問題 #63

Which is a typical information assurance role of a P3O?

- A. Providing capacity planning for the portfolio
- B. Escalating issues to senior management

- C. Booking for operational staff
- **D. Ensuring data security are assessed at the beginning of each project**

答案： D

解題說明：

The P3O Foundation (2013) manual identifies ensuring data security assessment at project initiation as a typical information assurance role. Section 7.3.2 states, "The P3O ensures data security and integrity are assessed at the beginning of each project to support reliable decision-making and compliance." This differs from issue escalation (A), capacity planning (B), or staff booking (D), which are operational or resource- related. The 2013 edition emphasizes this role in maintaining high-quality information, a cornerstone of P3O's governance support. This ensures trust and accuracy in data used across change initiatives.

問題 #64

Which is a typical constraint which impacts on how a P3O is implemented?

- **A. P3O governance must align with existing corporate governance**
- B. Pace of change must take into account current P3M3 maturity
- C. P3O assurance services must be independent
- D. Quality, standardized data is needed

答案： A

解題說明：

The P3O Foundation (2013) manual identifies alignment with existing corporate governance as a typical implementation constraint. Section 4.2.3 states, "A key constraint in P3O implementation is ensuring its governance aligns with the organization's existing corporate governance framework to maintain coherence and authority." This differs from pace of change (A), data quality (B), or assurance independence (C), which are operational considerations. The 2013 edition emphasizes this alignment to avoid conflicts, ensuring the P3O integrates seamlessly. This constraint shapes the implementation strategy and structure.

- A. Should be stopped immediately
- **B. Should be realigned to existing objectives**
- C. Should be included in the portfolio to maintain business as usual
- D. Must be completed before new changes are started

答案： B

解題說明：

The Portfolio, Programme, and Project Office (P3O) is a framework that provides guidance on how to set up and maintain effective support structures for portfolio, program, and project management. A key function of a P3O is to ensure that all changes and initiatives within an organization are aligned with its strategic objectives.

問題 #66

What question regarding business change governance support and enablement relates to 'business change design'?

- A. Are we getting things done well?
- **B. Are we doing the right things?**
- C. Are we getting the business benefits?
- D. Are we doing things the right way?

答案： B

解題說明：

The question "Are we doing the right things?" relates to business change design, per the P3O Foundation (2013) manual. Section

2.2.2 states, "Business change design addresses the question 'Are we doing the right things?' by ensuring initiatives align with strategic objectives." This differs from benefits realization (A), efficiency (C), or process correctness (D), which address other governance aspects. The 2013 edition links this question to the P3O's role in validating strategic alignment, a key design phase concern. This ensures change initiatives are prioritized correctly, supporting effective governance.

Section 4.3.3 states, "The Blueprint includes transition plans detailing how business change will be embedded into business as usual, providing a roadmap for implementation." This differs from Benefit Profiles (A), which are specific to benefits realization, Business Case needs (C), which are strategic inputs, and Highlight Reports (D), which are operational updates. The

2013 edition emphasizes the Blueprint's role in planning structural and process changes, ensuring smooth integration. This supports the P3O's implementation lifecycle.
