MS-102 Latest Exam Vce | MS-102 Reliable Exam Price

To stand in the race and get hold of what you deserve in your career, you must check with all the Microsoft MS-102 Exam Questions that can help you study for the Microsoft MS-102 certification exam and clear it with a brilliant score. You can easily get these Microsoft MS-102 Exam Dumps from Microsoft that are helping candidates achieve their goals.

Microsoft 365 Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

PROVISION FROM ACTIVE DIRECTORY

Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the on-premises Active Directory domain, you set the UPN suffix for User2 to @contoso.com.

You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Explanation

The on-premises Active Directory domain is named contoso.com. You can enable users to sign on using a different UPN (different domain), by adding the domain to Microsoft 365 as a custom domain. Alternatively, you can configure the user account to use the existing domain (contoso.com).

NEW QUESTION # 55

Your company has a Microsoft 365 E5 tenant that contains a user named User1.

You review the company's compliance score.

You need to assign the following improvement action to User1:Enable self-service password reset.

What should you do first?

- A. From the Azure Active Directory admin center, add User1 to the Compliance administrator role.
- B. From the Azure Active Directory admin center, enable self-service password reset (SSPR).
- C. From Compliance Manager, turn off automated testing.
- D. From the Microsoft 365 admin center, modify the self-service password reset (SSPR) settings.

Answer: A

NEW QUESTION # 56

You have a Microsoft 365 tenant that contains 100 Windows 10 devices. The devices are managed by using Microsoft Endpoint Manager.

You plan to create two attack surface reduction (ASR) policies named ASR1 and ASR2. ASR1 will be used to configure Microsoft Defender Application Guard. ASR2 will be used to configure Microsoft Defender SmartScreen.

Which ASR profile type should you use for each policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

ASR1:

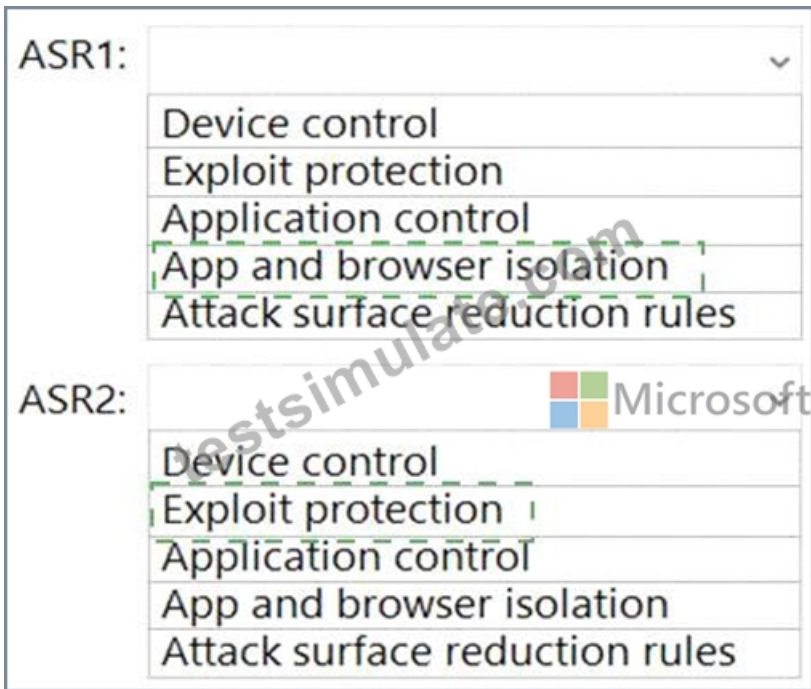

Device control
Exploit protection
Application control
App and browser isolation
Attack surface reduction rules

ASR2:

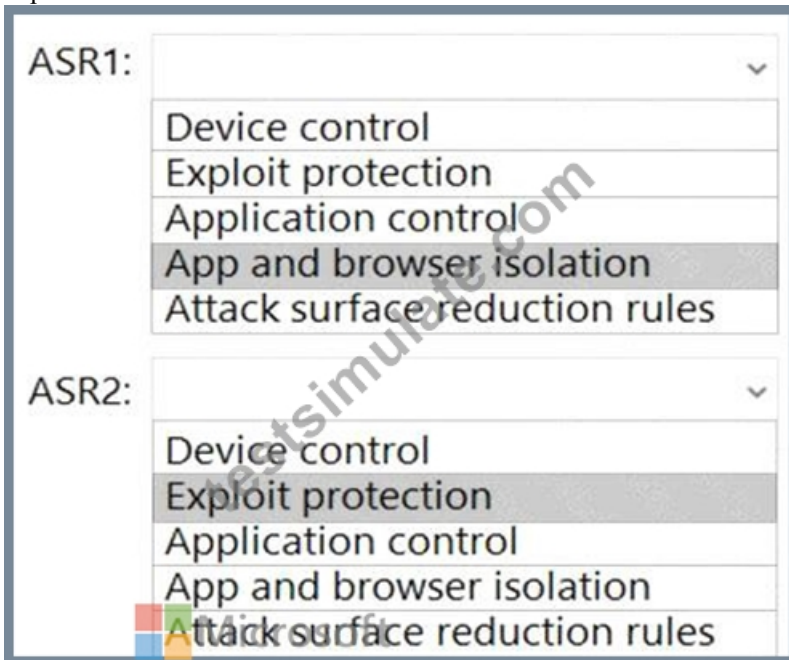

Device control
Exploit protection
Application control
App and browser isolation
Attack surface reduction rules

Answer:

NEW QUESTION # 57

You have a Microsoft 365 subscription that uses Microsoft Defender for Office 365.

You need to identify the settings that are below the Standard protection profile settings in the preset security policies.

What should you use? To answer, select the appropriate options in the answer area.

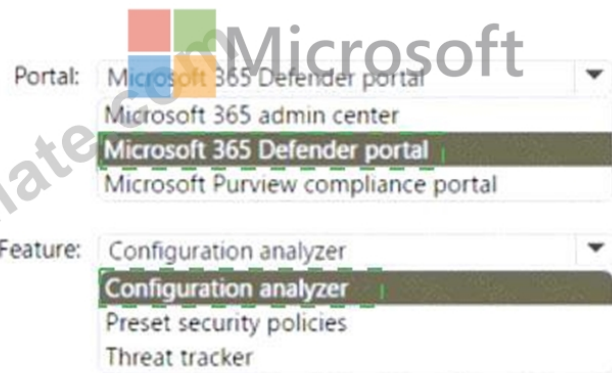

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Explanation:

NEW QUESTION # 58

You have a Microsoft 365 E5 tenant that connects to Microsoft Defender for Endpoint.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 8.1
Device3	iOS
Device4	Android

You plan to use risk levels in Microsoft Defender for Endpoint to identify whether a device is compliant.

Noncompliant devices must be blocked from accessing corporate resources.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint, and which Endpoint security policies must be configured.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can onboarded to Microsoft Defender for Endpoint:

- Device 1 only
- Device 1 and Device 2 only
- Device 1 and Device 3 only
- Device 1 and Device 4 only
- Device 1, Device 2, and Device 4 only
- Device 1, Device 2, Device 3, and Device 4

Endpoint security policies that must be configured:

- A conditional access policy only
- A device compliance policy only
- A device configuration profile only
- A device configuration profile and a conditional access policy only
- Device configuration profile, device compliance policy, and conditional access policy

Answer:

Explanation:

The screenshot shows the configuration interface for Microsoft Defender for Endpoint. The 'Devices that can onboarded to Microsoft Defender for Endpoint' dropdown is set to 'Device 1, Device 2, Device 3, and Device 4'. The 'Endpoint security policies that must be configured' dropdown is set to 'A device configuration profile only'. The Microsoft logo is visible in the background.

Explanation:

Devices that can onboarded to Microsoft Defender for Endpoint:

- Device 1 only
- Device 1 and Device 2 only
- Device 1 and Device 3 only
- Device 1 and Device 4 only
- Device 1, Device 2, and Device 4 only
- Device 1, Device 2, Device 3, and Device 4

Endpoint security policies that must be configured:

- A conditional access policy only
- A device compliance policy only
- A device configuration profile only
- A device configuration profile and a conditional access policy only
- Device configuration profile, device compliance policy, and conditional access policy
