Scrum Professional Scrum Product Owner II Sample Questions (Q35-Q40):

NEW QUESTION # 35

A separate Product Backlog is needed for every:
(choose the best answer)

- A. Program
- **B. Product.**
- C. Scrum Team
- D. Portfolio.
- E. All of the above.

Answer: B

NEW QUESTION # 36

An effective Product Owner must: (choose the best answer)

- A. Ensure that the team is as productive as possible.
- **B. None of the above**
- C. Be the single point of contact for all stakeholders.
- D. Ensure that every stakeholder need is met.
- E. Be the "expert" opinion for all Product Backlog items.
- F. All of the above.

Answer: B

NEW QUESTION # 37

When determining the ordering of an item on the Product Backlog, what are some things a Product Owner should consider? (choose all that apply)

- **A. Alignment and dependencies with existing Product Backlog items**
- **B. The complexity of developing the Product Backlog Item**
- **C. Importance to customers**
- **D. Alignment with business strategy and goals**
- **E. Risk**

Answer: A,B,C,D,E

NEW QUESTION # 38

A "cone of uncertainty" can be used to do what?
(choose the best answer)

- A. Represent the relative level of difficulty for predicting the velocity of individual team members.

- B. Rapidly identify and prioritize all uncertainties.
- **C. Visualize the uncertainty of the potential value that a Scrum Team delivers over time.**
- D. Determine whether to cut quality, similar to the "Iron Triangle" of project management.

Answer: C

Explanation:

Explanation

A "cone of uncertainty" is a graphical representation of the evolution of the amount of uncertainty during a project. It shows that at the beginning of a project, there is a high degree of variability and unpredictability in the estimates of the scope, cost, time, and value of the product. As the project progresses, more information and feedback are gathered, and the uncertainty decreases, reaching zero when the product is delivered and validated. A "cone of uncertainty" can be used to visualize the uncertainty of the potential value that a Scrum Team delivers over time, and to guide the empirical process of inspection and adaptation. By using a "cone of uncertainty", a Scrum Team can:

- * Align the expectations of the stakeholders and customers with the reality of the complex and dynamic environment.
- * Avoid making premature or unrealistic commitments based on inaccurate or incomplete estimates.
- * Embrace change and experimentation as opportunities to learn and deliver more value.
- * Inspect the actual value delivered and the feedback received, and adapt the product vision, strategy, and backlog accordingly.
- * Forecast the range of possible outcomes and the level of confidence for each Sprint and release.

The other options are not valid uses of a "cone of uncertainty". A "cone of uncertainty" does not represent the relative level of difficulty for predicting the velocity of individual team members, as velocity is a measure of the amount of work done by the whole Scrum Team, not by individuals. A "cone of uncertainty" does not rapidly identify and prioritize all uncertainties, as uncertainties are not always known or quantifiable, and may change over time. A "cone of uncertainty" does not determine whether to cut quality, similar to the "Iron Triangle" of project management, as quality is not a variable that can be traded off in Scrum, but a non-negotiable aspect of the Definition of Done and the value proposition of the product.

NEW QUESTION # 39

The most important thing a Product Owner can do is:
(choose the best answer)

- A. Function as the single source of truth for all requirements.
- **B. Maximize the value delivered by the product.**
- C. Determine the release schedule and contents.
- D. Ensure that all stakeholder needs are met.

Answer: B

Explanation:

According to the Professional Scrum Product Owner II certification guide 1, the Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. This means that the Product Owner is responsible for defining, ordering, and validating what the Scrum Team works on, and ensuring that the product delivers value to the customers, users, and the organization. The other options are not the most important thing a Product Owner can do, because they are either too narrow (A), too unrealistic (B), or too prescriptive.
