Topic 3

- Process Mining: Its primary focus is discussing fundamentals of process mining. Furthermore, the topic explores pointing out the basic data requirements in process mining projects.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q19-Q24):

NEW QUESTION # 19

What are some capabilities of the QuickModel feature? Note: There are 2 correct answers to this question.

- A. Adding task information, in a table-based format
- B. Enriching process models with gateways
- C. Creating the happy path of a process
- D. Grouping different tasks and transforming them into a subprocess

Answer: A,C

Explanation:

The QuickModel feature in SAP Signavio is designed to facilitate rapid and efficient process modeling, particularly for users who may not be familiar with detailed BPMN notation. One of its capabilities includes creating the "happy path" of a process, which represents the most straightforward and issue-free sequence of events in a process. Another key capability is adding task information in a table-based format, which simplifies the process of documenting and managing various tasks within a process model. While QuickModel supports fast and efficient modeling, enriching models with gateways or grouping tasks into a subprocess requires more detailed modeling capabilities beyond the QuickModel feature. NEW QUESTION # 20

How can a user collaborate in the Collaboration Hub?

- A. By exporting the processes to share
- B. By commenting on a diagram
- C. By taking a screenshot of the process
- D. By creating a support ticket

Answer: B

Explanation:

The SAP Signavio Process Collaboration Hub facilitates collaboration among stakeholders by enabling direct interaction with process content. The SAP Signavio Process Collaboration Hub Documentation specifies:

* Exact Extract: "Users can collaborate in the SAP Signavio Process Collaboration Hub by commenting on diagrams, providing feedback, suggesting improvements, or asking questions directly on process models." (SAP Signavio Process Collaboration Hub User Guide, section on "Collaboration Features").

* Explanation:

* Option D (By commenting on a diagram): This is correct as the Collaboration Hub allows users to add comments to specific elements of a process diagram, fostering discussion and feedback among stakeholders, such as suggesting changes to a process step.

* Option A (By taking a screenshot of the process) is incorrect as screenshots are not a collaboration feature; they are a manual action outside the Hub's functionality.

* Option B (By creating a support ticket) is incorrect because support tickets are for technical issues, not process collaboration.

* Option C (By exporting the processes to share) is incorrect as exporting is a data-sharing method, not a direct collaboration feature within the Hub.

NEW QUESTION # 21

Which are the main aspects of filters in SAP Signavio Process Intelligence? Note: There are 2 correct answers to this question.

- A. They can be applied on the investigation, on the chapter, and on a Widget.

- B. They can be additive.
- C. They can be applied across processes.
- D. They can be used to filter different data sets.

Answer: A,B

NEW QUESTION # 22

What are the different decision types when using an Exclusive Gateway in SAP Signavio Process Governance? Note: There are 2 correct answers to this question.

- A. Event-based
- B. Automated
- C. Individual
- D. Manual

Answer: B,D

NEW QUESTION # 23

Which of the following is essential information that an Eventlog must contain? Note: There are 3 correct answers to this question.

Answer:

Explanation:

A.C.E

NEW QUESTION # 24

.....
