Microsoft PL-200 Exam: Microsoft Power Platform Functional Consultant

The Microsoft PL-200 exam targets intermediate-level IT specialists who are responsible for performing discovery, engaging key stakeholders and subject matter experts, translating and capturing requirements, and configuring Power Platform apps and solutions. These individuals are tasked with creating system integrations, custom visualizations, data conversions, and application enhancements, among others.

In modern IT departments, candidates who verify their expertise by passing PL-200 Exam work collaboratively with the quality assurance team to leverage first-rate services that satisfy the functional and non-functional business requirements. While working in this capacity, these individuals are not just responsible for identifying, generating, and delivering artifacts for deployment and packaging. They also train Power Platform administrators on a ton of operations and maintenance strategies.

Just rush to buy our PL-200 practice braindumps!

Microsoft PL-200 certification exam consists of multiple-choice questions that cover a wide range of topics related to the Power Platform. PL-200 exam measures the candidate's understanding of the Power Platform architecture, the use of Power Apps to create custom applications, Power Automate to automate business processes, Power Virtual Agents to build chatbots, and Power BI to analyze data. PL-200 Exam also evaluates the candidate's ability to plan, configure, and manage the Power Platform solutions.

Microsoft Power Platform Functional Consultant Sample Questions (Q167-Q172):

NEW QUESTION # 167
A company is creating a canvas app and a model-driven app to manage their customer accounts.
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
You need to configure the scope for the business rules.
Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Box 1: Table
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
Scope the business rule to Entity (Table).
Box 2: Specific form
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
For Model
The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:

If you select this item...
The scope is set to...
Entity- The table and all forms for the table
All Forms- All forms for the table
Specific form (account Main Form, for example) - Just that form

NEW QUESTION # 168
You are creating a canvas app.
A user will click a button on each screen of a Power Apps app to proceed to the next screen.
You need to implement an action that selects the next screen that the user sees.
Which event should you handle?

- A. OnSelect
- B. OnCheck
- C. OnLoad
- D. ScreenTransition

Answer: A

Explanation:
Explanation
Add navigation
1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
2. With the arrow still selected, select the Action tab, and then select Navigate.
3. The OnSelect property for the arrow is automatically set to a Navigate function.
4. When a user selects the arrow, the Target screen fades in.
5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
6. Navigate(Source, ScreenTransition.Fade)
7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen.

NEW QUESTION # 170

You need to embed the check-in solution into the communication solution. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Graphical user interface, application, Word Description automatically generated

What must you use to embed the check-in solution?

Visual Studio
Power Apps Web Studio
AI Builder
Common Data Service

Where must the check-in solution be available within the communication solution?

chat section of the solution
Microsoft 365 Apps selection grid
in an embedded webpage
in a tab

Box 1: Power Apps Web Studio

Scenario: The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.

PowerApps Studio is a browser application used to edit your apps. PowerApps Studio includes a drag-and-drop canvas in the center of the screen and a screen or object list pane on the left. Properties, Rules, and Advanced Properties for selected screens or controls are displayed in the right pane.

Box 2: in a tab

You can customize the Teams experience by adding Power Apps canvas apps to your channels in Teams using the PowerApps tab.

NEW QUESTION # 171

You are a consultant. A client asks you to remove several solutions in one of their Microsoft Dataverse environments The client wants to know what effect removing the solutions will have on the rest of the system.

You need to explain the results of removing the solutions.

Which components be affected? To answer, select the appropriate options in the answer are a.

NOTE: Each correct selection is worth one point.

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	The solution only. The solution and the lookup column. The solution, the table, and any data in the table.
A managed solution patch contains an update to a column label. The column is used in several forms and views.	The solution and the updated column label. The solution, the column, and any data in the column. The solution, the table, and the updated column label.
A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.	The solution only. The solution and the site map. The solution, the table, and any data in the table.

Answer:

Explanation:

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	**The solution only.** The solution and the lookup column. The solution, the table, and any data in the table.
A managed solution patch contains an update to a column label. The column is used in several forms and views.	The solution and the updated column label. The solution, the column, and any data in the column. **The solution, the table, and the updated column label.**
A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.	The solution only. The solution and the site map. **The solution, the table, and any data in the table.**
