

Snowflake SOL-C01 Useful Dumps, Exam SOL-C01 Bible

What's more, part of that Getcertkey SOL-C01 dumps now are free: <https://drive.google.com/open?id=1iLWL8P2GubIVmMMaqsPKgbc7wu0rzg-F>

As you can see that on our website, we have free demos of the SOL-C01 study materials are freebies for your information. In case you are tentative about their quality, we give these demos form which you could get the brief outline and questions closely related with the SOL-C01 Exam Materials. And it is quite easy to free download the demos of the SOL-C01 training guide, you can just click on the demos and input your email than you can download them in a second.

How to pass the SOL-C01 exam successfully and quickly? The answer lies in our valid and excellent SOL-C01 training guide. We have already prepared our SOL-C01 training materials for you. They are professional SOL-C01 practice material under warranty. Accompanied with acceptable prices for your reference, all our SOL-C01 Exam Materials with three versions are compiled by professional experts in this area more than ten years long.

Exam SOL-C01 Bible - Valid SOL-C01 Test Pass4sure

When you choose SOL-C01 valid study pdf, you will get a chance to participate in the simulated exam before you take your actual test. The contents of SOL-C01 exam torrent are compiled by our experts through several times of verification and confirmation. So the SOL-C01 questions & answers are valid and reliable to use. You can find all the key points in the SOL-C01 practice torrent. Besides, the SOL-C01 test engine training equipped with various self-assessment functions like exam history, result scores and time setting, etc.

Snowflake Certified SnowPro Associate - Platform Certification Sample Questions (Q166-Q171):

NEW QUESTION # 166

You are tasked with creating a secure data sharing environment in Snowflake. You need to share a table named 'CUSTOMER RECORDS' from the 'SALES DB' database in your account (Account A) with another Snowflake account (Account B). You want

to ensure that Account B can only query the data and cannot modify it in any way. Which of the following steps are REQUIRED to achieve this securely and effectively?

- A. Create a database in Account B from the share provided by Account A, and grant SELECT privilege to the roles in Account B that need access.
- B. Grant OWNERSHIP on the 'CUSTOMER RECORDS' table to the target account (Account B).
- C. Create a share object in Account A and grant USAGE privilege on the database and SELECT privilege on the table to the share.
- D. Create an external function that reads the data from Account A and presents it to Account B.
- E. Create a masking policy on all the columns of the 'CUSTOMER RECORDS' table before creating the share object.

Answer: A,C

Explanation:

To share data securely, you need to create a share object and grant appropriate privileges in the source account (A). This includes USAGE on the database and SELECT on the table. The target account (B) then creates a database from the share, which is a read-only copy of the data.

Finally, SELECT privilege must be granted to roles within account B to allow access. Granting OWNERSHIP to the target account (C) defeats the purpose of secure sharing and isn't required or best practice. External functions (D) are not the correct approach. Masking Policies (E) might be appropriate based on data sensitivity but aren't a fundamental requirement for simple data sharing.

NEW QUESTION # 167

You have a large CSV file stored in AWS S3 that you need to load into a Snowflake table called 'SALES DATA'. The CSV file is compressed using GZIP, and it contains a header row that you want to skip. The table 'SALES DATA' already exists with the correct schema. You want to optimize the data loading process by using a named file format object and explicitly specifying the virtual warehouse. The S3 bucket is properly configured for Snowflake access. Which of the following SQL statements is the MOST efficient and correct way to load the data?

- A.

```
COPY INTO SALES_DATA FROM @my_stage/sales.csv.gz FILE_FORMAT = (FORMAT_NAME = my_csv_format) ON_ERROR = SKIP_FILE;
```

- B.

- C.

