If you buy the 300-610 learning materials from our company, we are glad to provide you with the high quality 300-610 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the 300-610 Learning Materials from our company. If you decide to buy the 300-610 study question from our company, you will receive a lot beyond your imagination.

What is the salary of a Cisco 300-610 certified professional?

The average annual salary of Cisco 300-610 Exam Certified professional in various countries is as follows:

- India - 1060144 INR
- United States - 140,00 USD
- UK - 10577 Pounds

What kind of preparation is required for the Cisco 300-610 Exam

There are some things you can do to prepare for the Cisco 300-610 exam. The first is to start with a good foundation of knowledge. This can be achieved by taking a test like the one you will be taking when you are ready to take the Cisco 300-610 exam. After that, you need to study and practice. You should combine these two things. Start by finding an online training facility such as **300-610 Dumps** that provides both practice questions and tools to help you learn things better when you need them. Because there is no way for us to tell what kind of Cisco 300-610 Exam Questions you will see on your test, we cannot tell you exactly which ones you need to study beforehand. You should review all available Cisco 300-610 Exam questions and answers we have on our site, but don't focus too much on any one question or topic in particular until you know where it will come from on your specific exam. This is why we recommend that you take a full practice test with our software before taking your actual exam. Skilled specialist records is to sample the retest weeks. A full practice test will give you experience with the process, allow us to update our questions based on your results, and show you what areas of the exam might cause problems for you later on.

Excellent PDF 300-610 Cram Exam Supply you Trustworthy Reliable Exam Book for 300-610: Designing Cisco Data Center Infrastructure to Prepare easily

ITexamReview not only provides you with the best Cisco practice exam materials, but also with the most comprehensive service. If you buy our 300-610 exam questions and answers, you can get the right of free update exam pdf one-year. And you can try the free demo of our braindumps before you decide to buy. You will pass 300-610 Exam Tests with the help of our latest learning materials and top questions.

The Cisco 300-610 Exam is one of the requirements for obtaining the CCNP Data Center certification. This test is crafted to check the individuals' understanding of designing the infrastructure of data centers, including their knowledge of networking, computing, storage networking, as well as automation. This is a concentration exam, which validates your expertise in working with the Cisco networking devices used by the companies worldwide. If you don't plan to deal with the Cisco 350-601 test to get CCNP Data Center, you will only earn the specialist-level certificate to have proof of your skills.

All in all, each candidate has to pass two exams to get certified. Cisco 350-601 is a core test that validates your knowledge base to prepare it for the specialized skills that you learn while studying for this qualifying exam. It focuses on the specific topics and verifies your expertise in working with data center solutions that imply their implementing, troubleshooting, designing, and configuring. The network engineers and administrators are the ideal applicants for this certification test to demonstrate their skills in taking advantage of scalable automation solutions and securing the infrastructure.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q121-Q126):

NEW QUESTION # 121

A large financial institution hosts all customer data in a critical data center with a single physical location. Top management is concerned about the risk of a single-site failure, but budget is also an issue, so the network engineering team is working to implement a cost-effective redundancy strategy with a second data center. The new data center must use a three-tier design identical to the existing data center. Business requirements dictate that all data must always be accessible from anywhere in the world, even if a single site fails. The team purchased two Cisco Nexus 7700 Series Switches and four Catalyst 8000 Series Routers. Which action must the team take to accomplish the goal?

- A. Implement HSRP with the Nexus 7700 Series devices to provide gateway redundancy to ensure seamless failover between the Nexus switches
- B. Implement OTV with the Nexus 7700 Series devices to extend Layer 2 connectivity between the two data centers and provide disaster-recovery capabilities
- C. Implement FabricPath on the Catalyst 8000 routers in both data centers to provide full redundancy in the event of a disaster
- D. Implement NVGRE on the Catalyst 8000 routers to create a DCI communication channel between the data centers and provide Layer 2 extension capabilities

