Seek evidence that the response action is both Implemented and effective.**
- B. Advise that the factory should cease its operations if the dust extraction equipment malfunctioned.
- C. Suggest that they should increase their maintenance checks.
- D. Ask the OHSMS Manager to confirm that this action meets regulatory requirements for air purity.

Answer: A

Explanation:

The auditor should assess whether the organization's planned action (using masks in case of dust extraction failure) is both implemented and effective. This aligns with ISO 45001 requirements to ensure that control measures are functional and meet the intended objectives.

Clause 8.1.2 (Hierarchy of Controls):

The use of PPE, such as masks, is considered a last resort in the hierarchy of controls. The organization must demonstrate that the measure is:

Implemented (e.g., PPE is available and workers are trained to use it).

Effective (e.g., masks provide adequate protection against dust).

Analysis of Options:

A. Advise that the factory should cease operations if the dust extraction equipment malfunctioned.

While ceasing operations may be a necessary control in extreme situations, it is not a practical or realistic recommendation unless a high-risk scenario cannot be otherwise managed.

B. Ask the OHSMS Manager to confirm regulatory compliance.

Regulatory compliance is important but does not fully address the requirement to ensure the action is effective.

C. Seek evidence that the response action is both implemented and effective.

This is the most appropriate response. The auditor must verify implementation and effectiveness to determine conformity.

D. Suggest increasing maintenance checks.

Maintenance is important for preventing equipment breakdowns, but this option does not address the immediate audit finding about the adequacy of response actions.

ISO Reference:

Clause 8.1.2: Emphasizes applying the hierarchy of controls effectively.

Clause 9.1.1: Requires monitoring and measuring controls to ensure effectiveness.

NEW QUESTION # 33

During a second-party audit at a sawmill, you find that the OHSMS Manager conducted the hazard identification process. In the risk assessment report, hazards were listed as physical hazards, chemical hazards, biological hazards and psychosocial hazards, with the hazards categories as low medium and high to be addressed. The OHSMS Manager did not have an action plan for low and medium risks, saying that they ignored those. He stated that they brought in a health and safety consultant to advise on treatment for the high risks.

When interviewing the OHSMS Manager, the auditor presents a nonconformity relating to potential hazards in the factory. If the dust extraction system broke down, the OHSMS Manager said that. If that happened, the agreed planned action is that workers would put masks on.

Select one of the options for how the auditor should respond to this statement.

- **A. Seek evidence that the response action is both Implemented and effective.**
- B. Advise that the factory should cease its operations if the dust extraction equipment malfunctioned.
- C. Suggest that they should increase their maintenance checks.
- D. Ask the OHSMS Manager to confirm that this action meets regulatory requirements for air purity.

Answer: A

Explanation:

The auditor should assess whether the organization's planned action (using masks in case of dust extraction failure) is both implemented and effective. This aligns with ISO 45001 requirements to ensure that control measures are functional and meet the intended objectives.

* Clause 8.1.2 (Hierarchy of Controls): The use of PPE, such as masks, is considered a last resort in the hierarchy of controls. The organization must demonstrate that the measure is:

* Implemented (e.g., PPE is available and workers are trained to use it).

* Effective (e.g., masks provide adequate protection against dust).

* Analysis of Options:

* A. Advise that the factory should cease operations if the dust extraction equipment malfunctioned. While ceasing operations may be a necessary control in extreme situations, it is not a practical or realistic recommendation unless a high-risk scenario cannot be otherwise managed.

* B. Ask the OHSMS Manager to confirm regulatory compliance. Regulatory compliance is important but does not fully address the requirement to ensure the action is effective.

* C. Seek evidence that the response action is both implemented and effective. This is the most appropriate response. The auditor must verify implementation and effectiveness to determine conformity.

* D. Suggest increasing maintenance checks. Maintenance is important for preventing equipment breakdowns, but this option does not address the immediate audit finding about the adequacy of response actions.

ISO References:

* Clause 8.1.2: Emphasizes applying the hierarchy of controls effectively.

* Clause 9.1.1: Requires monitoring and measuring controls to ensure effectiveness.

NEW QUESTION # 34

The following options show key actions involved in a third-party audit. They are not in order. Order the stages in the table to show the sequence in which the actions should take place.

To complete the sequence click on the blank section you want to complete so it is highlighted in red and then click on the applicable stage from the options below. Alternatively, drag and drop the options to the appropriate blank section.

These stages take place after a certification application.
