

주제 2	<ul style="list-style-type: none"> • Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.
주제 3	<ul style="list-style-type: none"> • High Availability: This topic covers the importance and application of high availability within Junos OS environments. Knowledge in configuring and managing these components is critical for ensuring robust and uninterrupted network operations, aligning with exam expectations.
주제 4	<ul style="list-style-type: none"> • Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.
주제 5	<ul style="list-style-type: none"> • Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.
주제 6	<ul style="list-style-type: none"> • Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.
주제 7	<ul style="list-style-type: none"> • IS-IS: Aspiring Juniper networking professionals enhance their understanding of IS-IS routing protocols. This topic equips candidates with the knowledge to configure and monitor IS-IS systems, addressing specific exam challenges and practical applications.
주제 8	<ul style="list-style-type: none"> • Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 exam.

JN0-351 최신 업데이트 덤프공부 & JN0-351 높은 통과율 덤프데모문제

Pass4Test 에서 제공해드리는 Juniper인증 JN0-351 시험덤프자료를 구입하시면 완벽한 구매후 서비스를 약속드립니다. Pass4Test에서 제공해드리는 덤프는 IT업계 유명인사들이 자신들의 노하우와 경험을 토대로 하여 실제 출제되는 시험문제를 연구하여 제작한 최고품질의 덤프자료입니다. Juniper인증 JN0-351 시험은 Pass4Test 표 Juniper인증 JN0-351 덤프자료로 시험준비를 하시면 시험패스는 아주 간단하게 할 수 있습니다. 구매하기전 PDF버전 무료샘플을 다운받아 공부하세요.

최신 JNCIS-ENT JN0-351 무료샘플문제 (Q89-Q94):

질문 # 89

When electing a DIS in an IS-IS network, what is used to break a priority tie?

- A. lowest router ID
- B. highest MAC address
- C. lowest MAC address
- D. highest router ID

정답: B

질문 # 90

Which two statements are true about the default VLAN on Juniper switches? (Choose two.)

- A. The default VLAN is set to a VLAN ID of 1 by default
- B. The default VLAN ID is not visible.
- C. The default VLAN ID can be changed.

- D. The default VLAN ID is not assigned to any interface.

정답: A,C

설명:

Explanation

On Juniper switches, the default VLAN is set to a VLAN ID of 1 by default¹². This means that all interfaces on the switch are members of VLAN 1 until they are specifically assigned to another VLAN¹². Therefore, option A is correct.

The default VLAN ID can be changed¹². This allows network administrators to configure the switch to use a different VLAN as the default, if necessary¹². Therefore, option D is correct.

질문 # 91

You are asked to explore adding BGP route reflectors to allow for increased scale in your core network.

Which statement is correct in this scenario?

- A. Route reflectors require that the network is connected in a physical full mesh.
- B. The cluster ID is not required to use route reflectors.
- **C. The cluster ID is required to prevent routing loops.**
- D. Route reflectors are required whenever internal BGP (IBGP) sessions are needed.

정답: C

설명:

A route reflector is a BGP router that is allowed to break the iBGP loop avoidance rule and advertise routes received from an iBGP peer to another iBGP peer under specific conditions ¹. A route reflector can have three types of peerings: EBGP neighbor, IBGP client neighbor, and IBGP non-client neighbor ². A cluster is a group of route reflectors and their clients that are fully meshed ³.

The cluster ID is a 4-byte value that identifies the route reflector cluster and is carried in the ORIGINATOR_ID attribute of the BGP update message ⁴. The cluster ID is used to prevent routing loops among route reflectors and their clients. If a route reflector receives a route with its own cluster ID, it discards the route ⁵. Therefore, the cluster ID is required to prevent routing loops when using route reflectors.

5 : Junos OS Routing Protocols Library for Routing Devices

질문 # 92

In RSTP, which three port roles are associated with the discarding state? (Choose three.)

- **A. backup**
- B. designated
- **C. disabled**
- **D. alternate**
- E. root

정답: A,C,D

설명:

In Rapid Spanning Tree Protocol (RSTP), there are several port roles that determine the behavior of the port in the spanning tree ^{1 2 3}. The roles include root, designated, alternate, backup, and disabled ^{1 2 3}.

The discarding state is associated with the backup, alternate, and disabled roles ^{1 2 3}. In a stable topology with consistent port roles throughout the network, RSTP ensures that every root port and designated port immediately transition to the forwarding state while all alternate and backup ports are always in the discarding state ². Disabled ports are also in the discarding state ³.

Therefore, options B, C, and D are correct.

질문 # 93

Which two events cause a router to advertise a connected network to OSPF neighbors? (Choose two.)

- A. When an OSPF adjacency is established.
- B. When a static route to the 224.0.0.6 address is created.
- C. When a static route to the 224.0.0.5 address is created.
- D. When an interface has the OSPF passive option enabled.

정답: A,D

질문 #94

Pass4Test는 모든 IT관련 인증시험자료를 제공할 수 있는 사이트입니다. 우리Pass4Test는 여러분들한테 최고 최신의 자료를 제공합니다. Pass4Test을 선택함으로 여러분은 이미Juniper JN0-351시험을 패스하였습니다. 우리 자료로 여러분은 충분히Juniper JN0-351를 패스할 수 있습니다. 만약 시험에서 떨어지셨다면 우리는 백프로 환불은 약속합니다. 그리고 갱신이 된 최신자료를 보내드립니다. 하지만 이런사례는 거이 없었습니다.모두 한번에 패스하였기 때문이죠. Pass4Test는 여러분이Juniper JN0-351인증시험 패스와 추후사업에 모두 도움이 되겠습니다. Pass4Tes의 선택이야말로 여러분의 현명한 선택이라고 볼수 있습니다. Pass4Tes선택으로 여러분은 시간도 절약하고 돈도 절약하는 일석이조의 득을 얻을수 있습니다. 또한 구매후 일년무료 업데이트버전을 바울수 있는 기회를 얻을수 있습니다.