Answer: B

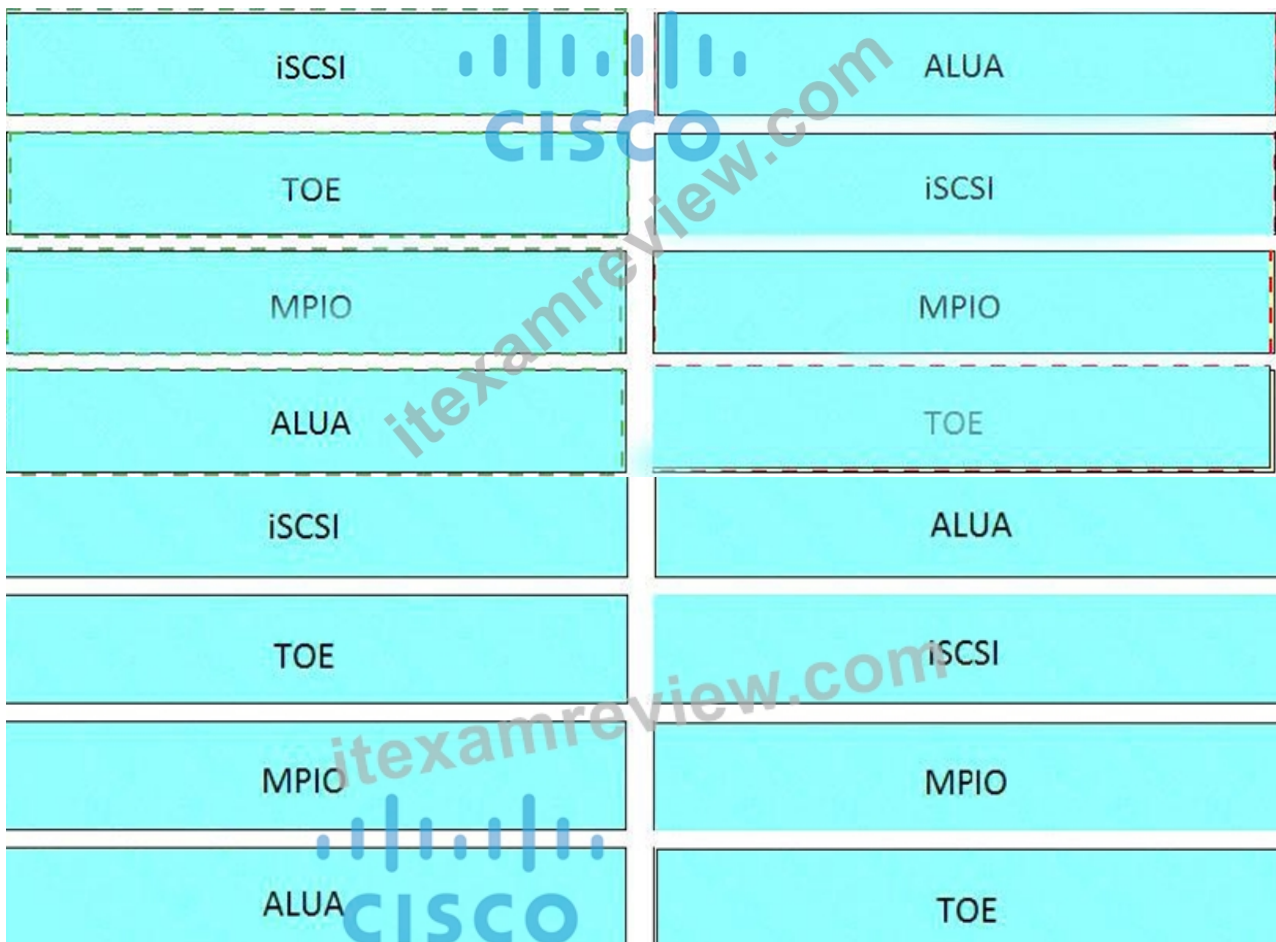

NEW QUESTION # 122

Drag and drop the technologies from the left onto the correct descriptions on the right.

iSCSI	allows the storage system to tell the client which paths are optimized
TOE	provides block-level access to the storage
MPIO	host software has visibility into different iSCSI ports
ALUA	offloads device CPU from encapsulation / decapsulation

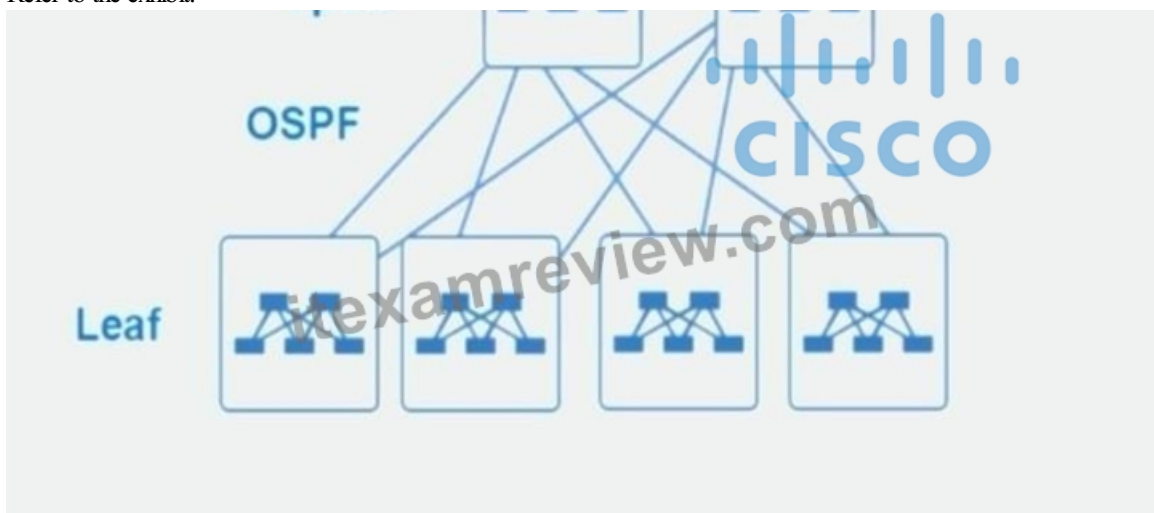

Answer:

Explanation:

NEW QUESTION # 123

Refer to the exhibit.

Fiber links are provisioned directly between the spine and leaf switches in the given LAN topology. A /30 prefix has been configured over each fiber link to provide underlay connectivity for a VXLAN network. The network-engineering team must update the network configuration to provide the shortest possible convergence time if a fiber link is cut. Which action must the team take to meet the requirement?

- A. Enable UDLD on the /30 links
- **B. Enable BFD on the /30 links**
- C. Configure ECMP on the /30 links
- D. Configure the /30 links as OSPF point-to-point networks

Answer: B

NEW QUESTION # 124

Which mode must be enabled on a Cisco UCS Fabric Interconnect to connect directly to a storage array?

- A. NPV mode
- B. FC end-host mode
- C. FC switching mode
- D. NPIV mode

Answer: C

Explanation:

NEW QUESTION # 125

Refer to the exhibit.

A default route must be advertised into the VXLAN fabric for internet access. The engineer must use a static route because the edge firewall does not support any dynamic routing protocol. Which two features must the engineer use to allow learning and withdrawing of the default route without any manual intervention?

(Choose two)

- A. anycast gateway
- B. HMM tracking
- C. policy-based routing
- D. IP forwarding
- E. Network Address Translation

Answer: A,C

NEW QUESTION # 126
