Mule-Dev-202 Brain Exam Exam Pass For Sure | Salesforce Exam Mule-Dev-202 Vce Format

This is a wise choice, after using our Mule-Dev-202 training materials, you will realize your dream of a promotion because you deserve these reports and your efforts will be your best proof. Therefore, when you are ready to review the exam, you can fully trust our products, choose our learning materials. If you don't want to miss out on such a good opportunity, buy it quickly. Thus, users do not have to worry about such trivial issues as typesetting and proofreading, just focus on spending the most practice to use our Mule-Dev-202 Learning Materials. After careful preparation, I believe you will be able to pass the exam.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q37-Q42):

NEW QUESTION # 37
AnyAirlines is developing an RPA process and is implementing testing best practices. They want to take the RPA process through rigorous testing.

During these tests, where do RPA process test plans execute?

- A. On a configured RPA Bot
- B. In RPA Manager
- C. In RPA Builder
- D. In an RPA process runtime

Answer: A

Explanation:
During testing of an RPA process, test plans are executed on a configured RPA Bot. This allows you to simulate real-world scenarios and ensure the RPA process works correctly under various conditions:
On a Configured RPA Bot:
RPA Bots are configured to execute the automated tasks defined in the RPA process. By running test plans on these bots, you can verify the functionality and performance of the RPA process.
This approach ensures that the RPA process is thoroughly tested in an environment that closely mirrors production conditions.

MuleSoft RPA Documentation

NEW QUESTION # 38
Northern Trail Outfitters has deployed a MuleSoft RPA process to automate the extraction of sales data from CSV files. To integrate this RPA process with Sales Cloud, an action step is created that calls this RPA process in a MuleSoft Composer flow. Which next step must be added to the flow to make use of the RPA process results?

- A. Create Record action in Sales Cloud
- B. Create or Update Record action in Sales Cloud
- C. For Each loop
- D. If/Else block

Answer: B

Explanation:
To integrate an RPA process that extracts sales data from CSV files with Sales Cloud using MuleSoft Composer, you need to take the following steps:
Invoke RPA Process:
Create an action step in the MuleSoft Composer flow that calls the RPA process to extract the sales data from the CSV files.
Next Step - Create or Update Record:
After the RPA process completes and returns the extracted data, the next step in the flow should be to update Sales Cloud with the new information.
Use the Create or Update Record action to insert the new sales data into Sales Cloud. This action ensures that existing records are updated if they already exist, or new records are created if they don't.
This approach ensures that the results from the RPA process are correctly reflected in Sales Cloud.

Salesforce Sales Cloud Documentation

NEW QUESTION # 39
An RPA developer is building the implementation of an RPA process based on the BPMN created by a colleague. In the BPMN, they see the symbol below:
What does the symbol represent?

- A. A cleanup activity that is performed at the end of the process to ensure all running applications are closed
- B. A point in the process where different activities are performed under different circumstances
- C. One possible endpoint for the process
- D. An activity that is performed if an error occurs during processing

Answer: B

Explanation:

Symbol Meaning:The symbol shown is a diamond with an "X" inside, which represents an exclusive gateway in BPMN (Business Process Model and Notation). This gateway is used to control the flow of the process based on certain conditions or circumstances.
Reference:BPMN Gateway Types
Exclusive Gateway:An exclusive gateway routes the process flow into one of several paths based on conditions defined within the process model. Only one path is taken out of the gateway.
Reference:Exclusive Gateway Explanation
Usage in Process:When an exclusive gateway is encountered, the process evaluates the conditions on each outgoing sequence flow and chooses the path that meets the conditions. This ensures different activities are performed based on different circumstances.
Reference:BPMN Exclusive Gateway

NEW QUESTION # 40

AnyAirlines needs to select a tool for developing an integration between Salesforce and an ERP system in the cloud. The requirements state that the systems must communicate bidirectionally and as close to real time as possible. The ERP system can be accessed via a SOAP-based web service.
Which tool meets the requirements of this integration?

- A. Anypoint Studio
- B. Orchestrator
- C. MuleSoft Composer
- D. MuleSoft RPA

Answer: A

Explanation:
Anypoint Studio is the most suitable tool for developing an integration between Salesforce and an ERP system in the cloud, especially when bidirectional communication in near real-time is required. Here's why:
SOAP-Based Web Services Support:
Anypoint Studio supports SOAP-based web services, which is essential since the ERP system can be accessed via SOAP.
Bidirectional Communication:
Anypoint Studio allows for complex integrations that require bidirectional communication. You can set up flows that handle both inbound and outbound data seamlessly.
Real-Time Integration:
With Anypoint Studio, you can design integrations that process data in near real-time, ensuring timely updates between Salesforce and the ERP system.
Advanced Integration Capabilities:
Anypoint Studio offers advanced capabilities for data transformation, error handling, and connecting various systems, making it ideal for complex integration scenarios.

Anypoint Studio Documentation

NEW QUESTION # 41

A Salesforce administrator asks for advice on how to build their Salesforce flow. They need to complete several DML actions as part of their Salesforce flow and are running into DML governor limits during testing.
Which two pieces of advice should be given to the Salesforce administrator to improve their flow? (Choose two.)

- A. Use the upsert action to reduce the amount of DML statements required duringthe flow runtime.
- B. Use DML statements at the end of the flow wherever possible.
- C. Loopthrough a collection variableto save more records with a single DML statement.
- D. Avoid puttingDML statements inside of For Loop occurrences.

Answer: C,D

Explanation:
Avoid DML in For Loops:Placing DML (Data Manipulation Language) operations inside a loop can quickly exceed Salesforce governor limits, as each iteration performs a separate DML operation. It's best to collect records in a list and perform DML operations outside the loop.
Reference:Salesforce Governor Limits
Use Collection Variables:By looping through a collection variable and adding records to it, you can perform bulk DML operations, which are more efficient and less likely to hit governor limits.

Reference:Apex Collections and Bulk Processing
Use Upsert Action:Using the upsert action can reduce the number of DML statements by combining insert and update operations. However, this strategy depends on the specific flow requirements and data structure.
Reference:Salesforce Upsert Operation
DML Statements at the End:Consolidating DML operations to the end of the flow is advisable, but care should be taken to handle errors and exceptions appropriately.
Reference:Error Handling in Flows

NEW QUESTION # 42

......

Mule-Dev-202 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, Mule-Dev-202 test answers will be your best choice. For office workers, Mule-Dev-202 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but Mule-Dev-202 Study Materials will help you to solve this problem perfectly. All the language used in Mule-Dev-202 study materials is very simple and easy to understand. With Mule-Dev-202 test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. Mule-Dev-202 test dumps can help you solve all the problems in your study.
