After you purchase our Mule-Dev-202 exam dumps, we will also provide one year free renewal service for you. If there's any quality problem in Mule-Dev-202 Exam Dumps you buy or you fail Mule-Dev-202 certification exam, we promise to give you a full refund unconditionally.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q28-Q33):

NEW QUESTION # 28
The Ops team at AnyAirlines needs to periodically check the status of an API to see it the connected database is down for maintenance.
Where should the Ops team set up a scheduled API call and view the status history?

- A. API Functional Monitoring
- B. API Monitoring Dashboard
- C. API Manager Alerts
- D. API Manager Analytics

Answer: A

Explanation:
To periodically check the status of an API and see if the connected database is down for maintenance, the Ops team should use API Functional Monitoring:
API Functional Monitoring:

API Functional Monitoring allows you to set up scheduled tests and monitor the functional performance of your APIs. It can be configured to periodically make API calls and check for specific conditions, such as whether the database is down for maintenance.
Scheduled API Calls:
Set up the necessary tests within API Functional Monitoring to periodically call the API and verify its status.
These tests can be scheduled to run at regular intervals.
View Status History:
API Functional Monitoring provides a dashboard where you can view the history of these tests, including their results and any failures. This helps in tracking the availability and performance of the API over time.

NEW QUESTION # 29
Which Connected App scope should be used to connect RPA Manager with an Anypoint Platform account?

- A. Exchange Administrator
- B. RPA Integrator
- C. API Catalog Contributor
- D. Application Creator

Answer: B

Explanation:
To connect RPA Manager with an Anypoint Platform account, the appropriate Connected App scope isRPA Integrator:
RPA Integrator Scope:
The RPA Integrator scope is designed to provide the necessary permissions for integrating RPA Manager with Anypoint Platform. This scope allows the connected app to interact with the RPA Manager and manage RPA processes.
Connected App Configuration:
When setting up a connected app in Anypoint Platform, select the RPA Integrator scope to ensure that the integration can access and manage the RPA processes as required.

NEW QUESTION # 30
AnyAirlines uses an Einstein bot for their customer support. They want it to display a message when a user provides an incorrect answer to a particular question.
Which dialog option should be selected'?

- A. Question
- B. Action
- C. Rules
- D. Message

Answer: D

Explanation:
Message Dialog Option:When configuring an Einstein bot to respond to incorrect answers, the 'Message' dialog option should be selected. This allows the bot to display a predefined message to the user, guiding them appropriately or informing them of the incorrect input.
Reference:Salesforce Einstein Bot Setup Guide
Understanding Dialog Options:
Action:Used for initiating backend processes or external actions.
Question:Used for asking the user for information or inputs.
Rules:Used for defining conditional logic to control the flow of the conversation.
Message:Specifically used to provide information or feedback to the user, which is ideal for handling incorrect answers.
Reference:Einstein Bots Dialogue Management

NEW QUESTION # 31

An RPA developer is building the implementation of an RPA process based on the BPMN created by a colleague. In the BPMN, they see the symbol below:

What does the symbol represent?

- A. A cleanup activity that is performed at the end of the process to ensure all running applications are closed
- B. A point in the process where different activities are performed under different circumstances
- C. An activity that is performed if an error occurs during processing
- D. One possible endpoint for the process

Answer: B

Explanation:
Symbol Meaning:The symbol shown is a diamond with an "X" inside, which represents an exclusive gateway in BPMN (Business Process Model and Notation). This gateway is used to control the flow of the process based on certain conditions or circumstances.
Reference:BPMN Gateway Types
Exclusive Gateway:An exclusive gateway routes the process flow into one of several paths based on conditions defined within the process model. Only one path is taken out of the gateway.
Reference:Exclusive Gateway Explanation
Usage in Process:When an exclusive gateway is encountered, the process evaluates the conditions on each outgoing sequence flow and chooses the path that meets the conditions. This ensures different activities are performed based on different circumstances.
Reference:BPMN Exclusive Gateway

NEW QUESTION # 32

AnyAirlines wants to share the Flight Path API through their public Anypoint Exchange Portal.
What should be configured before the API can be shared?

- A. The users that need access to the API should be added to the appropriate role in Anypoint Platform.
- B. The visibility level of API instances should be set to public.
- C. The API should be functional and accessible for users to interact with.
- D. The API should be secured using one of the supported authentication/authorization mechanisms.

Answer: B

Explanation:
Before sharing an API on the public Anypoint Exchange Portal, several configurations must be in place:
Set Visibility Level to Public:
Ensure the API's visibility level is configured as public within the Anypoint Platform so that it can be shared and accessed by external users.
Navigate to Anypoint Platform > API Manager > Select the API > Settings > Set Visibility to Public.
Ensure API Functionality and Accessibility:
Make sure the API is fully functional and accessible so that users can interact with it once shared.
Configure Security:
While setting the visibility to public is crucial, ensuring that the API is secured using one of the supported authentication/authorization mechanisms is a best practice to control access.
