

Exam Fortinet FCSS_NST_SE-7.4 Voucher - FCSS_NST_SE-7.4 Exam Dumps Pdf

P.S. Free 2025 Fortinet FCSS_NST_SE-7.4 dumps are available on Google Drive shared by TestsDumps:
<https://drive.google.com/open?id=1NPjTiCCICWitTgGfhJ6tNMCjzWvjJhd9>

You can get a reimbursement if you don't pass the FCSS - Network Security 7.4 Support Engineer. This means that you can take the FCSS - Network Security 7.4 Support Engineer (FCSS_NST_SE-7.4) with confidence because you know you won't lose any money if you don't pass the FCSS - Network Security 7.4 Support Engineer (FCSS_NST_SE-7.4) exam. This is a great way to ensure that you're investing in your future in the correct way with Fortinet FCSS_NST_SE-7.4 exam questions.

Fortinet FCSS_NST_SE-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing: This part of the exam examines the expertise of Fortinet network and security professionals, in routing enterprise traffic effectively.
Topic 2	• Security Profiles: This segment of the exam tests the skills of IT professionals, such as network administrators in handling and troubleshooting security profile-related challenges.
Topic 3	• System Troubleshooting: This part of the exam assesses the ability of Fortinet network and security professionals to diagnose and fix typical system-related problems within Fortinet solutions. It involves troubleshooting FortiGate-to-FortiGate Security Fabric issues, addressing automation stitch concerns, and detecting resource-related problems using integrated tools.
Topic 4	• VPN: This section tests the knowledge of IT professionals, such as system engineers in diagnosing and resolving VPN-related issues. It emphasizes troubleshooting IPsec IKE versions 1 and 2 to ensure secure and reliable communication between networks or remote users.
Topic 5	• Authentication: This section evaluates the proficiency of Fortinet network and security professionals in resolving both local and remote authentication issues.

FCSS_NST_SE-7.4 Training Materials are Worthy for You to Buy It - TestsDumps

People who get FCSS_NST_SE-7.4 certification show dedication and willingness to work hard, also can get more opportunities in job hunting. It seems that FCSS_NST_SE-7.4 certification becomes one important certification for many IT candidates. While a good study material will do great help in FCSS_NST_SE-7.4 Exam Preparation. TestsDumps FCSS_NST_SE-7.4 will solve your

problem and bring light for you. FCSS_NST_SE-7.4 exam questions and answers are the best valid with high hit rate, which is the best learning guide for your Fortinet FCSS_NST_SE-7.4 preparation.

Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q93-Q98):

NEW QUESTION # 93

Refer to the exhibit, which shows a session entry.

```
session_info: proto=1 proto_state=00 duration=1 expires=0 timeout=0 flags=00000000
sockflag=00000000 sockport=0 av_idx=0 use=3
origin-shaper=
reply-shaper=
per_ip_shaper=
ha_id=0 policy_dir=0 tunnel=/ vlan_cos=0/255
state=log may_dirty none
dstastic (bytes/packets/allow_err): org=168/2/1 reply=168/2/1 tuples=2
tx_speed (Bps/Kbps) : 97/0 rx_speed (Bps/Kbps) : 97/0
origin->sink: org pre->post, reply pre->post dev=9->3/3->9 gw=10.200.1.254/10.1.0.1
hook=pre dir=org act=snat 10.1.10.10:40602->10.200.5.1:8 (10.200.1.1:60430)
hook=pre dir=reply act=dnat 10.200.5.1:8->10.1.10.10:40602 (10.1.10.10:40602)
misc=0 policy_id=1 auth_info=0 client_info=0 vd=0
serial=0002a5c9 tos=ff/ff app=0 app=0 url_cat=0
dd_type=0 dd_mode=0
```

