Education degree does not equal strength, and it does not mean ability. Education degree just mean that you have this learning experience only. And the real ability is exercised in practice, it is not necessarily linked with the academic qualifications. Do not feel that you have no ability, and don't doubt yourself. When you choose to participate in the APMG-International ISO-IEC-27001-Foundation Exam, it is necessary to pass it. If you are concerned about the test, however, you can choose FreePdfDump's APMG-International ISO-IEC-27001-Foundation exam training materials. No matter how low your qualifications, you can easily understand the content of the training materials. And you can pass the exam successfully.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 2	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 3	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 4	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 5	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.

Topic 6	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

APMG-International ISO-IEC-27001-Foundation Reliable Test Guide - ISO-IEC-27001-Foundation Reliable Real Test

It is of no exaggeration to say that sometimes a certification is exactly a stepping-stone to success, especially when you are hunting for a job. The ISO-IEC-27001-Foundation study materials are of great help in this sense. People with initiative and drive all want to get a good job, and if someone already gets one, he or she will push for better position and higher salaries. With the ISO-IEC-27001-Foundation test training, you can both have the confidence and gumption to ask for better treatment. To earn such a material, you can spend some time to study our ISO-IEC-27001-Foundation study torrent. No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which information is required to be included in the Statement of Applicability?

- A. The scope and boundaries of the ISMS
- B. The justification for including each information security control
- C. The criteria against which risk will be evaluated
- D. The risk assessment approach of the organization

Answer: B

Explanation:
Clause 6.1.3 (d) requires that the organization"produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.
Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 17
Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Management responsible for each area of operation
- B. Auditors who audit each area of operation
- C. ISO/IEC 27001 practitioners within the organization
- D. Top management of the organization

Answer: D

Explanation:
Clause 5.1 (Leadership and Commitment) requires that:
"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.
Practitioners (D) help implement, but they don't bear formal responsibility under the standard.
Thus, the verified answer is A: Top management of the organization.

NEW QUESTION # 18

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. communicate the importance of
- B. report on
- C. continually improve
- D. enforce standards for

Answer: C

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with thePlan-Do-Check-Act (PDCA)model.

Thus, the missing words are"continually improve."

NEW QUESTION # 19

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Maintain contact with legal authorities
- B. Regular review of contractual compliance
- C. Return assets to their legal owners
- D. Regular review of compliance

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer isA.

NEW QUESTION # 20

Who determines the number of days required for a certification audit?

- A. The external auditor from the Certification Body who will undertake the audit
- B. Both the management representative and the external auditor together
- C. The lead internal auditor from the organization to be audited
- D. The management representative from the organization to be audited

Answer: A

Explanation:

Certification audits are carried out byCertification Bodies (CBs), not the organization itself. ISO/IEC 27001 requires external certification audits to be independent, impartial, and objective. According to ISO/IEC 27006 (Requirements for bodies providing audit and certification of ISMS), the Certification Body determines the audit duration and number of audit daysbased on factors such as organizational size, complexity, scope, and risk environment. This ensures consistency across organizations and prevents manipulation by the auditee. ISO/IEC 27001 Clause 9.2 and 9.3 addressinternal audit and management review, but the determination of certification audit days is outside the organization's control; it rests solely with the accredited Certification Body

auditors. Thus, answer: B is correct, as the CB's external auditor formally calculates and assigns the audit time.

NEW QUESTION # 21

......

We can calculate that ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) certification exam is the best way by which you can learn new applications, and tools and mark your name in the list of best employees in your company.