- D.

```
CREATE OR REPLACE FILE_FORMAT my_csv_format TYPE = CSV COMPRESSION = GZIP SKIP_HEADER = 1; COPY INTO SALES_DATA FROM @my_stage/sales.csv.gz FILE_FORMAT = (FORMAT_NAME = my_csv_format) ON_ERROR = SKIP_FILE WAREHOUSE = my_warehouse;
```

- E.

```
COPY INTO SALES_DATA FROM @my_stage/sales.csv.gz FILE_FORMAT = (FORMAT_NAME = my_csv_format) ON_ERROR = SKIP_FILE WAREHOUSE = my_warehouse;
```

Answer: D

Explanation:

Option E is the most correct and efficient. First, it creates the named file format to encapsulate the CSV-specific settings (compression, header skipping). This promotes reusability and readability. Then, the COPY INTO statement uses this named format, skips files on error, and specifies the 'WAREHOUSE' for explicit control, improving performance. Option A doesn't use a named file format or specify a warehouse. Option B is missing the creation of the file format object and the skip header parameter, will throw an error. Option C uses 'COMPRESSION = AUTO', but explicitly stating the compression type (GZIP) is better for performance. Option D does not create file format and so the query would fail.

NEW QUESTION # 168

A data consumer creates a database 'DB CONSUMER' from a share provided through Snowflake Data Sharing. After some time, the data provider revokes access to the share. What is the state of 'DB CONSUMER'?

- A. 'DB CONSUMER' remains accessible, but new data updates from the provider are not reflected.
- B. 'DB CONSUMER' is automatically dropped.
- C. CONSUMER becomes read-only with the data available at the time access was revoked.
- D. 'DB CONSUMER' becomes inaccessible, and all queries against it will fail.
- E. 'DB CONSUMER' is still accessible but data is masked.

Answer: D

Explanation:

When access to a share is revoked, the database created from that share becomes inaccessible.

Snowflake's data sharing relies on a live connection to the provider; when the connection is broken, the data is no longer available to the consumer.

NEW QUESTION # 169

You have a table named 'CUSTOMER ORDERS' with columns 'ORDER ID', 'CUSTOMER ID', and 'ORDER DATE'. You want to create a clone of this table for testing purposes, ensuring the cloned table contains only the schema definition and no data. Which of the following commands achieves this?

- A. CREATE TABLE TEST ORDERS CLONE CUSTOMER ORDERS;
- B. CREATE TABLE TEST ORDERS CLONE CUSTOMER ORDERS WHERE 1=0;
- C. CREATE TABLE TEST ORDERS LIKE CUSTOMER ORDERS DATA ONLY;
- **D. CREATE TABLE TEST ORDERS AS SELECT FROM CUSTOMER ORDERS WHERE 1=0;**
- E. CREATE TABLE TEST ORDERS LIKE CUSTOMER ORDERS;

Answer: D

Explanation:

Option B, 'CREATE TABLE TEST_ORDERS AS SELECT FROM CUSTOMER_ORDERS

WHERE 1=0;' , creates a new table TEST_ORDERS' with the same schema as but without any data, as the 'WHERE condition ensures no rows are selected. Option A works but Snowflake recommends cloning for metadata copying. Option C copies both schema and data. There is no such thing like 'DATA ONLY option D. Option E is syntactically incorrect.

NEW QUESTION # 170

What file extension is commonly used for Snowflake notebooks?

- **A. .ipynb**
- B. .txt
- C. .sql
- D. .ipnb

Answer: A

Explanation:

Snowflake notebooks use the .ipynb file extension, the standard format for Jupyter notebooks. This format stores executable code, markdown, metadata, and cell outputs in a structured JSON layout. Snowflake adopts this format to ensure compatibility with the broader Python ecosystem, thereby enabling seamless migration between Snowflake and external notebook environments.

The .ipynb structure allows mixed SQL and Python cells, visualizations, Streamlit components, documentation, and stepwise development within Snowsight. It supports reproducibility, collaboration, and integration with Snowpark and Cortex.

Incorrect formats:

* .ipnb is a misspelling and invalid.

* .sql is used for SQL scripts only.

* .txt cannot represent notebook metadata or cell structure.

Thus, .ipynb is the correct and only supported notebook format.

NEW QUESTION # 171

.....

Getcertkey Snowflake SOL-C01 exam information is proven. We can provide the questions based on extensive research and experience. Getcertkey has more than 10 years experience in IT certification SOL-C01 exam training, including questions and answers. On the Internet, you can find a variety of training tools. Getcertkey SOL-C01 Exam Questions And Answers is the best training materials. We offer the most comprehensive verification questions and answers, you can also get a year of free updates.