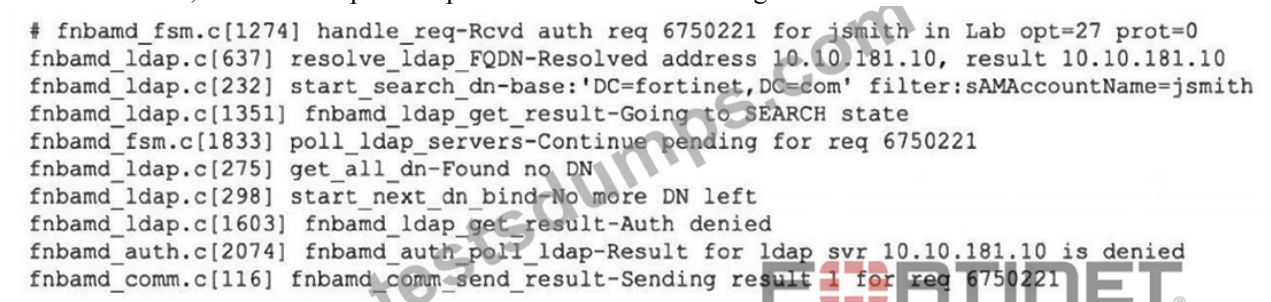

Which statement about this session is true?

- A. Return traffic to the initiator is sent to 10.1.0.1.
- B. It is an ICMP session from 10.1.10.10 to 10.200.1.1.
- C. Return traffic to the initiator is sent to 10.200.1.254.
- **D. It is an ICMP session from 10.1.10.1 to 10.200.5.1.**

Answer: D

NEW QUESTION # 94

Refer to the exhibit, which shows a partial output of the real-time LDAP debug.

```
# fnbamd_fsm.c[1274] handle_req-Rcvd auth req 6750221 for jsmith in Lab opt=27 prot=0
fnbamd_ldap.c[637] resolve_ldap_FQDN-Resolved address 10.10.181.10, result 10.10.181.10
fnbamd_ldap.c[232] start_search_dn-base:'DC=fortinet,DC=com' filter:sAMAccountName=jsmith
fnbamd_ldap.c[1351] fnbamd_ldap_get_result-Going to SEARCH state
fnbamd_fsm.c[1833] poll_ldap_servers-Continue pending for req 6750221
fnbamd_ldap.c[275] get_all_dn-Found no DN
fnbamd_ldap.c[298] start_next_dn_bind-No more DN left
fnbamd_ldap.c[1603] fnbamd_ldap_get_result-Auth denied
fnbamd_auth.c[2074] fnbamd_auth_poll_ldap-Result for ldap svr 10.10.181.10 is denied
fnbamd_comm.c[116] fnbamd_comm_send_result-Sending result 1 for req 6750221
```

What two actions can the administrator take to resolve this issue? (Choose two.)

- A. Ensure the user is providing the correct user credentials.
- **B. Ensure the user is a member of at least one AD group to ensure step 4 of the LDAP authentication process is successful.**
- C. Ensure the user logs in using 'John Smith' not 'jsmith'.
- **D. Ensure the account is active.**

Answer: B,D

Explanation:

When FortiGate's LDAP authentication can't find any matching DN it reports "get all dn - found no DN," which usually means the user either isn't in the group(s) you've told FortiGate to check or the account isn't currently active.

Ensure the user is a member of at least one AD group.

If you've configured FortiGate to restrict logins to specific groups, any user not in one of those groups will simply never be found by the LDAP search.

Ensure the account is active.

FortiGate's default search filter excludes disabled or locked accounts, so a disabled user object will likewise never show up in the DN search.

NEW QUESTION # 95

An administrator wants to capture encrypted phase 2 traffic between two FortiGate devices using the built-in sniffer.

If the administrator knows that there is no NAT device located between both FortiGate devices, which command should the administrator run?

- A. diagnose sniffer packet any 'lp proto 50'
- B. diagnose sniffer packet any 'ah'
- C. diagnose sniffer packet any 'udp port 500'
- D. diagnose sniffer packet any 'udp port 4500'

Answer: A

NEW QUESTION # 96

Refer to the exhibit, which shows partial outputs from two routing debug commands.

```
FortiGate # get router info kernel
tab=254 vf=0 scope=0 type=1 proto=11 prio=0 0.0.0.0/0.0.0.0/0->0.0.0.0/0 prio=0 0.0.0.0 gwy=100.64.1.254 dev=3 (port1)
tab=254 vf=0 scope=0 type=1 proto=11 prio=10 0.0.0.0/0.0.0.0/0->0.0.0.0/0 prio=0 0.0.0.0 gwy=100.64.2.254 dev=6 (port2)
tab=254 vf=0 scope=253 type=1 proto=2 prio=0 0.0.0.0/0.0.0.0/0->10.1.0.0/24 prio=10.1.0.254 gwy=0.0.0.0 dev=9 (port3)

FortiGate # get router info routing-table all

Routing table for VRF=0
S* 0.0.0.0/0 [10/0] via 100.64.1.254, port1
C [10/0] via 100.64.2.254, port2, [10/0]
C 10.1.0.0/24 is directly connected, port3
S 10.1.10.0/24 [10/0] via 10.1.0.1, port3
C 100.64.1.0/24 is directly connected, port1
C 100.64.2.0/24 is directly connected, port2
```

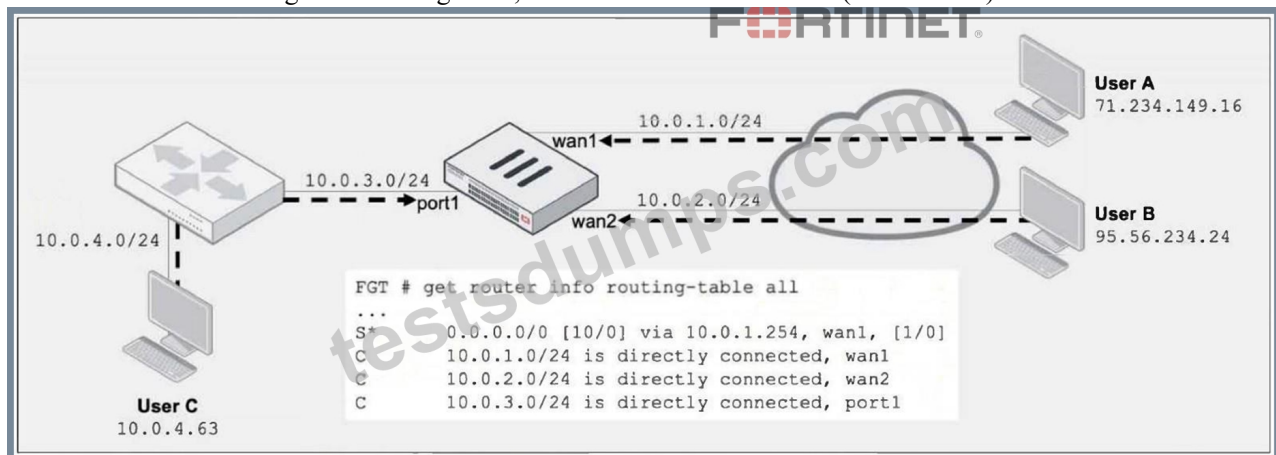

Which change must an administrator make on FortiGate to route web traffic from internal users to the internet, using ECMP?

- A. Set the priority of the static default route using port2 to 1.
- B. Set the priority of the static default route using port1 to 10.
- C. Set snat-route-change to enable.
- D. Set preserve-session-route to enable.

Answer: B

NEW QUESTION # 97

Refer to the exhibit. Assuming a default configuration, which three statements are true? (Choose three.)

- A. User C: Fail. There is no route to 10.0.4.63 using port1 in the routing table.
- B. User B: Pass. FortiGate will use asymmetric routing using wan1 to reply to traffic for 95.56.234.24.
- C. Strict RPF is enabled by default.
- D. User A: Pass. The default static route through wan1 passes the RPF check regardless of the source IP address.
- E. User B: Fail. There is no route to 95.56.234.24 using wan2 in the routing table.

Answer: A,D,E

Explanation:

User B: Fail. There is no route to 95.56.234.24 using wan2 in the routing table.

Since 95.56.234.24 doesn't match 10.0.2.0/24, traffic arriving on wan2 would have to be routed out via the default gateway on

Traffic from 71.234.149.16 hits wan1, and the return path is also via wan1 (the default route), so it succeeds.
